

## The New Mill

One of the best mills and most modern on the Pacific coast is the new mill of the Geo. W. Moore Lumber Co. in Bandon, and as to modern equipment and convenience of arrangement and the machinery it is all first class. It is a single band and band resaw mill with planer and all that goes to make such a mill complete.

The mill is equipped with a 10 foot Allis-Chalmers band, 16 inch saws, three block carriers with trailers and Trout power set works and 14x18 engine to drive the carriage. There is a No. 5 Simmons log turner, 10x72 edger, 40 foot slasher, 40 inch saw and 21 saw air lift trimmer.

The main engine is a twin engine 22x22 made by the Ames Iron Works.

The log slip is a special design and is one of the most complete that has yet been installed on the coast. The shafting in the lower part of the mill is so arranged that workmen can pass through the mill without danger to themselves, the shaftings being all carried 5 feet 3 inches from the floor. With the machinery thus up and out of the way, there is very little danger to the employes.

The arrangement of the resaw and sorting table is something new. This has always been a matter of deep study on the coast, and much thought was given to perfecting a plan for handling the lumber cheaply and with an economy of labor. They succeeded in working out a device which is different from anything else on the coast. The equipment takes the lumber direct from the trimmer to the resaw and then to the sorting table, and direct from the trimmer to the sorting table. In other words, the lumber which is to go to the sorting table is carried direct from the trimmer and does not go to the sorting table until it is finished. This arrangement is a great economy of labor and time, and three men can operate the entire work of the resaw, handling an average of better than 30,000 feet a day by resaw.

The new mill has a first class steam plant and but few mills on the coast are equipped in just the same way. There are six high pressure boilers carrying 125 pounds of steam and are set in concrete. The building is so constructed that it is fire proof all the way through. There is also arranged a standard fire protection system to use salt water, and a sprinkling system to use fresh water. The water tank for the standard system holds 50,000 gallons of water.

The new mill was started on May 17th and began at once the manufacture of lumber with very much less trouble than is usual with a new plant. It is cutting now about 80,000 feet of lumber a day but the capacity will soon be increased to 125,000 feet a day.

## Kronenberg

On Sunday afternoon, the 10th inst., John Kronenberg, a well-known citizen of the Coquille valley passed to the great beyond.

The deceased was born in Hannover, Germany, Jan. 23, 1826. At the age of 13 he came with his parents to America, locating at Baltimore, Maryland. Later he spent several years in New York city. During the California gold excitement in 1849 he came to that state, doubling the Cape in a sailing vessel. He spent some time in San Francisco, after which he went to the mines to seek his fortune, and was by no means wholly unsuccessful. His principal mining operations were in Eldorado county, and a goodly sum of the yellow metal was secured by him.

In 1857 he was married to Catherine Beclar, of Baltimore, who survives him. Their children are: Mrs. Emma F. Blakeley, of Lodi, Calif.; J. L. Kronenberg, of Parkersburg, F. W. Kronenberg, Denver, Colo.; Rachel Marsh, of Port Orford, and Ida K. Owen, of St. Louis, Missouri.

Mr. and Mrs. Kronenberg moved

to the Coquille valley in September, 1859, and settled on what became one of the finest farms in the county in later years through his labor and good management. In 1888 he concluded to come to town, which he did, selling the farm, and embarked in the hardware business, but finding that did not suit him, later retired to private life in the neat home where he lived to the last.—Coquille Herald.

## Alive Under an Avalanche.

Human beings occasionally live through incredibly long imprisonments after their dwellings have been overwhelmed by avalanches. On March 19, 1753, avalanches buried the village of Bergemolletto, in the Italian Alps, and on April 25 three women were dug out alive from a stable in which they had been immured for thirty-seven days in the dark beneath the mass of snow which lay forty-two feet higher than the roof. With them had been buried a little boy, six goats, a donkey and some hens.

The child, the donkey and the fowls soon died, but the goats helped the women to survive, their milk supplementing the thirty or forty cakes and the pocketful of chestnuts upon which they depended for food. Hope of finding the women alive had been abandoned when far in April the brother of one had a dream in which she appeared to him for rescue.

The weather then at last made excavation possible, and the women were restored to the world and presently to health.—Chicago News.

## Dew as Drinking Water.

The English administration at Gibraltar, where water is very scarce, collects dew by the following very simple method: A large pit is dug in the earth and covered with dry wood or straw, which in turn is covered either with earth or with sheet iron. The straw or wood serves as a heat insulator and effectually prevents the conduction of heat from the ground to the layer of earth or the sheet iron above. Consequently this earth or iron cools after sunset much more rapidly than the ground, so that its temperature soon falls below the dew point of the surrounding air; hence dew is formed upon the iron or the layer of earth in very large quantities. The water thus obtained is drained off into reservoirs and after clarification is used for drinking.—Scientific American.

