

Good Blood

Means good health, and Hood's Sarsaparilla has an unapproached record as a blood-purifier.

It effects its wonderful cures, not simply because it contains sarsaparilla but because it combines the most remedial values of more than 20 different ingredients. There is no real substitute for it. If urged to buy any preparation said to be "just as good" you may be sure it is inferior, costs less to make, and yields the dealer a larger profit.

Plenty of That Kind.
"Well, known charity worker? I never heard of him as such."
"Well, he is. He makes his living by working charitable persons."

Only One "BROMO QUININE"
That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used this would ever to Cure a Cold in One Day. 25c.

A thousand horse-power vertical gas engine, said to be the largest of its kind, was recently put into operation at Kuncorn, England, driving an electric generator.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Police Station Amelities:
Bontal Lynn—Got a match?
Ura Diddin—Naw. Why didn't ye hunt around an find one when ye picked up that snipe?—Chicago Tribune.

Send for FREE 32 3/4 cent bottle and treatise. Dr. E. H. Kline, Ltd., 811 Arch St., Philadelphia, Pa.

Gloom.
Wareham Long—How d'ye reckon we'll know it when the prosperity comes?
Tuford Nutt—It'll hit everybody 'cept 'us.

Rheumatism Prescription.

The increased use of whiskey for rheumatism is causing considerable discussion among the medical fraternity. It is an almost infallible cure when mixed with certain other ingredients and taken properly. The following formula is effective: To one-half pint of good whiskey add one ounce of Toris Compound and one ounce of Syrup Sarsaparilla Compound. Take in tablespoonful dose before each meal and before retiring. Toris Compound is a product of the laboratories of the Globe Pharmaceutical Co., Chicago, but it is as well as the other ingredients can be had from any good druggist.

Continuous Performance.
"Ebenzer," called out Mrs. Jagwa; from the floor above, "have you been drinking again?"
"No, m' dear," answered Mr. Jagwa; in the hallway below, "Not again, Sell."

A recent church notice in Manchester, England, read: "A potato pie supper will be held on Saturday evening. Subject for Sunday evening, 'A Night of Agony.'"

FILES CURED IN 6 TO 14 DAYS
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Files in 6 to 14 days or money refunded. 50c.

Explanatory.
Rivers—I haven't heard anything about Dr. Mary Walker for a long time. What has become of her?
Brooks—I think she has gone into a gentleman's agreement of some sort, not to break into print any more.

FIGHTING TUBERCULOSIS.

The Modern Fresh-Air Pavilion and What It Accomplishes.

It may be said that to-day the curative treatment of tuberculosis finds itself little departed from the principles of Hippocrates, who 400 years before Christ advised patients to "go into the hills and drink goats' milk." Modern methods with tuberculosis are still largely advisory and are regulated by the four essentials: Air, food, rest, control, says the American Review of Reviews. And, although this regimen is filled out by certain measures tending to alleviate and aid, without these four essentials the physician of to-day is able to do little. The international congress on tuberculosis, which meets at Washington this fall, will have nothing beyond to offer. The single specific for tuberculosis is yet to be found.

Of course, "new cures" are evolved constantly. We have had the "vegetable-juice" cure, the "stufing" treatment and various "inhalations." But one and all prove, upon real trial, to be either worthless or else of only superficial value.

However, it must not be conjectured that the curative treatment of tuberculosis has not advanced. The principles are as ever, but they are being more thoroughly applied and their effectiveness furthered. An unremitting study is being made for a better understanding and appreciation of the fresh air and proper food, the rest, the careful supervision.

Fresh air maintains its position as first among the requirements in the treatment of tuberculosis. That the fresh air may be unimpeded and absolutely incapable of contamination the outdoor pavilion is assuming the perfect type. The tent is losing ground, not even the most radical styles can be fully ventilated at all hours of all seasons with the precision of the modern constructed pavilion. The tent is hotter than the pavilion, colder than the pavilion and damper than the pavilion. The pavilion is also being accorded precedence over the cottage plan.

STORIES OF STATESMEN.

"Uncle Joe" Cannon was discussing jocularly our society leader's claim that too many statesmen appear to rely on their un-couthness—the absence of socks, etc., for their fame.

JOE S. CANNON.

"I would point out," said he, "that neither Caesar nor Alexander wore socks, and if I attacked New York society as frankly as this person has attacked public life, I might—but, after all, perfect frankness is invariably a bad thing. You have heard, perhaps, of the young man who admitted perfect frankness? Calling on a pretty girl, he said: 'If there is one thing that I reverence in this world, perfect frankness is that thing.' 'Yes?' said the girl. 'Then I'll at once grasp the opportunity to urge you to shave off your mustache before you eat another soft-boiled egg.'"

