in two years, which prove its wonderful efficacy in purifying and enriching the blood. Best for all blood diseases. In usual liquid form or chocolate tablets known as Sarsatabs. 100 doses \$1.

**Makes One Exception.**  
"You're always kicking about our having too many laws. I suppose you would repeal the law of gravitation if you could." "No; that's always rigidly enforced. It's only the dead letter laws I'm after."

**Point of View.**  
"What is the use," remarked the philosophical boarder, "of speculating concerning immortality?"  
"What's the use," broke in the sportive boarder with the turned collar, "of speculating in anything? You lose every time. That's my experience."

## The General Demand

of the Well-Informed of the World has always been for a simple, pleasant and efficient liquid laxative remedy of known value; a laxative which physicians could sanction for family use because its component parts are known to them to be wholesome and truly beneficial in effect, acceptable to the system and gentle, yet prompt, in action.

In supplying that demand with its excellent combination of Syrup of Figs and Elixir of Senna, the California Fig Syrup Co. proceeds along ethical lines and relies on the merits of the laxative for its remarkable success.

That is one of many reasons why Syrup of Figs and Elixir of Senna is given the preference by the Well-Informed. To get its beneficial effects always buy the genuine—manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists. Price fifty cents per bottle.

"My observation," said the sage, "leads me to the conclusion that the more wealth one gives away the more wealth one has."  
"It's just exactly the same way with kisses," whispered one of his listeners, a demure little miss who was sitting by a big man with a beard.

**Code 825 of 84.**  
"I never saw anybody so cool, self-possessed, and quick to act in times of imminent danger as that man Globba."  
"Chaufeur!"  
"No; just a common pedestrian."  
**Declared OS.**  
Said He—Darling, we have been engaged for six months. Don't you think it is about time we were getting married?  
Said She—Well, I'm willing to be married just as soon as you can provide me with a home.  
Said He—That being the case, I suppose I am to consider the engagement broken.

**Jumping at a Conclusion.**  
"What sort of play is this?" asked the man who had just come in and takes his seat.  
The question was answered by a man named Olson, who happened to be sitting next to him.  
"Ay tank—"  
"O, it's a tank drama, is it?"—Chicago Tribune.

**Extremely Rare.**  
"While I was downtown," said Mrs. Lapsing, laying aside her wraps, "I saw a wonderful old violin in a music store. The clerk said it was worth \$5,000. It was a genuine Sardanapalus, and you know that kind is getting very scarce nowadays."—Chicago Tribune.

**Wouldn't He?**  
"Somehow," said the political manager, "I can't help wishing I could get acquainted with the chap that held up those 125 travelers in Yellowstone park a few days ago. Wouldn't he be a dandy collector of campaign contributions!"—Chicago Tribune.

**In the Mission Sunday School.**  
Teacher—And what do you suppose all the animals did during those forty days in the ark?  
Smarty Williams—They just loafed around and scratched themselves.

**Sandy Toole (Disdainfully)**—Chuck it, Smarty! What'd they scratch for, when there was only two fleas?—The Bohemian.

**Quite the Contrary.**  
Mrs. Upsome—Is your dentist one of the "painless" kind?  
Mrs. Oylwell—Not at all. He's so sympathetic that he says it hurts him just as much as it does me.

**Great Objector.**  
Street Preacher—O, my friends, when Gabriel blows his trumpet what will you be doing?  
Voice (from outskirts of crowd)—Waiting for Montgomery Ward to serve an injunction on him!—Chicago Tribune.

**Explaining It.**  
The tortoise had won the race.  
"I didn't half try," said the hare, with a yawn. "What's the use? We're not allowed to bet on races now, anyway."  
From which it is apparent that the real facts in the case were suppressed.—Chicago Tribune.

**Reassuring Him.**  
"Madam," said the guard on the South Side elevated, "this is the smoking car."  
"That's all right, conductor," said the self-possessed matron, taking a seat. "Don't apologise. I know it's dirty, but one can't expect a smoking car to be a front parlor."—Chicago Tribune.

