In This Region Are Wanted By The Government

At the request of the Chamber of Commerce and other public organizations of Western Oregon, the gov ernment has ordered an examination of the oil prospects of the coast range of Oregon. This is the same belt of mountains that contains the great oil fields of California, which in the last ten years have enriched that state over \$100,000,000, without materially affecting the total supply of oil in the ground. The Coalinga fields alone produced oil valued at \$9,000,000 in 1909. Yet at the same C. M. Hadley is now spending

While such things in Oregon must still be considered only wild dreams, since almost nothing is known of the local prospects; nevertheless many people believe that the coast range of Oregon has as good indications of oil as the same range in California, and we certainly hope that the geological survey can find evidence on which to base a favorable report, and thereby encourage development of this possible addition

OIL DEPOSITS Will Keep Mill Running At Full Blast For A Year

CLOSED FOR FEW DAYS FOR REPAIRS

Manager Bedillion of the Bandon Woolen Mills has just closed up another big contract with the same Detroit firm for which he has been manufacturing goods in the past. The new contract is sufficiently large to keep the mill running at full blast

The mill is being temporarily closed down this week, and will probably remain closed until after the Fourth, so that a few repairs can be made before work begins on the new contract.

The output of the Bandon Mills is thoroughly up-to date, and the demand for it is increasing all the time. The Bandon Woolen Mill is one of the stand-by industries of Bandon and is greatly appreciated by the home people, and all will be greatly pleased to learn of its continued prosperity.
