MANY NEW "HELLO" JOBS OPEN FOR WOMEN

Railways Are to Use Phone is Place of Telegraph After March I.

OPERATORS TO BE LET OUT.

Block Signals Also Will Be Installed and Many Small Stations Closed.

A new field of employment for women is to be opened by the railways. This does not mean that the roads will employ women telegraphers, but on the contrary their employment will be for the purpose of taking the place of telegraphers already in the service. The future woman railway operating employe will be engaged at the smaller stations taking train orders over a tele-PAZO OINTMENT is guaranteed to cure any stations taking train orders over a tele-ease of itching, Blind. Bleeding or Protruding phone, where formerly such orders were hurried into the station. "Are they Piles in 6 to 14 days or money refunded. 50c. transmitted and received by telegraph. | gone?" This new field will be open to women when the new nine-hour day law governing the working time of railway waiting room, "far gone." telegraphers goes into effect on March 1.

> It was confidently expected that this law would work a revolution in railway operation, and it was with this end in view that the Order of Railway Telegraphers procured its passage despite the determined opposition of the railway managers and even against advice direct from the White House. The 1evolution is coming, all right, but it will be a revolution which will relegate the telegraph to a back seat as an adjunct to railway operation and will throw thousands of operators out of employment and annually will decrease their number until they will almost disappear from American railways.

> It was expected that the reduction in the working hours of railway telegraphers toenine hours would compel the railroads to employ at least 8,000 additional men at once. It was also known that it would be impossible to secure this number of men when needed, and it was therefore hoped by the men that an increase in wages would be a part of the revolution planned.

Changes to Result.

The railway managers at first took a similar view of the situation, but it soon was discovered that it would be impossible to supply the demand if all Americans as judges are keenly dis- existing telegraph offices were to be bring about the following changes:

1. The abandonment of all stations this country, where education is the as telegraph stations except division down the stage with a wearied, trou-

difficult and surprising to find a general 2. The substitution of teelphones for national success not based on actual the receipt and the transmission of or

4. The transaction of a tremendous

5. The rapid extension of the automatic electric block signal system, "I suppose you have been pinched which will make telegraph stations un-

> In determining to inaugurate these changes the railway managers found tween London and Teheran, the capital Deacon Noyes. that they had in reality been preparing of Persia. It is 4,000 miles long and is The revolution was scarcely over, but for them for years. It was discovered also that by adopting the most expensive system of block signaling train orders and telegraph stations could for the greater part be done away with.

The railroads, therefore, decided that | in China. they would rather spend millions in providing and maintaining automatic block signals which never go to sleep and which never fall unless they spell "SEND FOR IT NOW" "danger," than to spend the same money in maintaining telegraph stations and telegraph operators. The closing of stations as telegraph stations is made possible by the fact that with an automatic electric signal all that is necessary is to start trains as fast as the terminal block is empty and keep; them going until a semaphore says "stop."

After suffering excruciating pains in his head for twenty-five years, Louis Wolfson of Cincinnati has secured relief by having the surgeons cut out two nerves. The pain was above the eyes and at the specialists, tried medicines, various forms of massage and electrical treatment in vain. The two offending nerves, one on in action. each side, were between one and two inches long and about as thick as a pin. They are termed sensory nerves-that is. nerves which give the sense of feeling and not control of the movements of muscles. The headaches have not returned since the operation. Local surgeons say this is the first case of the kind on record.

Ronds Find Ready Market. Of the \$30,000,000 of equipment trust bonds of New York Central lines recently offered for public subscription \$24,000,-000 was taken the first day. They were offered at prices to yield from 4 to 574 per cent. It is understood that eeveral millions of these certificates were placed abroad.

PACIFIC FISH INDUSTRY.

Twenty Thousand Pounds Sold Daily in Los Angeles Markets.

The fish industry, extending from Vancouver on the north to San Diego on the south, is one of great importance on the Pacific coast, says the Los Angeles Herald. Locally many thousands of dollars are invested in the business and the product of the sea finds quick sales in Los Angeles and neighboring

Halibut is regarded as the standard fish, ranging in weight from one to forty pounds and can be had the year round, except during the months of October, November and December.

Barracuda is next in popularity. This product is caught every month in the year from San Pedro to San Diego. Nets and troll lines are used for catching barracuda and when both methods are adopted the local market becomes glutted with the product. The average weight is five pounds.

Sea bass are caught from Santa Barbara to San Diego. This fish is one of the best products of the sea. Weight from four to fifty pounds.

