

School Report

Report of the Bandon Public Schools for the eighth school month Friday, May 13th.

Grade 1, Mrs. Kopf, teacher—enrollment for year, 56; for month, 46; daily attendance, 41; per cent of attendance, 95; times late, 0; roll of honor, 19.

Grade 2, Miss Marsh, teacher—enrollment for year, 49; for month, 44; daily attendance, 39; per cent of attendance, 94; times late, 2; roll of honor, 16.

Grade 3, Miss Radley, teacher—enrollment for year, 48; for month, 41; daily attendance, 35; per cent of attendance, 93; times late, 2; roll of honor, 10.

Grade 4, Miss Lusk, teacher—enrollment for year, 40; for month, 34; daily attendance, 30; per cent of attendance, 95; times late, 0; roll of honor, 10.

Grades 1, 2 and 5, Miss Latimer, teacher—enrollment for year, 40; for month, 31; daily attendance, 24; per cent of attendance, 90; times late, 1; roll of honor, 8.

Grade 5, Miss Rosa, teacher—enrollment for year, 41; for month, 36; daily attendance, 33; per cent of attendance, 95; times late, 0; roll of honor, 21.

Grade 6, Miss Murphy, teacher—enrollment for year, 41; for month, 27; daily attendance, 26; per cent of attendance, 97; times late, 0; roll of honor, 14.

Grade 7, Miss Walker, teacher—enrollment for year, 39; for month, 27; daily attendance, 25; per cent of attendance, 93; times late, 0; roll of honor, 11.

Grade 8, Miss Gearhart, teacher—enrollment for year, 36; for month, 30; daily attendance, 26; per cent of attendance, 92; times late, 0; roll of honor, 11.

High School, H. C. Ostien, prin., Mrs. Ostien and Miss Rodgers, assistants—enrollment for year, 48; for month, 39; daily attendance, 35; per cent of attendance, 91; times late, 2; roll of honor, 2.

SUMMARY

Total enrollment for year, 438; for month, 355; daily attendance, 314; per cent of attendance, 93; times late, 7; roll of honor, 122.

Roll of honor includes pupils neither absent nor late during the month. The following students of the High School have made a standing of A for the month in the subjects named. A=95 to 100 per cent.

- Lester Jenkins, General Hist.
 - Archie Rosa, Gen. Hist.
 - Mildred Morse, Gen. Hist.
 - Grace Wood, Book-keeping, Algebra, English, Gen. Hist.
 - Ralph Bullard, Gen. Hist., Book-keeping.
 - Wynona Patterson, Gen. Hist., English
 - Geo. Strang, English, Gen. Hist.
 - Lura Morgan, Gen. Hist.
 - Ella Felter, Gen. Hist.
 - Harry Craine, English.
 - Ernest Wilkins, Algebra, Botany, English.
 - Daisy Hansen, Botany, English.
 - Zettie Gibson, Botany.
 - Tom Ostien, Algebra, English, Botany.
 - Elsie Kinley, Algebra, Botany.
 - Amelia Chaney, Botany, English.
 - Thos. Laird, Algebra.
 - Lentner Gallier, English.
 - Carl Bowman, English.
 - Liela Buckingham, Botany, Gen. Hist., English.
 - Ray Watkins, English, Gen. Hist.
 - Ernest Watkins, English, Gen. Hist.
 - Nora Gibson, English.
 - Erma Craine, English, German, Geometry.
 - Hazel Stephenson, English, German.
 - Lena Langlois, English, German, Geometry.
 - Rittie McNair, English, German
 - Earl Watkins, English.
 - Ebba Wiren, English.
 - Sylvia Rackleff, English, German, Geometry.
 - Jessie Wood, English, Caesar, English Hist., Physics.
- Respectfully submitted,
H. C. OSTIEN, Supt.

Big Project for Oregon.

Portland, Ore., May 19.—With the arrival in Portland of John E. Borchard, of St. Paul, definite information became public as to the building of the Boise & Western Railroad, as the east and west branch of the Hill system in tappi g Central Oregon.

Entering the state at Ontario, the Boise & Western will build in a northwesterly direction through Malheur canyon to a point directly east of Malheur Lake. From that point two surveys have been made for a continuation of the line.

One of the projected lines passes to the north of Malheur Lake and the other between Malheur Lake and Harney Lake. The objective point of the road will be attained through the use of either line.

Bend will in all probability be the junction point for the new line with the Oregon Trunk Line, the railway owned by the Hills, and which is rapidly creeping toward the heart of Oregon by way of the Deschutes river.

