

Household Economy.

How strange that women should have been so slow to see the importance of a special scientific training for the work they are reasonably certain to be called upon to do.

Young women have been eager and self denying in the study of music, art and literature, but are just now beginning to see the advantage of an education in the science of the home.

If it be true that the greatness of our Nation rests upon the integrity of its homes, then must domestic science be the foundation upon which all other scientific pursuits depend. This is indeed the fact. And the women of the Nation deserve the greatest praise for what they have achieved in spite of an inadequate industrial education.

Oregon is one of the States which has awakened to the fact that home training for our women is just as important as any special manual training for our young men.

The Oregon Agricultural College has arranged for an enlargement of its school of domestic science and arts next year.

Miss Juliet, Greer of Pratt's Institute will have charge of this school and will have a corps of four professors. All of these ladies come from the best institutions of the East, and are prepared to give the young women of Oregon a training second to none in the country.

The laboratories and class-rooms in the various branches of cooking, laundry work, hygiene and sanitation, home nursing, the art of entertaining, etc., will be in Waldo Hall, the commodious dormitory for women. The class-rooms in all branches of sewing, decorative art and millinery will occupy the entire second floor of the new building which will be ready for occupancy in September. Very few state institutions have a better equipment or more commodious quarters for this school of economics than the Oregon Agricultural College shall present next year.

There will be an increasing demand, from this time on, for teachers to handle the cooking and sewing given in the public and high schools, and there should be no fear that any one graduated from this course at the Oregon Agricultural College will not find immediate and lucrative employment, if she is seeking a means of livelihood. Indeed, for though this course is principally designed to fit our graduates to be home-makers, yet their is an increasing demand at good salaries, for the well trained woman who has had this scientific training.

With the new dormitory and half a dozen women added to the faculty, the social life at Waldo Hall promises to be very interesting. The Art Museum of Portland, The Women's Club, and several other organizations have promised illustrated lectures and symposiums during the year, which will bring the best talent of the metropolis to Corvallis, from time to time.

Besides the practical work in the school of domestic science and arts which young women may elect, there are always some who enter the schools of Pharmacy, Floriculture, Dairying, Poultry, Husbandry, and Commerce.—Clara H. Waldo in The Oregon Connytrmen.

Keeping Men Employed.
The movement to encourage employers to retain a full working force in all cases where sound business principles will admit of it is sensible and praiseworthy in every way. It is too much the custom to slow up in active affairs in presidential years, and after a financial flurry, even one of a superficial nature like that recently experienced, to proceed with an excess of caution, not to say timidity. This is a big country, with a vast amount of work to be done, and it is not the right spirit to lay men off for fear that something may happen, financially or politically, that will seriously derange business. Don't cry out before there is a hurt. As a matter of fact the business outlook is unusually good. The crop news is all favorable. A large

balance of trade is piling up on our side. The foreign demand for farm products and manufactures is at a high mark. There will be a treasury deficit for the year, but it will be \$2,000,000 less than the treasury surplus for last year. The government has a cash balance of \$239,000,000. More workers are wanted on the farms than can be obtained. Manufacturing and mining are active. Surely a place exists somewhere for every active and industrious man. The number of unemployed at this time has been exaggerated, but there are some who are looking for work, and it is an excellent idea for everybody, as far as able, to lend a hand in finding places for them. A whole community is better off when this most worthy end is accomplished.—Globe Democrat.

Improved Form of Blackleg Vaccine

The advantages of Blackleg Pills over the powder form of vaccine are that the time and bother of mixing are saved; that the dose is absolutely uniform; that a package may be opened and only a part used, the rest being saved for future use; that the operation of using it is far safer and simpler than that of using the powder form; that the slower absorption of the pills tends to the production of a higher degree of immunity.

The injector is a very simple instrument that is practically indestructible, and on account of its simplicity is less likely to get out of order. The operation of vaccinating consists simply of putting a pill in the hollow needle of the injector and after the needle has been pushed into and under the skin (between the skin and the muscle) the pill is ejected by means of a plunger which is operated by a thumb-piece on the side.

The Cost of Vaccination.

This is governed not by what you pay for vaccine, but by what protection you get from it. If out of a hundred animals vaccinated with vaccine that may have cost you little or nothing, you lose one animal that might have been saved if a fresh, uniformly, reliable and easily applied vaccine had been used, your free vaccine would have cost you two or three times what you would pay for a reliable article.

We are assured by the reports of users that the products of The Cutter Laboratory, Berkeley, California, are of the highest standard, and they are certainly fairly priced. This laboratory produces biological products only (vaccines and serums) and makes a specialty of the investigation of infectious diseases of both men and animals. Their booklet on Blackleg and Anthrax may be obtained free on application to the Laboratory.

