

BIG LIVE STOCK SHOW AT FAIR

Will Be Greatest Exhibit Ever Seen in the West

ENTRIES HAVE BEEN PROMISED

Seattle, Wash., April 18—Enough entries have been promised to insure the complete success of the Live Stock Show of the Alaska-Yukon Pacific Exposition, and the affair will be the most important gathering of prize animals ever held in the West. The event will be held on the exposition grounds from September 27th to October 9th inclusive.

A widespread interest has been created among breeders and dealers throughout the entire United States and Canada, and several foreign associations are negotiating with the intention of sending a number of prize winners across the ocean.

The Canadian Government has appropriated the sum of \$1,500 for transportation expenses, and this will be utilized by the Cattle Breeders Association of Manitoba in sending several carloads of stock to Seattle. The value of live stock exhibits on the Pacific Coast has been thoroughly demonstrated by the success following the live stock show in Portland in 1905, and since that time, the western sales of two stock associations in the east have totalled over \$1,000,000.

The West and Northwest are today considered as the most promising fields for high class stock development, and this fact has been generally recognized by breeders. The exposition appropriation of prize money and premiums is liberal, and this has been increased by offerings of individual breeders and dealers to the extent of \$10,000.

The official catalogue of the Live Stock Show will be ready for distribution early in May, and this will include all necessary information regarding entries, classification and awards. Construction work on sheds, stalls, paddocks and yards will be completed long before the opening exhibit. These will be open to exhibitors ten days before the show opens.

In the special features introduced into the Live Stock Show, none but new departures will be followed. It is the intention of the management to make this department as valuable as can be done, and in doing this, expense and work have been a secondary consideration.

Appointment Confirmed

Mrs. Walker, whom, it was announced in last week's RECORDER had been recommended by President Taft for appointment as post mistress, to fill the vacancy caused by the death of her husband, Robt. Walker, received a telegram Monday from Congressman Hawley, that her appointment had been confirmed by the senate. This will be good news to patrons of the Bandon post office as Mrs. Walker's service in the capacity of post mistress has been very satisfactory.

Notice to Trespassers

Notice is hereby given that all persons found trespassing on the premises known as Queen Ann Cottage will be prosecuted to the full extent of the law.

Rasmussen Bros.

WATER SYSTEM BEING EXTENDED

Improvements Being Made and System Greatly Enlarged

The Bandon Light & Water Co. is extending its system at a rapid rate and will improve the service materially in many ways. Small pipes are being taken up in many parts of the city and larger mains being put in. This will materially increase the supply of water in these parts of town and will add greatly to the pressure of the entire system.

New mains have also been laid up Pacific Ave to Sixth Street and mains will also be laid west on Sixth street. It is the intention of the company to enlarge and improve the system just as rapidly as business will warrant and they are determined to give the people the best service possible. The pure spring water of the Oregon streams cannot be duplicated anywhere else in the United States.

Coos Bay Misrepresented

An article appearing in the daily papers last week told of 300,000 cans of milk being confiscated, said to have been manufactured on Coos Bay, in the city of Seattle.

The dispatch before being published in the Oregon Journal was corrected by an interview with A. B. Stewart, manager of the local condensary, but other Portland papers published the story as it was given out from the city of Seattle, for no other reason apparently, than to discredit an Oregon firm.

There was considerable comment in this city when the article appeared and the cause was hard to understand, for the amount precluded any possibility of it being from the Coos Bay condensary.

The arrival of Mr. J. H. Keating and an interview with him partly clears away the logs of the report to the daily papers.

Last year the company manufactured some milk that was below grade and Mr. Keating has been selling it unlabeled, not making any representations other than the truth in the matter. Among the samples of milk sent out were twelve cans to Seattle, sample cans to their representative there who was to try and dispose of some of it. One man to whom the milk was shown telegraphed an order for 1,000 cases, which was double the amount the company had in stock. Mr. Keating feared that the man had not understood the entire details of the transaction wrote him telling in detail what the milk was and what the terms of the sale were, also advising him to submit the milk to the analysis of a chemist.

This was the last that was heard of the milk until the story appeared in the daily papers under a Seattle date that 300,000 cans had been confiscated. If the milk is the same that was sent from here there are but 12 sample cans in the city of Seattle. It is likely some of the larger coast companies have grasped an opportunity to take a crack at Sunrise, the milk of the local condensary, which is fast supplanting some of the older brands in the market.

Marine Danger

Pinnacle Rock, an obstruction to navigation, 14 feet under sea surface has been discovered S. 19 deg. W. (true) from Point Fosco, Santa Margarita Island, Lower California. John McNulty, Nautical Expert.