## Sheep as Land Cleaners.

In discussing the value of sheep on a country place their service as land cleaners should not be ignored. They like pasture grasses, but they seem to like weeds and bushes even better for browse. They will often clean up an old field in a year or two, so that what was a tangle or unsightly weeds and shrubs will appear a smooth shaven lawn. Angoras are simply wonders at this sort of thing, but the common, everyday sheep of the ordinary breed will do mighty good work if you confine her to her job and put in enough of her. Five years ago one small pasture of mine was a veritable chaparral of thorn bushes and soldago. I set the ewes in it, and today it's as pretty a bit of sward as there is on the ranch—bushless and weedless and thick turf.—Country Life in America.

## Soon Tired of His Books.

The 7,000 volumes of chronicles and travels from which Gibbon distilled the "Decline and Fall of the Roman Empire" were purchased by Beckford after the writer's death. "I bought it," said the author of "Vathek," "to have something to read when I passed through Lausanne." There were few rarities in the collection, but most of the authors were in the best obtainable editions and in perfect condition. The fastidious Gibbon was incapable of behaving disrespectfully to a book. For six weeks Beckford reveled in his purchase and read himself nearly blind. He soon tired of his books, however, and presented the whole collection to a German physician named Schell. The recipient showed his appreciation of the treasure by promptly selling it.

## He Was In Charge.

"What did you do in the army?" "Most of the time I was in charge of a squad of men." "On special duty?" "No; they were taking me to the guardhouse."—Cleveland Leader.

## Doesn't Feel Put Out.

Tess—I broke my engagement with him because he wouldn't give up tobacco. Jess—Then he is an old flame of yours? Tess—Yes, and he's still smoking.—St. Louis Star.

## More Important.

Policeman—Do you have to take care of the dog? Nursegirl—No. The missus says I'm too young and inexperienced. I only look after the children.—Life.

## Not Moved by Kindness.

A stout woman entered a crowded car and took hold of a strap directly in front of a man seated in the corner. As the car started she lunged against his newspaper and trod heavily on his toes. As soon as he could extricate himself he rose and offered her his seat.

"You are very kind, sir," she said, panting for breath.

"Not at all, madam," he replied. "It's not kindness. It's simply self-defense."

## BATHING GIRL, 1910.

A Smart Costume That She'll Wear This Summer.

ONE OF THE LATEST BATHING SUITS.

The girls are going to look more fetching than ever this summer when taking their dips in the ocean. As the small boy would say, they'll be "peaches" in their new bathing suits. And the suits will not be made of alpaca—that is, unless the girl especially likes this material. No, the up to the minute girl will select a white washable pongee in which to brave the breakers. And she will have it made on the lines of the Russian blouse, but the skirt will be laced at the side from the knee to the waist line with wide washable ribbon, and the same ribbon will form garters to hide the really practical side supports which hold the stockings in position.

The sleeves on this dainty suit are short and lace up the center with ribbons. A belt of the pongee encircles the waist. The sandals are black; also the hosiery.

## Moving Pictures in the Church.

"Jane Addams says that on a Sunday night in Chicago one-sixth of the entire population is packed into 400 places of entertainment," says the Woman's Home Companion. "Churches? No; moving picture shows! The churches on Sunday night in Chicago and, we fear, in many other places are not conspicuously crowded. The problem is this: If the Chicago churches had presented an up to date moving picture show instead of a sermon, would the crowd have followed the films? Inasmuch as the church admission is free and the theater admission is from 5 to 25 cents, it is a fair assumption that the churches would have been filled. Now, if the object of the Sunday night service is primarily to reach the crowd on the street and if, as has been shown, the moving picture is a much more vivid and attractive way of reaching that crowd than is a sermon, why, in all seriousness, don't churches give us the thrilling stories of the Old Testament and the beautiful tales of the New Testament and its modern illustrations of Christian heroism in this and other lands in the up to date form—in moving pictures? They may answer that they cannot get hold of the films and the machine, but this answer is not a good answer. Excellent sacred pictures are shown in the present professional entertainments, and many illustrations of modern heroism, self sacrifice and virtue are in every program. Moreover, a demand for films for church work would enlarge the supply. Moving picture machines are not expensive and can be easily operated. You can do it in your own church. Why don't you?"

## A Simple French Hat.

This charming confection is of blue tagel straw trimmed with black net and dark red roses.