Those stockmen who are not familiar with the pill form of vaccine should certainly investigate the matter. If they do they will abandon the use of the uncertain and vexatious powder form.

Notice.

Notice is hereby given that all Coos County Warrants drawn on General Fund and endorsed prior to January 1st 1907 will be paid on presentation at my office in Coquille City, Oregon.

No interest will be allowed after June 30 1908.

J. B. DULLEY,
Treasurer, Coos
Co. Oregon.

Dated June 24, 1908, Coquille City, Oregon.

No Need of Suffering from Rheumatism.

It is a mistake to allow rheumatism to become chronic, as the pain can always be relieved, and in most cases a cure effected by applying Chamberlain's Pain Balm. The relief from pain which it affords, is alone worth many times its cost. It makes sleep and rest possible. Even in cases of long standing this timent should be used on account of the relief which it affords. 25 and 5 cent sizes for sale by C. Y. Lowe.

BO. N IN IOWA

Our family were all born and raised in Iowa, and have used Chamberlain's Colic, Cholera, and Diarrhoea Remedy (made at Des Moines) for years. We know how good it is from long experience in the use of it. In fact while in El Paso, Texas, the writer's life was saved by the prompt use of this remedy. We are now engaged in the mercantile business at Narcoossee, Fla., and have introduced it into the territory here. It has proven very successful and is constantly growing in favor.—Egbert Bros. This remedy is for sale by C. Y. Lowe.

The Ticket Complete.

It was doubtless motives of political expediency which led to the nomination of Congressman Sherman, of New York, as the running mate of Mr. Taft. Under ordinary conditions and meeting ordinary considerations, it would seem that the man should have been Cummins, of Iowa, not only for the reason that he is a western man, but for the still further reason that he is a radical man and therefore would add strength to a ticket that must appeal to these elements in the Western sections at least. But the reactionary forces of Iowa under Senator Allison would never consent to the advancement of Cummins. Besides Iowa would in any event be safe. What would really be needed to the Republican party, what might indeed prove crucial, in the November election was the great electoral vote of New York. There might be some trouble for Taft to carry the state without a New York associate, though why there should be with Bryan likely to be the Democratic nominee, is not quite apparent.

However, Taft and Sherman is the ticket and back of it looms all the force at the command of President Roosevelt. He was a very powerful factor in achieving the ticket's nomination, particularly the head of it. The head of the ticket is his personal friend and long time associate. He it is who will carry out the policies which the President has already set in motion, and this will be the profoundest influence in its success next November.—Telegram.

SORE NIPPLES

Any mother who has had experience with this distressing ailment will be pleased to know that a cure may be effected by applying Chamberlain's Salve as soon as the child is a bone nursing. Wipe it off with a soft cloth before allowing the babe to nurse. Many trained nurses use this salve with best results. For sale by C. Y. Lowe.

Miles and Miles.

If you set out to walk a mile in Sweden you will have to walk more than five times as far as you would have to walk in America to complete your mile, for a Swedish mile is 34,980 feet long, while an American mile is only 5,280 feet. The English and the American miles are the same in length, while the Spanish mile lacks 714 feet of being as long as the American mile, the Norwegian mile is nearly seven times its length, and the Dutch mile is only 3,280 feet. With the exception of America and England, there are no countries in which the mile is the same length.—Minneapolis Journal.

Wouldn't Take His Place.

Hearing of the sudden taking off the stage of life of a leading Thespian while he was playing in Chicago, a New York Rialto out of a job telegraphed the manager as follows:

"Having heard of the sad and tragic demise of Mr. —, I'll take his place for \$150 a week."

As the message was sent collect, it elicited the following reply: "Thanks. I wouldn't take his place for twice that amount."—Minneapolis Journal.

BUCKLEN'S ARNICA SALVE WINS.

Tom Moore, of Rural Route 1 Cochran, Ga., writes: "I had a bad sore come on the instep of my foot and could find nothing that would heal it until I applied Bucklen's Arnica Salve. Less than half of a 25c. bottle won the day for me by affording a perfect cure." Sold under the name of Lowe's Arnica Salve.

Take your job printing to the Recorder. We have nothing but the best in all stock.

Diagnosed.
Young Featherhead soon after purchasing his elegant new touring car was taken with a swelling on the back of his neck. He went and consulted his physician about it. "Doctor," he said, "are there such things as automobile diseases?" "It is not unlikely," was the doctor's response. "At least automobilism may develop tendencies to disease that lie dormant under ordinary conditions." "Well, I wish you would look at that spot on the back of my neck and tell me if the excessive use of my motor car has anything to do with it."

The doctor complied. "H'm!" he said gravely. "That looks as if it might be either a carbuncle or an auto-bile." — Youth's Companion.
