CREOSOTE AND CONSUMPTION.

The Drug Would Seem to Be Able to Master the Disease.

Consumption is now combated by many specialists using creosote. The benefit derived from the proper employ-ment of this drug is hardly questionable. Dr. Warner, consulting physician to the French nospital, New York city, writes to The Medical Journal: "During a somewhat extensive employment of this remedy in phthisis for the past creat encouragement the steady gain in only during the latter half of the time wato. that the positive value of creosote as an agent for combating most powerfully the effects of this disease has been made apparent. Formerly my custom was to administer the drug in small doses, exceptionally giving more than six or eight is keen in the suppression of all super-minims daily. During the last couple stitions and eats publicly the flesh of minims daily. During the last couple largely increased with correspondingly better results." Some specialists explain the favorable action of creosote in improving the appetite. Other observers, however, believe in a distinctively curative value of the remedy.

Dr. Warner writes: "The general condition of the patient, as a rule, rapidly improves. In some cases the appetite during the daytime, while remaining quite as before during the night. After a time, however, it also lessens at night. If the sputum has been tinged with blood, this condition disappears, contrary to what might be expected, as cre-osoto is said to congest the bronchial mucous membrane, and while at first the sputum is not much lessened, if at all, its character is changed-from being thick and yellow-muco-purulent, in fact-it becomes thinner, frothy and contains less solid matter.

of hemoptysis-spitting of blood-had occurred have they taken place after the creosote treatment has been established. The night sweats grow less and in many cases entirely disappear, and after awhile there is a total absence of apt to remain stationary, and in exceptional cases may lessen, and then a gradual increase takes place. The first inimprovement in appetite and the greator ability of the patient to properly assimilate the food consumed.

Large amounts of creosote may be retained without discomfort, one of Dr. Warner's patients reaching a daily amount of 215 minims. A valuable aid to the internal administration of creosote is found by the coincident use of antiseptic inhalations of creosote. "My cent solution, 10 or 15 minims dropped on the sponge of a Robinson's inhaler, hour, and in some instances where tion. - Contemporary Review. marked benefit has been derived from the employment of this measure the respirator has been worn almost con-

stantly," is the testimony of the doctor. He tried also the effect, in a large ward of a hospital, of allowing an antiseptic mixture to simmer gently over a low fire during the night. This mixture generally consisted of oil of eucalyptus, carbolic acid and turpentine. heat applied. The effect was to fill the teapot that belonged to Dr. John ward with a pungent, aromatic vapor. which has a markedly restful action, coughing being not nearly so general or frequent.-New York Ledger.

Reducing Vibration In Railway Cars.

A new invention embodies a principle which will commend itself to all railway travelers. It is sought to lesexcessive vibration by the construction abeth Carter was also a collector of tea of a pneumaite car "which embraces pots. Also Mrs. Hawes, who bequeathed the application of an elastic fluid as an absorbent for vibration and oscilla-An air cushion is arranged on the cellular principle between the car Journal. body and the truck frame, and as there is an equal distribution of air under varying pressures all oscillation is precompletely absorb all vibration result-

ing from rough tracks, jointing of rails, excessive speed or any other cause, and the car is carried smoothly and steadily along. This pneumatic system can be equally well applied to street cars, and instances are not hard to find in which it

unquestionably should be. - Exchange.

An Eastern Dainty. people-strange in appearance, customs and tastes. One of their greatest delicacies of food, regarded from a Chinese epicure's point of view, is "milhi," which, in plain English, means "newborn mice, yet blind." These are placed alive on little trays and set before each guest, who dips them one at a time into a jar of honey and then swallows the tiny creatures. When the emperor's wedding was celebrated a few years ago, to,000 of the helpless creatures were thus consumed.-New York Herald.

Novel Way of Selling a Corn Curer. A gentleman who has been traveling in France relates that in Paris the barber who was shaving him stepped two or three times upon the side of his foot. At last the customer called out: "Please don't do that any more! I

have a corn.

Exactly what I was trying to find out, monsieur," said the barber blandly. "We have an excellent preparation for removing corns, for sale at a franc per bottle."—Texas Siftings.