## Easier to Take.

The anemic person or she who fears tuberculosis will rejoice to know that many eminent doctors say pure fresh cream can give points to cod liver oil or its compounds in building up the system and helping to ward off disease.

## Oil Lamps.

Fastening a piece of flannel to the end of the wick when it is too short to reach the oil in the vessel answers the purpose equally as well as a long wick.

## Cookery

## Points

At a stag dinner given by a young woman for her husband and brother the decorations were so original as to be worth repeating here. In the center of the round table was placed a large cut glass tobacco jar filled with loose tobacco. On top of this was a little bisque doll dressed like a ballet dancer, with spreading skirts.

A circle of small playing cards was arranged to form a centerpiece, and from this radiated a row of cards to each plate, forming a wheel.

Cornucop pipes were stacked at each corner of the table, and at each cover were tiny beer steins and little sample bottles of wine as souvenirs. The menu was a substantial one, such as men like. It consisted of bouillon, thick sirloin steak with French fried potatoes, string beans, endive salad with Camembert cheese and wafers, a frozen pudding and black coffee.

This is an easy dinner to prepare and serve even without a maid.

## A Day's Menu.

**BREAKFAST.**  
Grapefruit. Corn Flakes.  
Apple Fritters. Cinnamon.  
Coffee.  
**LUNCHEON.**  
Nut Rice Patties. Brown Gravy.  
Peach Marmalade. Caraway Cookies.  
Chocolate.  
**DINNER.**  
Vegetable Soup. Steamed Onions.  
Hamburg Steak. Sweet Potatoes.  
Lettuce Salad. Stewed Celery.  
Apple Float.

## RECIPES.

**Nut Rice Pudding.**—One pint boiled rice, one-half cupful of chopped walnuts, three tablespoonfuls of vegetable oil, one-half teaspoonful of salt, one-half teaspoonful of sage, one egg (beaten) and zielebach crumbs. Mix the ingredients, using sufficient crumbs to make the mixture stiff enough to form into patties. If the rice is very dry it may be necessary to add a little milk to make the mixture sufficiently soft. It is better to do this and use some crumbs than to omit the milk and the crumbs. Egg and crumb patties and bake fifteen to twenty minutes in a hot oven.

**Brown Gravy.**—One-half cupful of flour, one-quarter cupful of vegetable oil, boiling water and salt. Cook the flour in the oil, stirring to prevent scorching till the flour is lightly browned, and sufficient boiling water, stirring vigorously with a batter whip to make of the proper consistency for gravy. Cook five minutes. Salt to taste.

## Jellied Chicken.

For jellied chicken have on hand three pounds of chicken that has been boiled and cut from the bone in strips. Mix a quart of rich chicken stock that has been boiled down and cleared with a teaspoonful each of lemon juice, chopped parsley, a dash of celery salt and a quarter teaspoonful each of salt and paprika. At the last stir in a teaspoonful of granulated gelatin that has been dissolved. When the jelly begins to thicken add the chicken and turn it into a mold. To have the chicken scattered evenly through the jelly stand the dish containing the jelly in a pan of ice and turn in the jelly layer by layer, covering each with chicken as soon as it begins to thicken.

## Creamed Onions on Toast.

Peel some Spanish onions all of a size. Put into a white lined pan covered with water or stock. Add a small blade of mace and cook gently till tender. Drain and keep the onions hot; then add a gill of milk to the onion liquid. Measure this liquid all together and to every gill add a heaped teaspoonful of flour moistened with a little cold milk. Boil up. Add a nut of butter, salt and pepper. Make a square of buttered toast for each onion. Add the yolk of an egg to the sauce, lay an onion on each square of toast, pour some sauce over each, then a little chopped parsley and serve hot.

## When Purchasing Veal.

Veal should be fat, the kidney small and well covered with firm white fat, the lean finely grained and of a clear white color. Inferior veal is lean. The flesh is clammy and has a spotty appearance.

The color is either red or a dull sickly white. Fresh veal has a clean, healthy smell, and the vein in the shoulder is blue or red. Veal does not keep well in hot weather owing to its large proportion of gelatin.

## Uses For Parsley.

Often parsley is thrown away instead of being dried in the oven and rubbed to powder and put away in a bottle for seasoning soups, stews and gravies. Even the stems may be saved and used in this manner. Parsley will make the most delicious seasoning. Generally it is only known as a garnish.

## Nut Hash.

Chop fine cold boiled potatoes and any other vegetables desired that happen to be on hand. Put them into a buttered frying pan and heat quickly and thoroughly. Salt to taste. Then just before serving stir in lightly a large spoonful of nut meal for each person to be served.

## Bandon Recorder

THURSDAY