WILL PUBLISH MANY PAMPHLETS

Coos County Chamber of Commerce Orders 75,000 Copies

WILL DISTRIBUTE AT SEATTLE FAIR

The Coos County Chamber of Commerce at a meeting in Coquille last Thursday authorized the publication of 75,000 pamphlets to accompany the exhibits at the Alaska-Yukon-Pacific Exhibition in Seattle this summer. The pamphlet will contain fifty pages of reading matter descriptive of the many resources of the county besides many cuts illustrating the beautiful scenery and great industries in the county. This will be the biggest attempt in the way of advertising that has ever been made in the county and it is believed that it will result in much permanent good, as results are still noticeable from the advertising of the county at the Lewis and Clark exposition in Portland.

There will be thousands of people at the fair who will come west with the view of locating somewhere west of the Rocky mountains, and it will be up to each community to show in the very best light possible the resources and possibilities for settlers.

This will be done in the Coos county pamphlet.

Orvil Dodge has been selected to edit the pamphlet and he is now busily engaged in collecting data for the same. The plan is to have the book ready for distribution at the opening of the fair, which will be the 1st and it will take some talk hustling to accomplish the work. Mr. Dodge will greatly appreciate any assistance that can be rendered him by business men and citizens of the county.

Power of Advertising

John Silber of Newkirk, Okla., was sent to jail charged with tampering with a switch. While there he read in a newspaper of an offer of \$3 for the most original want ad. Silber inserted the following:

Wanted—Young man in jail wants out; suggestions solicited that might result in immediate release; wants poet's address who wrote "Stone walls do not a prison make nor iron bars a cage." Address John L. Silber, Kay county jail.

He got the \$3, a lot of sympathy candy, flowers and pie and so much attention in his case that it resulted in an investigation proving his innocence, and he was released from jail.

Moral—Advertise, and do not wait until you're put in jail.—Judicious Advertising.

Gets \$1,500

Mrs. Robert Moran, who brought suit against the county for \$2,000 damages, for the loss of her husband who fell overboard from the bridge by Oriental Hall last fall was given a verdict for \$1,500 by a jury at Coquille Tuesday night. It will be remembered by readers of the RECORDER that Moran fell off the bridge at a place where the railing had been removed, one Sunday night and was not found until Monday afternoon.

Subscribe for THE RECORDER.

RIVER BOATS IN GOOD CONDITION

Coquille River Transportation Company Keeping Abreast With Times

That the Coquille River Transportation Co. is determined to keep abreast with the times and have their boats in constant repair is evident from the fact that they are sparing no means that will keep their boats up to the standard. The Favorite and Dispatch have both been on dry dock recently and have been thoroughly overhauled and put in first class condition, and though there are some bad shoals in the river between Bandon and Coquille, yet the boats are making good time and giving satisfactory service. The Favorite had the misfortune to strike a log in the river only a few days after she came off the dry dock, doing considerable damage, but she has again been repaired and business is moving on at a rapid rate.

The Transportation Company is very enthusiastic over the Port of Coquille River proposition and will render all assistance in their power to help the project along.

Receives Fellowship

The Oregonian of April 16 says that Andrew W. Jackson, of the University of Oregon, has just been notified of his appointment to a Whiting fellowship in physics at Harvard for the coming college year. This fellowship is one of three established by the late Professor Whiting of Harvard in recognition of excellent scholarship and of exceptional ability in physics.

Mr. Jackson was graduated from the University of Oregon in 1909. Since then he has been an assistant and a graduate student in the department of physics. He has recently completed some important research work in the cells used for standards of electromotive force and in voltmeters and ammeters.

Jackson has worked his way through both high school and University and is a popular student.

Andrew W. Jackson is the eldest son of Mrs. J. A. Cope of South Fourmile and is well known in this vicinity, where his hosts of friends wish him every success.

A. FRIEND.

Four Mile Notes

La Grippe is all the go on Four-mile.

Numerous fishermen find their way up the creek these fine spring days.

New Lake school started last week with Miss Rose Lillie as teacher.

Brandt Taylor has been putting in his crop on his homestead at the mouth of Fourmile.

The roads are drying up fast now. The road supervisors are all busy getting them in shape for summer. A. Davis will start to work on the new bridge on South Twomile sometime this week.

Ice Plant Machinery Here

The machinery for the ice plant to be erected and run in connection with the Bandon Brewery and Bottling works, has arrived and will be installed at once and the ice plant will be running in a short time. This will be a source of great convenience to Bandonians as heretofore it has been a hard matter to get ice just when it was wanted.