**Apartment House Amenities.**  
Third Floor Renter—When you buy coffee why don't you have the grocer grind it for you?  
Fourth Floor Renter—When you buy a chuck steak why don't you get the butcher to hammer the daylights out of it for you?

**Righteous Resentment.**  
"You may put that back in the show case!" said the indignant Mrs. Lapsing to the milliner. "I wouldn't even wear much less buy, a hat named in honor of that horrid murderer, Charlotte Corduroy!"

**None in Evidence.**  
Mrs. Highsome—Yes, he's the Duke of Hufhouse. In speaking of him, you know, of course, we use the term, his grace.  
Mrs. Suddyn-Klymer—His grace? Why, he hasn't any! He's a regular lummi!

**Baddy Rattled.**  
The timid young woman, who had letters of introduction to the great man, had ventured to call.  
"You are so busy, judge," she said, "that I—I hesitated about disturbing you." How many—er—days in the work do you week?"

**Collateral Evidence.**  
His indulgent grandmother had given him a half of a custard pie.  
"You seem to like it, Tommy," she said.  
"Like it!" exclaimed Tommy, taking it away from his face for a moment, "jes see how I'm mussin' up my ears!"—Chicago Tribune.

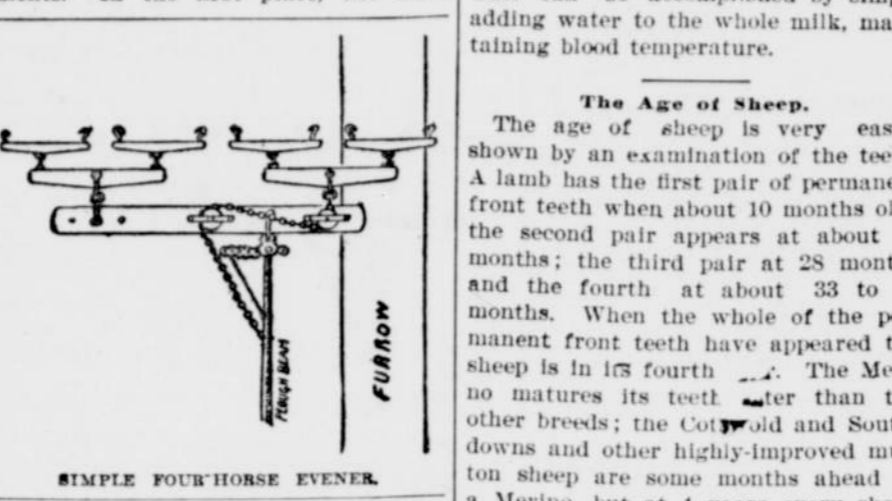

**Knows Better Now.**  
"If you wish to have everybody for your friend," counseled her elderly adviser, "don't be a talker; be a listener."  
It was not until after she had secured a job as telephone girl in the central office that she found out what a mistake she had made in taking the advice literally.

**Parallel Case.**  
"My observation," said the sage, "leads me to the conclusion that the more wealth one gives away the more wealth one has."  
"It's just exactly the same way with kisses," whispered one of his listeners, a demure little miss who was sitting by a big man with a beard.

# FARMS AND FARMERS

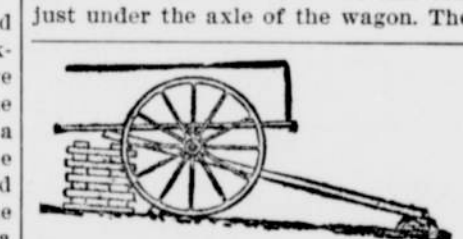

**Food for Young Calves.**  
Withhold solid foods until the calf will take them dry, which is usually at about three weeks of age. As the calf grows older encourage big eating in order to secure good storage capacity, and with sound and nutritious foods stimulate both digestion and ability to digest.  
By rich cream we have commonly come to understand to mean milk rich in butter fat. It is admitted that milk richest in butter fat is also richer in casein; and, while an excess of butter fat is not likely to disarrange the stomach of the calf, an excess of casein will. Therefore, allowing the milk to cream, and removing this to reduce the richness of the milk to the needs of the calf, is an aggravation rather than a modification, for by the skimming process the proportion of casein has been increased, while the effort that should have been made should have modified the casein. This can be accomplished by simply adding water to the whole milk, maintaining blood temperature.