Father-My boy, who is only three years old, said to me this morning-(tells the same old story). Friend-Yes, and isn't it strange that a child only 3 years old can repeat jokes

that are at least 25 years old?-Hallo.

Sunday in his large, round kotla, or place of assembly, standing beneath the tree of justice and the wide canopy o heaven in a truly patriarchal style. He of years, however, the doses have been the duyker, a sort of roebuck, which ago. The late King Sikkome, Khama's lessening the bronchial secretion and father, would not so much as step on a duvker skin, and it is still looked upon with more veneration by his subjects than Khama would wish.

is better, the cough at first becomes less Shoshong to the present site, Palapwe. tion of the disease, and giving the pa Shoshong was in a strong position, where the Bamangwato could effectually protect themselves from the Mataseasons the inhabitants suffered greatly from drought. The change of capital had been a subject discussed for years, Send for circulars and testimonials but Khama waited quietly until people Address began to think that he was against it and would never move. He waited, in fact, until he was sure of British protection, until he knew that Lobengula In no case where previously attacks | could not attack his people at Palapwe with England.

Then suddenly one day, without any prefatory warning, King Khama gave orders for the move, and the exodus began on the next day, and in two the daily fever. The weight of the pamonths' time 15,000 individuals were the sale of timber lands in the states of California, Oregon, Nevada, and Washington Territoria. away from Shoshong. Under Khama's direction, everything was conducted in of Gardiner, County of Douglas, State of Oregon crease in weight is no doubt due to the was given his allotted ground, and he was told to build his huts thereon. Not a single dispute arose, and no one would imagine today that only a few years ago Palapwe was uninhabited.

Khama, in manner and appearance, is thoroughly a gentleman, dignified and courteous. He wears well made European clothes, a billycock hat and gloves; in his hand he brandishes a dainty cane, and he pervades everycustom is to use crossote combined eithing in his country, riding about ther with terebene or ether in a 50 per from point to point wherever his presence is required, and if he is just a little too much of a dandy it is an error and employed every second or third in his peculiar case in the right direc-

Tea was not known in England till the time of Charles II, but it is interesting to trace the gradual increase in the size of teapots, from the diminutive productions of Elers, in the time of Queen Anne an. Beorge I, when tea was sold in apothecaries' shops, to the capacious vessel which supplied Dr. A dram each of the first two and two Johnson with "the cup that cheers but drams of the last were put in about a not inebriates." Mr. Croker, in his ediquart of water in a shallow dish and tion of "Boswell's Life," mentions a which held two quarts, but this sinks into insignificance compared with the superior magnitude of that in the possession of Mrs. Marrayat of Wimbledon who purchased it at the sale of Mrs. Piozzi's effects at Streatham. This teapot, which was the one originally used by Dr. Johnson, holds more than thre quarts. George IV had a large assemsen the discomfort and annoyance of blage of teapots, piled in pyramids in travel on many lines on which there is the pavilion at Brighton. Mrs. Eliz-

White Blood Absorbing the Hawaiian. The marriage of young American men vented. This elastic medium is said to to half whites is becoming quite frequent among respectable white families in Hawaii. It is of no use for the foreign parents to turn the cold shoulder. Ofctimes the balf white girls are fully equal in intelligence, taste and domes-tic virtues to those who marry them. There will be more of these marriages, and the mixed blood will improve with growing prosperity and better educa-tion, and as the primitive influences and The Chinese are certainly a strange environments decrease with the lapse of generations. Indeed one way that the Hawaiian population is now decreasing is not so much by the disappearance as by the dilution or by whitening of the blood. - New York Evening Post.

GOOD ADVICE:

Every patriotic citizen should give his personal effort and influence to increase the circulation of his home paper which teaches the American policy of Protection. It is his duty to aid in this respect in every way possible. After the home paper is taken care of, why not su'sscribe for the AMERICAN ECONOMIST, published by the American Protective Tariff League? One of its correspondents says: "No true-American can get along without it. I consider it the greatest and truest political teacher in the United States."