Senator Tillman, discussing international marriages the other day, said pertinently:

"What are we coming to? A friend of mine, an ardent foe to monarchies, roared out in a speech last week:

"Down trodden as they are abroad, I still fail to understand how they can endure to be taxed to support idle, extravagant and dissolute royal families."

"Then my friend wiped his heated brow, and hurrying home, sent in a R. R. TILLMAN, stock assessment of \$10,000 in order to help the president of the Dash Railroad purchase a titled son-in-law."

Woman Students in Absence.
A telegram from Strasbourg states that the government of Alsace-Lorraine has laid before the authorities of Strasbourg University a scheme for admitting women to study there. This scheme was discussed by the senate of the university and was accepted in principle.

It is therefore probable that women will be admitted to matriculate at the beginning of the winter session.—Berliner Anzeiger.

As Yale Sees It.
Tauke—It must be great to be a Harvard man.
Styne—Why so?
"The streets up there are so crooked that people can't tell whether you're walking straight or not."—Yale Record.

Driven to Drink.
Artist—My next picture at the academy will be entitled "Driven to Drink."
His Friend—Ah, some powerful portrayal of baffled passion, I suppose?
Artist—Oh, no; it's a horse approaching a water trough!

A Surprise.
When a woman calls her husband up by telephone without his knowing who she is, she is always surprised to see how politely he addresses her at first.—Somerville Journal.

COUGHS AND COLDS

I Took Peruna

Mrs. JOSEPH HALL CHASE, 204 Tenth St., WASHINGTON, D. C.

Peruna Drug Co., Columbus, Ohio. Gentlemen—I can cheerfully recommend Peruna as an effective cure for coughs and colds.

You are authorized to use my photo with testimonial in any publication.

Mrs. Joseph Hall Chase, 204 Tenth St., Washington, D. C.

Could Not Smell Nor Hear.
Mrs. A. L. Wetzel, 1023 Ohio St., Terre Haute, Ind., writes:

"When I began to take your medicine I could not smell, nor hear a church bell ring. Now I can both smell and hear."

"When I began your treatment my head was terrible. I had buzzing and chirping noises in my head."

"I followed your advice faithfully and took Peruna as you told me. Now I might I say I am well."

"I want to go and visit my mother and see the doctor who said I was not long for this world. I will tell him it was Peruna that cured me."

Peruna is manufactured by The Peruna Drug Mfg. Co., Columbus, Ohio. Ask your Druggist for a Free Peruna Almanac for 1909.

Not Kidding.
Hick Jayes—Nocker says you spend the best part of your life in eating.
Hock Doser—Huh! The time any man spends in eating is the best part of his life.

Possible Explanation.
Mrs. Biggs—My husband seems to be lost in thought about half the time.
Mrs. Dixie—I suppose his ideas are so far apart that he can't help getting lost on the way from one to the other.

Merely Tentative.
"What is the baby's name?"
"It's Mary now, but I suppose it will be Mayme, or Mae, or Marie as soon as she gets old enough to name it."

All Wanted.
"George," said Farmer Scapple to his son, "if you had this wart of mine on your hand what would you do with it?"
"O, I don't know, father," answered George. "Trim it down with a razor, I guess."

"And I've spent \$4,000 giving you a medical education!" growled Farmer Scapple.—Chicago Tribune.

Following a Bad Precedent.
"What kind of payment are you going to put along this street?"
"Well, it is our intention—"

"So that's the kind, is it? Great Place! Why don't you move out of this neighborhood? You don't have to live here, do you?"

The Diagnosis.
Sloboy—Doctor, I'm troubled with insomnia. I tumble and toss in bed all night long. What do you suppose is the cause of it?
Doctor—Perhaps you are worrying over that bill you owe me for the last two years.

Learning the Points of the Game.
Girl in Grand Stand—Harry, who is that man everybody is cheering for?
Her Escort—That's Grabsey, the right tackle.

Girl—I see—and the fellow he threw down and jumped on is the wrong tackle, is he?
Obeying an Injunction.
The Rev. Dr. Fourthly, hearing a band organ playing ragtime music in front of his premises, closed his storm door.

"For Solomon says, you know," remarked the doctor, "that the doors shall be shut in the streets when the sound of the grinding is low."

Incorrigible.
Stella—Is she a souvenir sent?
Zella—Dreadful! The last dinner she attended she carried away the cook—New York Sun.

Only 7 per cent of the food of a French peasant consists of meat, while an English navy's food is 28 per cent meat.

The Sultan of Morocco must choose his four real wives from among his cousins, and the King of Siam is forced to marry his sisters.