FAT ELK DRAINAGE CONTRACT LET

United States Dredging Company of San Francisco Gets It

TO DRAIN TWENTY-TWO HUNDRED ACRES

At a meeting of the Fat Elk Drainage Association in Coquille last week the contract for draining the Fat Elk district was let to the United States Dredging Company, of San Francisco, theirs being the only bid which covered the entire work. J. W. Mast of this city is secretary of the association and was in attendance at the meeting.

The drainage system as it is planned will compose nine miles of ditches and will drain about 2,200 acres of land, which will be as fine as can be found in America. The amount of earth to be removed will be about 186,000 yards. Work will be commenced about May 15th and the entire system will probably be completed by the time the next rainy season sets in.

The Fat Elk country is tributary to Coquille rather than Bandon but it is in the Coquille valley and all helps in the aggregate of building up business in this section.

Chamberlain Will Assist

Mayor Steve Gallier wrote a letter recently to Senator Chamberlain asking that gentleman to assist in getting the Dredge Oregon over to the Coquille River to dredge out some of the shoals, and Mr. Chamberlain has promised to do what he could in this as well as other improvements for the Coquille river, although he said there would probably nothing come up at this special session in regard to river and harbor improvements, but that he is laying the foundation for a large amount of work at the next session and hopes to attain some favorable results.

Captain's Body Found

The following taken from a San Francisco paper will be of interest to Bandon people as Captain Ivergard was well known here. It says:

The body of Steam Schooner San Buena Ventura, which is moored in the Oakland estuary was found floating in the bay yesterday morning and the manner of his death whether of accident or suicide is a mystery.

The body was found by Henry Gordon, a boatman of 675 Alice street, while on his way to work. It was floating face downward. Gordon fastened a rope to it pulled it ashore and notified the Coroner's office.

Nothing has so far been discovered which would give a clue to the manner of death. No disappearance had been reported and it was believed by the members of his crew that he was enjoying himself ashore. An investigation is being pursued upon the theory that Ivergard had started for his ship and upon reaching the dock where he was to take a small boat into the stream had missed his footing and fell into the estuary.

Captain Ivergard was about forty years of age and a native of Norway. He had no relatives in this country so far as known. No arrangements for the funeral have been made.

VENEER PLANT AT FULL CAPACITY

Big Lay and Nine Stitchers Turn Out The Finished Product

F. S. Perry is increasing the capacity of his veneer plant at a rapid rate. He recently added two more stitching machines to turn out the finished product, making nine in all, and these machines turn out an average of over thirty thousand berry boxes daily. The big lay is kept busy cutting the veneer all the time and with the click of the nine stitching machines, there is something doing in the busy plant all the time. Mr. Perry is now employing about twenty-five people and his pay roll amounts to several hundred dollars a week.

Few people, when the veneer plant started last fall, realized what it really meant for Bandon and all are agreeably surprised to see that it is fast developing into a big industry for the city. In conversation with Mr. Perry he stated to the RECORDER that there would be no trouble in disposing of his entire output, but that he feared he might have some difficulty in getting spruce logs sufficient to supply his needs.

Now is the time for people who have spruce timber to get busy and furnish Mr. Perry with the full amount that he needs.

Death of Mrs. Perkins

Where sixty days ago lay the lifeless body of her darling baby icy cold in death, today lies the remains of a broken hearted mother, cold and silent.

Flora E. Shultz was born January 2, 1867 in Mt. Pleasant, Maryland, and was married to Dr. S. L. Perkins at Mt. Pleasant January 1, 1889. She died at her home in Bandon at 7:30 p. m. April 28, 1909, age 42 years, 3 months and 26 days.

Mrs. Perkins was a kind and loving mother, a good neighbor and a lady of noble christian character, her loss in the home will be much greater than one can conceive, and the sorrowing family will have the sincere sympathy of the entire community.

Mrs. Perkins leaves to mourn her loss, a husband, four children a grandmother, mother, one sister and three brothers, all living in Maryland except one brother at Welch, W. Va. and one brother whose whereabouts is unknown.

The funeral services will be conducted at the residence Friday April 30 at 2:00 p. m.

Farewell for Rev. Father Donnelly

Arrangements are being made today to tender a farewell reception at the home of Mr. and Mrs. A. H. Powers in South Marshfield Thursday evening from 7:30 to 10 o'clock to the Rev. Father E. Donnelly who retires this week as pastor of St. Monica's Catholic church. Rev. Father E. Donnelly will leave Saturday for Portland to consult Archbishop Christie regarding his new work and it was determined today to hold the farewell reception prior to his departure, the event being under the auspices of the Ladies of the Catholic Church.

The reception will be public and will be non-sectarian, everyone being invited to attend and by their presence show their appreciation of what the venerable priest has done towards the upbuilding of Marshfield and Coos Bay.—Times.