**Age of Sheep.**  
The age of sheep is very easily shown by an examination of the teeth. A lamb has the first pair of permanent front teeth when about 10 months old; the second pair appears at about 18 months; the third pair at 28 months and the fourth at about 33 to 40 months. When the whole of the permanent front teeth have appeared the sheep is in its fourth year. The Merino matures its teeth earlier than the other breeds; the Cotswold and South-down and other highly-improved mutton sheep are some months ahead of a Merino, but at 4 years every sheep has its full mouth of teeth. Later the age is known by the appearance of the teeth, which gradually lose their sharp edges and become worn down smooth. A healthy sheep will keep its teeth good until 10 or 12 years old, if the pasture is not unusually bare and the soil sandy, so as to wear the teeth excessively.

**Sheep as a Civilizer.**  
A speaker at a farmers' meeting eulogized the little animal with the golden hoof in the following interesting strain:  
"Sheep are always the advance guard to attack new and undeveloped territory. The first sheep and the first negro slaves that placed foot on what is now the United States of America, were landed from the same fleet at St. Augustine, Sept. 5, 1565, 330 years ago. From that day to this the sheep has been the most universal live agent of the settlers in subduing the country and maintaining its productiveness; and whenever they have neglected their sterility exists as a monument to their folly."—Weekly Witness.

**To Lift a Loaded Wagon.**  
Build a grip of timber under a wagon and place upon it a heavy beam, as shown in the sketch. Let this come just under the axle of the wagon. Then

**HANDY FOR OILING AXLES.**  
place a stone in front of the wheel, so that when the team draws the wagon forward the wheel will be lifted upward on the inclined beam. If the incline is not to much the wagon will not slip backward and the wheel will be loose for oiling.—Farm and Home.

**Australia's Rabbit Pest.**  
In 1852 two rabbits were imported into Australia. Their descendants in that continent now number billions and are a great pest. Five rabbits eat as much grass as one sheep. From 1878 to 1888 the Australian government paid \$5,888,014 as bounty for the noxious animals, at the rate of 25 cents each, and from 1883 to 1886 \$2,200,000 for the same purpose. For some years the rabbits died by millions, owing to the drought, but since 1904, with the rainy seasons increasing, they have again come into notice and bid fair to become as great pests as in the past.

**Looking Forward.**  
Luther Burbank, the famous horticultural wizard, says there is not a weed alive which will not sooner or later respond liberally to good cultivation. A day will come when the earth will be transformed, when man shall offer his brother man not bullets nor bayonets, but richer grains, better fruit and fairer flowers.

**Poultry Pickings.**  
The heating of the brooder plays a very important part in the growth of the young chicks.  
The fowls and eggs from a pure bred flock of hens will bring more money on account of their uniformity.  
A good brooder is of more importance than an incubator, if one can be of more importance than the other.  
There is nothing that fits into the regular farm crops and live stock better than a well managed flock of poultry.  
Do not expect to find smooth sailing with the incubators and brooders at first. It requires patience and vigilance in learning to manage them.

**Worms in Colts.**  
For intestinal worms in colts the following mixture is used by some veterinarians: Mix together as a base one pound each of salt and granulated sugar; in this mix one-half pound of tobacco dust or fine cut tobacco, four ounces of sulphate of iron powder, six ounces of powdered worm seed. Give a heaping teaspoonful in the feed at first once a day, then twice per day, and keep it up for three weeks.