Rude Polly.
The sweet young thing with the beautiful red hair approached the parrot's cage. "Pretty Polly!" she said.
"Fire! Fire!" screamed the parrot.

Everybody Knows.
"Why do you call your cat Boom bang?" inquired the caller.
But the answer the other woman made to this question is so obvious that the historian refuses to insult the intelligence of the reader by recording it.

True Enough.
Policeman (to unskilled rider)—Go back! No thoroughfare here. Can't you read that sign?
Rider—I can, but my horse can't.—Translated from Tales from Flegendo Blaster.

BEST FORAGE PLANT.

Washington State Experiment Station Makes Extensive Investigation.

In order to discover a forage plant which will grow and yield profitable crops in the so-called "dry section" of the state, the staff of the State College Experiment Station has carried on extensive investigations at both the local and sub-stations during the past year. Scores of forage plants, have been planted and tested, and at the present stage of this experimentation, it is known that milo maize, Jerusalem corn, artichokes, Kaffir corn, and amber cane corn are among the best adapted plants for "dry farming."

The work of the sub-station at Connell has been carried along four lines: First, there has been an effort to determine the best method of handling summer fallow, including a study of the effect of certain tools; second, there has been a study of the adaptability and methods of seeding of well-known dry land grasses, and legumes.

Although the past season has been an exceptionally dry one, and the results could not be expected to show forage crops in as favorable a light as the average season would, yet several plants showed up very promising. Among these were Jerusalem corn, milo maize, Kaffir corn, artichokes and amber cane corn. Another promising one was a small, early maturing variety of dent corn.

Other plants tried were cow peas, soy beans, chick pea, common millet, Japanese millet, Hungarian millet, golden millet, common field peas, kale, rape, popcorn and flint corn. On September 10 the milo maize showed itself to be the best drought resister. This plant grows very similar to corn, except that it scatters a great deal more, and is more leafy.

Jerusalem corn and Kaffir corn are both very similar in appearance to common corn, being about midway between common corn and milo maize a bushiness. Their seed, however, is corn in a large and fairly compact seed, or bunch on the end of the stalk. They yield quite heavily in most places, and judging from this year's experience, would mature a fair quantity of seed. Connell, which makes very useful feed for poultry and swine.

The difference in the showing of Jerusalem and Kaffir corn and milo maize was quite noticeable. While the leaves of the two former plants did not dry up the inner plants of the plots were about one-third smaller in size than the plants on the outer edge. This showed that their growth had been materially checked by the shortage of moisture. The trial leaves under the impression that Jerusalem and Kaffir corn are but poorly adapted to central Washington conditions. Dent corn made almost a perfect stand, but the growth was scanty, and only a small quantity of nubbins matured.

The present season's growth could not be considered a proved crop, but corn of the same strain grown on land adjoining the experiment station last year was a fair crop and may be taken as a fairly good demonstration of what could be done with dent corn on any good, dry land farm. The seed, however, would have to be adapted to the locality.

The flint corn and the popcorn made a good stand, and matured well, but their growth was so small that they could not be given consideration in comparison with dent corn. The artichokes made an excellent stand and showed remarkable ability to continue their growth throughout the entire dry season.

Whether it would pay to utilize rain land for the growth of these crops is an open question. The other plants that were used made so light a growth this season that further trial will be necessary before they can be considered as even promising.

Of the non-cultivated forage plants, the most promising was the alfalfa. This made a fairly good stand and continued to grow slowly throughout the entire season. On September 10 it stood about eighteen inches or two feet high. As the first season is needed to establish alfalfa, this is considered an excellent showing. The alfalfa was seeded with a grain drill, which allowed the seed to be conducted down into the shoes of the drill, so that it was deposited in moist soil. It is questionable whether a good stand could be secured by broadcast seeding and harrowing in.

Hairy vetch made a poor stand, but a promising growth. The tenacity with which they cling to the soil when once established makes it rather questionable whether it would pay to seed good grain land to vetch, unless permanent pasture is desired.

Of the grasses, the most promising was the slender wheat grass; smooth brome grass. Neither of these grasses, however, showed up as well as the alfalfa. Another season's growth is needed to determine anything definite regarding their production. Other grasses tried were meadow fescue, orchard grass, tall oat grass. None of these grasses made a show worthy of mention. Since the past season has been exceptionally dry, they will be given another trial.

The only suggestions the station has to make to farmers regarding these forage crops are that alfalfa, brome grass, acclimated dent corn, milo maize, Jerusalem corn and Kaffir corn are worthy of trial in a small way. The farmer had better learn how to handle them, however, before trying them on a large scale.

Waist-Line Woe.
When you would put your dexter in Around a girl, it is a sin,
A crying shame,
To get, I claim,
All lacerated by a pin.