The red snapper or rock cod is in active demand in the winter season. The fish is caught around Catalina or on "the banks" known to the fishermen. Weight one-half to ten pounds. Sardines are used for bait.

Bonita and yellowtall are fine table fish that are caught in nets and set he pointed to the turtle doves in the lines. Bonita, four to eight pounds; yellowtall, six to thirty pounds. Albicore is an olly fish popular with epicures.

Rock bass is a choice fish caught in the kelp; weight one-half to six pounds. What is known as horse and American mackerel is in the market during Cittiman-Look here, sir, didn't you the spring months. Mackerel run in warrant the horse you sold me yester schools; are caught with hook and line; weight one-half to three pounds.

Surf fish, or suckers, croakers see as you hey any reason fur com- or kinfish and perch are among the surf plaining' about that. He don't inter- fish. The sandab is caught with hook fere with anybody but himself, does and line along the coast; herring is caught at San Pedro, San Diego and lar songs."-Washington Star. Santa Barbara from January to March. Herring is fine bait for the professional fisherman.

The pompano is a delicious fish that retails at 40 cents to \$1 a pound. It is one of the choice articles of the menu cards in first-class restaurants. The prong is equally popular.

Codfish, sculpins and other fish are brought to the market.

Lobsters are in the market from Sept. 15 to April 1. Tuna is a fish caught by sportsmen at Catalina. It is not marketable. The lewfish are among the heavyweight den-

izens of the deep at Catalina. Big doings always follow the catch of a 300 or 400-pound jewfish. Turtles of heavy weight come from the Mexican waters.

Professional fishermen make big the 'Doctor of Divinity'?" noney if they have good luck. Their | "That is a piece I have never he losses are chiefly due to damage to

SLAVES IN MASSACHUSETTS.

Early Church Discussion on Slavery -Dandified Negro Waiter.

The colored "mammy," devoted, loyal and autocratic, one thinks of as belonging to the South and the days before the war, but in the far-away time of slavery in New England she was known there also, says the Youth's Companion.

One such mammy, happy and beloved, but despotic, was Violet, the slave of the Rev. Moses Parsons of Byfield, but the real ruler of the household and his lively brood of boys. Her husband, graph circuit in the world is that be- Primus, belonged to their neighbor,

BAD BLOOD THE SOURCE OF ALL DISEASE

Every part of the body is dependent on the blood for nourishment and strength. When this life stream is flowing through the system in a state of purity and richness we are assured of perfect and uninterrupted health; Lecause pure blood is nature's safe-guard against disease. When, however, the body is fed on weak, impure or polluted blood, the system is deprived of its strength, disease germs collect, and the trouble is manifested in various ways. Pustular eruptions, pimples, rashes and the different skin affections show that the blood is in a feverish and diseased condition as a result of too much acid or the presence of some irritating humor. Sores and Ulcers are the result of morbid, unhealthy matter in the blood, and Rheumatism, Catarrh, Scrofula, Contagious Blood Poison, etc., are all deep-seated blood disorders that will continue to grow worse as long as the poison remains. These impurities and poisons find their way into the blood in various ways. Often a sluggish, inactive condition of the system, and torpid state of the avenues of bodily waste, leaves the refuse and waste matters to sour and form uric and other acids, which are taken up by the blood and distributed throughout the circulation. Coming in contact with contagious diseases is another cause for the poisoning of the blood; we also breathe the germs and microbes of Malaria into our lungs, and when these get into the blood in sufficient quantity it becomes a carrier of disease instead of health. Some are so unfortunate as to inherit bad blood, perhaps the dregs of some old constitutional disease of ancestors is handed down to them and they are constantly annoyed and troubled with it. Bad blood is the source of all disease, and until this vital fluid is cleansed and purified the body is sure to suffer in some way. For blood troubles of any character S. S. S. is the best remedy ever discovered. It goes down into the circulation and removes any and all poisons, supplies the healthful properties it needs, and completely and permanently cures blood diseases of

PURELY VEGETABLE

every kind. The action of S. S. S. is so thorough that hereditary taints are removed and weak, diseased blood made strong and healthy so that disease cannot remain. It cures Rheumatism, Catarrh, Scrofula, Sores and Ulcers, Skin Diseases, Contagious Blood Poison, etc., and does not leave the

slightest trace of the trouble for future outbreaks. The whole volume of blood is renewed and cleansed after a course of S. S. S. It is also nature's greatest tonic, made entirely of roots, herbs and barks, and is absolutely harmless to any part of the system. S. S. S. is for sale at all first class drug stores. Book on the blood and any medical advice free to all who write.
