John Goolman,

Improvements in and About Town. Ed. HERALD:-After so long a time I have again been doing your town. It was my privilege to spend last Tuesday in Coquille City, and it is really astonishing to see the v2n20 improvements made and those making since my last communication to the Herald. I; thought while traveling over that dreaded thoroughfare, the Cunningham creek road that it showed enough improvement to pay well the writing of an article commendatory of your irrepressible road supervisor, who bas been at least seven miles out from your town on that road, and wherever he has been he has left his nurk. The Bullack mountain especially has been well worked, and is now in better condition than ever before; and on going to the feed and livery stable this evening, to see after my team, Mr. Buck informed me he had just finished a good, substantial bridge across the creek at Paxson's place, a thing much needed. He also told me a secret which I will get you, if I can, Mr. Editor, to help me keep, and it is that when Collier and Paxson and Schweers had worked out all their taxes for the year, they all volunteered and did good and effectual work on the road and by their public spirit have set a wholesome example to others living on that line of road, Wonder who will fellow the example first and do likewise. Mr. Buck proposes to finish up the Cunningham creek road as far as it lies in his district, and put it in good repair at once. The people on that road should second his efforts and make a good read

> while they have the opportunity. I find on inquiry that there are in Mr. Buck's hands now thre fine teams with which he is ready to accommodate the public generally. He has part of the lumber on the ground to build an addition of 40 feet to his barn, which is too small to accommodate the demands

made upen him. I see that your townsman who left Coquille City last year (or was going to leave it), J. T. Moulton, has a fine lot of lumber in front of his residence on Hall street, for the erecting of an addition thereto, in the way of a kitchen, pantry, etc. John has not been idle in another direction, having moved a dwelling out onto Front street and converted it into a basiness house, which he will soon occupy with his meat market and vegetable stand. He has it in splendid order and will doubtless move in in a few days.

We can heartily wish such live men as Mr. Moulton success. Whitney & O'Connell have their hardware store and warehouse almost completed. It is a fine and substantial piece of workmanship, constructed by Mr. J. A. Collier, one of our best mechanics; as his

work will show. At the Olive hotel the work of completion is being pushed forward as rapidly as possible, and I am happy to say Charley is getting together the finest hotel building I have seen in Coos county, and when completed it will be one of

the most commodious as well. Dr. Angell is still driving his large, mansion-like residence steadily toward completion, but there is a vast amount of work necessary on such a structure, and much time Meets at Cognille City every Monday and capital required. His fine bay windows are beginning to take shape and show for themselves, under the hands of Mr. Pape who is showing ye Coquillers how tools and lumber should be handled to

> give pleasing effect. Mr. Bennett, also of your town, is working up a fine residence and drawing his house on toward com-

pletion. Uncle Johnny Cartwright is also doing something at building which I found on inquiry of the boss car-

ered so as to free the base boards allowed to run at large, the year east and then buying back the producers themselves, of the hall, and Esq.