Which ever route may be finally selected will depend upon the visit now being made to that section of the state by the party of which Louis W. Hill is a member. It is believed that the northern route, following the survey and grade of the Willamette Valley and Cascade Mountain Wagon Road, will be the first constructed. It will open a larger territory which is soon to be populated and which will be shipping to the markets of the world before the Hill lines reach the south boundary of the state.

The southern survey will be retained for the Hill road to California, which will be built in the near future.

Following close on the announcement as to the railroad routes, came that concerning the final closing of the largest real estate transaction from an acreage viewpoint, ever consummated in the history of the United States.

Transfers of the 800,000 acre grant from the owners of the Willamette Valley & Cascade Mountain Wagon Road company to the new purchasers, the Oregon & Western Colonization company, were yesterday completed in New York City, and Mr. Burchard, vice-president of the new company, is here to start development and settlement and use by the French owners, it is proposed to dispose of the lands rapidly in any quantity above 40 acres. Lands are to be sold to actual settlers at from \$15 to \$200 an acre, and upon contracts which will allow all the time necessary for development and payment for the lands.

This stupendous work, which is destined to bring into Central Oregon at least 20,000 families, with more than 100,000 population, is to be pressed as fast as money will drive operations.

Back of the colonization scheme is the \$12,000,000 syndicate of St. Paul capitalists who have for years operated hand in glove with the Great Northern railway, and which in the present project has assurance amounting to moral certainty that the Hill railway interests will build an east-west line across central Oregon.

The lands which are now to be opened up were secured under a grant from Congress, the consideration being the construction of a wagon road along the foot of the western slope of the Cascade mountains. It begins about 12 miles from Albany and ends at Ontario. In the more than 400 miles of the princely gift are 660,000 acres of agricultural and timber lands, most of which is

subject to irrigation, and for which water is available, and 140,000 acres of timbered hills. Estimates of the timber place the total at 4,500,000,000 feet. Thirty thousand acres of the timber land in the Willamette Valley will be subject to fruit raising as soon as the timber is removed.

The Family Card Table.

Evangelist Herbert C. Hart makes a statement, which facts will not bear out, when he says that 92 per cent of the gamblers of the world get their first lesson in gambling at the family card table. It is a fact well known that many young people, boys and girls, who are forbidden to play cards at home, learn to play elsewhere under conditions that conduce to gambling. The game at the family card table is seldom, almost never, played for a stake. In this it differs from society bridge and "500" and the rest of the fashionable card-party games. Card playing being forbidden in the family, the boys, nearing young manhood, are more than likely to find a place to play a game where there is a stake to win or lose.

In this connection there is recalled a good woman, long "sacred to memory," but for many years a resident of this city. A woman of strong character she was, the mother of four sons, a devout church-woman of religious belief that would have delighted the soul of the evangelist who preaches the "eternal punishment" dogma. She resolutely placed a ban upon card playing in her family. Lessons learned, the last Sunday school book finished, weary of teasing the cat and the little sister, the boys, having exhausted all allowable means of entertainment at home on long Winter evenings, went to bed to get rid of themselves and each other. As they grew older and bolder these pastimes palled and they began to creep from their bedroom windows at their early bedtime to join boys of the neighborhood whom their mother would not permit to come to her house, in a game of cards at one of their homes.

This mother did her duty as she saw it, as Evangelist Hart would have encouraged her to do it; but it failed signally in its purpose, since three of the sons who thus took their first lesson in deceit, disobedience, and in the pleasures of forbidden fruit, became frequenters of gambling resorts and in due time professional gamblers, in which most abominable vocation all lived out their brief span and died.

A neighbor, also a good woman, the mother of five sons, permitted the boys to play pedro, casino and other simple and then popular games at home, with companions of their own age, or between themselves and their one sister, as chanced, and not one of them followed cards into business or social life, and all are now men filling positions of honor and trust in the world.

These are not unusual cases, since with variations in family details they are familiar to almost any one who has taken the pains to look about him closely. It is merely a variation of the old story of the fall of man, the text of which is: "But of the tree of knowledge of good and evil thou shalt not eat," an unwise interdiction which, according to Milton—Brought death into the world and all our woe, Oregonian.

F. J. HAYS OPTOMETERIST will be at Dr. Perkin's office on the 22nd and 23rd of each month. Eyes tested free and glasses fitted. Don't forget the date. etf

Good Rations For the Cows

According to an authority on feeding, buying grain for cows is a matter that makes considerable nerve at the present price on the market. It is a question, too, that takes a lot of thought and study. Many farmers are asking their neighbors what they feed and how much. Many are putting more thought and study into just such questions as feed and feeding, whereas twenty years ago almost any way and any kind of feed would do.

