If the local telephone management will be as obliging as they are in Roseburg, according to the News, they will have no difficulty in securing a big list of subscribers in town. Following is the way they accommodate their patrons: A story is being circulated about the city to the effect that a certain Roseburg young lady the other day desired to go out shopping for a few hours, and did not know with whom to leave her baby of a few months with. At last she hit upon a novel scheme. Putting the child in its carriage she took down the telephone receiver and placed it beside the sleeping child. Then she notified central of the arrangement and asked her to sing to the baby if it woke up and cried. Whether this story is true cannot be vouched for by us, but should it be there is a good chance for the establishment of a nursery by telephone.
