Short Breath.

Respiration in health and under normal conditions of rest or moderate exercise is an unconscious act, almost as much so as digestion or the beating of the heart, but it is very easily disturbed, even in health, and in certain diseases its disturbance is often one of the most distressing symptoms. The short breath following violent exertion, such as running or hill-climbing, is familiar to every one. It is due to the increased call for oxygenation of the blood and the temporary inability of the heart to pump the blood in sufficient volume through the

lungs. When shortness of breath is brought about by moderate exercise or mental excitement, it is due to some abnormal condition, such as anemia, obesity, a weak heart or indigestion. Permanent shortness of breath, or dyspnœa, as it is technically called, is a more serious affair, and is usually due to some actual disease. What the disease is of which this dyspnea is a symptom can often be discovered only by a careful and thorough medical examination of all the organs of

Anemia, or poverty of blood, may with the state of more or less of the lung tissue in tuberculosis or pneumonia, or through compression of the lungs by an accumulation of fluid or air in the chest. Anything that interferes with the

free action of the heart, such as weakness of the cardiac muscle or disease of the valves of the heart, pressure by fatty deposits, an enlarged liver, or as in the stomach, will produce shortness of breath.

Short breath in children is commonly the result of obstruction in the air passages, caused by enlarged tonsils, the presence of glandular tissue in the pharynx, called adenoids, or a swollen condition of the mucous membrane of the larynx.

Persistent shortness of breath is a symptom that should not be neglected.

Buddha.

The origin of Buddhism, which ranks in numbers among the great religions of the world, is wrapped in much uncertainty, and the personality of its founder is more or less obscure. It is generally believed that Buddha was a prince of a petty Indian nation and that he was born about the beginning of the fifth century before Christ. He was named Siddhartha and was also known as Sakya, his family name. The title of Buddha, which was given him, means "the enlightened." He spent many years in study and solitary meditation and finally evolved the philosophy which he preached for over forty years in northern India. A Literal Distinction.

Bishop Potter was known as quite a wit, and often took delight in turning his humor loose on his associates. but here is an instance where the joke, although quite unintentional, was on the bishop. He was to preach at a certain parish in the West in the evening, and the congregation was not a little amused at the somewhat ambiguous announcement of their worthy pas-

tor, who said: "Remember our special service next Sunday afternoon. The Lord will be with us during the morning services, and Bishop Potter in the evening .-Success Magazine.