**Fresh Eggs.**  
Secretary Wilson says that hereafter eggs sold as "fresh" or "strictly fresh" must be exactly what they are represented to be. Storage eggs must be sold as such, or under the pure food law the dealer is liable to a fine of \$500 or six months' imprisonment, or both. Thousands of people do not know how a "strictly fresh" egg tastes. This will give them a chance to find out.

# S.S.S. NATURE'S PERFECT TONIC

There is scarcely any one, no matter how vigorous and healthy, who does not need a tonic sometimes. Little physical irregularities upset the system, the appetite fails, digestion is poor, the body feels tired and worn out, and other unpleasant symptoms give warning that the system is disordered and needs assistance to ward off, perhaps, some serious sickness or ailment. S. S. S. is recognized everywhere as the best of all tonics, nature's medicine, made entirely of healing, cleansing, invigorating roots and herbs, a systemic remedy without an equal. S. S. S. has the additional value of being the greatest of all blood purifiers. It re-establishes the healthy circulation of the blood, rids the body of that tired, worn-out feeling, improves the appetite and digestion, and brings about a return of health to those whose systems have been weakened or depleted. S. S. S. acts more promptly and pleasantly than any other medicine, and those who are run down in health should commence its use at once. It will thoroughly purify the blood and tone up the system. S. S. S. is admirably suited for a systemic remedy because it is free from minerals; it may be used without harmful results by persons of any age, and no unpleasant effects ever follow.

# MAPLEINE A Flavoring. It makes a syrup better than Maple. Sold by grocers.

**Good as Their Word.**  
"Did those new grocers keep their promise that they would 'cut your grocery bills in half'?"  
"They did. They send their bills twice a month."—Chicago Tribune.

**Future Peril.**  
Terrified Passenger (on ocean liner)—Captain, why is the steamer going so slowly and using its searchlight?  
Captain—Don't be alarmed, madam; the ship is in no danger. But in a fog like this we are always likely to run into somebody's blooming old balloon and make a nasty mess of it.

**Unlucky Accident.**  
"What's the trouble back there in the sleeper?" asked the passenger in the smoking car.  
"Little mixup between a New England manufacturer and a Louisiana sugar planter," said the agitated conductor, applying his handkerchief to divers and sundry scratched places on his face. "They happened to have herbs in the same section, and they got to talking about the tariff."

**Going Him One Better.**  
"Your opponent," they told him, "is going around the country and kissing all the babies."  
"That's an old dodge," said the candidate. "Gentlemen, I shall do something a thundering sight better than that!"  
Here he brought his fist down on the table with a bang.

**Statistics.**  
In all probability the first administrative act of the first regular government was to number its fighting men and to ascertain as nearly as was possible what amount of taxation could be levied on the rest of the community. As human society grew more highly organized there can be no doubt that a very considerable body of official statistics must have come into existence. We know that such was the case in Greece, Rome and Egypt, but it was not until within the last two or three centuries that systematic use of the information available began for purposes of investigation rather than mere administration.—New York American.

**Stale.**  
Stubb—That old Senator is always telling ancient jokes and boasting of his family tree.  
Penn—H'm. I think his family tree must have been a chestnut.

**Futile.**  
Hamlet had finished his soliloquy, and the curious bystanders were waiting to see what he would do next.  
"No," they said, at last. "He isn't going to do it. He talks eloquently about committing suicide, but he lacks the sand. Nothing doing."  
Thus it appears that the original Hamlet, like all his subsequent imitators, was merely talking for effect.—Chicago Tribune.

# CASTORIA For Infants and Children. The Kind You Have Always Bought

Bears the Signature of *Dr. J. C. King*

**Up-to-Date.**  
The smooth-tongued book agent was selling the old farmer a huge dictionary.  
"But, look here, young man," protested the farmer, "there don't seem to be any appendix in this here dictionary. All the dictionaries I ever saw had an appendix."  
The wily book agent thought a minute and then said:  
"Why, my dear sir, this is the latest dictionary. Every late dictionary has the appendix removed."  
And the old farmer was satisfied and bought the big book at once.