The great question of today with the dairyman is what to feed and how much. It is a question that needs the closest attention. But how shall the man care for his cows under the farm conditions and conveniences that are at the command of the ordinary farmer? When the cow is on full feed of grass little thought need be taken of her, but this is comparatively a small part of the year, and, in fact, some practice feeding something the entire year.

A small amount of grain fed even on the flush of feed will repay the owner. In fact, some farmers practice feeding ensilage also when on grass. When it comes a little later in the season the weather gets hot and the flies are troublesome. It is absolutely necessary to feed something in connection with pasturage to maintain anything like a full flow of milk.

The ration for a cow should be governed, of course, according to the ability of the cow, to assimilate her food and convert it into milk. It is impossible to lay down any rules to go by, but feed the cows all they will take and make proper use of. Some contend that eight pounds of grain per day is enough for an average cow, but it is not. A good rational way to feed a cow is to commence when she freshens with five or six pounds a day, begin to increase the feed and gradually do so as long as you can increase the flow of milk and are sure that she is properly digesting her food.

It always pays to feed the cow all that she can convert into milk without waste, provided one has a grain ration that balances up on a ratio of 1 to 5.5 or thereabouts. Take farm grown grains and buy enough wheat bran, oilmeal, cottonseed meal or some of the protein feeds to balance up the ration. What is a balanced ration? It is the proper amount of feed

CHAMPION DAIRY COW

to sustain the animal for twenty-four hours and furnish the nutrients for her to do her work on. But the average farmer is not going to weigh each cow's milk each day and then weigh each cow's ration and make them exactly correspond. It makes some difference as to the individual animals (the breeds enter into this to a certain extent), the condition under which the cattle are kept, etc. To give the dairy cow a working ration, then, one must select such feeds as will contain the necessary amount of protein.

Of the grains raised oats are the most valuable, barley next and corn last so far as the protein content is concerned; of the fodders alfalfa hay, clover, oat hay, oats cut when in the milk and cured into hay, redtop, millet, timothy, fodder corn, cornstalks and silage. It is impossible to compound a ration of home grown crops with a sufficient amount of protein. And to get the best results it is economy to buy some concentrated feed even at what may seem to be a high price.

When it comes to roughage, clover hay is of itself a balanced ration, according to the best authorities, but it is impossible to get best results from the cow or even paying results when fed on roughage alone. Silage is very low in protein and yet is a very valuable food. In fact, silage has not as much protein, ton for ton, as oat straw. It is valuable because of its succulence and as an aid to digestion. The silage aids in the digestion of everything the cow eats. Ensilage and grain should be fed the first thing in the morning; then the milking and separating should be done, then at noon feed ten to fifteen pounds of clover and alfalfa hay. The same method is followed in the evening with ensilage and grain. The ration for strictly fresh cows should be one and one-half pounds of oilmeal, one and one-half pounds of cottonseed meal, three pounds of cornmeal and four pounds of first quality bran.

Helpful Pig Tips.

By proper feeding the feeder can do much toward making a litter of pigs strong at birth, provided the breeding is right.

The airships are flying high, but they cannot overtake pork. The humble pig has become the most important animal on the farm.

Scatter whole oats on the ground or platform every day for the brood sow to gather up. This will give her occupation and exercise, which are very necessary.

Lodge and Professional Directory

Lodges are Requested to Notify this Office on Election of Officers and on Change of Meeting Night. Cards under this Head are 50c per in., month

Lewah Tribe No. 48, Imp. O. R. M. MEETS every Thursday evening at 8 run at the Bandon Wigman. Sponsoring chiefs in good standing are cordially invited to attend. G. E. Wilson, C. S. Hubbard, C. of R. Schem.

Masonic. BANDON LODGE, No. 130 A. F. & A. M. Stated communications first Saturday after the full moon of each month. All Master Masons cordially invited. J. A. Morrison, W. M. G. T. Treadgold, Secretary

I. O. O. F. BANDON LODGE, No. 133, I. O. O. F. meets every Wednesday evening. Visiting brothers in good standing cordially invited. L. J. Radley, N. G. A. Knopp, Secretary

Rebekah Lodge No. 126. MEETS in I. O. O. F. hall every second and fourth Tuesdays. Practice nights 1st Tuesday of the month; Social evening the 3d Tuesday of the month. A cordial invitation extended to all members in good standing. Clara Goetz, N. G. Belle A. Kolp, Secretary.

Knights of Pythias DELPHI LODGE, No. 64, Knights of Pythias. Meets every Monday evening at 8 o'clock. Visiting knights invited to attend. Wm. N. McKay, G. C. B. N. Harrington K. of R. S.

Woodmen of the World Seaside Camp No. 212 meets every first and third Thursdays of each month. Visiting neighbors cordially invited. R. W. Bullard, C. C. J. N. Hosking, Clerk.
