The fair grounds at Halls prairie have been duly leased, and the papers are in the hands of the Agricultural society, so stock holders need have no fears on that score.

M. E. Anderson and lady were in town on Wednesday on their way home from their ranch on Middle Coquille where they had been looking after their rural interests.

Uncle Joseph Collier has cleared the street in front of his premises the past week. When we remember his severe lameness, it makes us blush to see a root or stump in the street near us.

A meeting at Norway will be held on Saturday March 28, for the purpose of making arrangements for the celebration at the fair grounds at Halls prairie on the coming 4th of July.

Some camping out paraphernalia consisting of blankets, quilts, and a bread-pan enclosed in infant habiliments, which was found out back of town during the cigar and rum-punch panic, can be had by the owner calling on Constable Cartwright, and proving property.

We would advise all our readers who think of making a Vegetable or Flower Garden this spring to send to D. M. Ferry & Co., Detroit, Mich., and get their valuable and beautiful Seed Annual. Fruit is thought to be out of danger, as the leaves will be sufficient protection to the young fruit against any ordinary frost.

Louis Lambo, an early pioneer in this valley, has arrived after several years absence. He made the trip from New Orleans to our county seat in 7 days and one hour.

Mr. John Goodman has purchased land, and is building out north of town. It is fortunate for us that he has located near, for he is a good brick layer, plasterer, etc.

The steamer Ceres broke her propeller shaft last week, and the mail was carried in a row-boat. The break has been repaired, and the boat is again on her route, Capt. Raed having visited the bay in the mean time.

Oklahoma troubles do not seem to have reached the climax of federal interference, but it is confidently believed that in the wind up they will be amicably settled in this way, with chances of the settlers getting their demands.

There is a large amount of potatoes in this valley, from last season's crop, that must necessarily rot, as the country is over-supplied, and there being nothing above freight, as a margin, to ship them to San Francisco. A starch factory is needed here to utilize that natural product of the country.

OUR NEIGHBORS.
 [Coast Mail.]

Capt. Cliff Campbell and Manly Roberts, engineer, have the steamer Comet chartered and are now running her.

Our butchers are paying 6 cents for their beef and have no difficulty in getting a good article and all they want at that price.

The new school law has frustrated the calculations of the directors in regard to the term of public school announced to begin next month. It has been postponed and it is now uncertain when it will begin.

Ren. Smith has resigned as deputy sheriff and gone to his Daniels creek ranch to put in a crop. W. H. Smith is Sheriff Simpson's new deputy.

Our markets are importing cabbages from California and selling at 2 1/2 cents per pound. This may be necessary and all right, but it does not seem to us that it should be so. The finest cabbages that we have ever seen have been those grown here, and to-day there are better cabbages standing in gardens in this town than those that come from California. At J. R. Lightner's residence may be seen some of them, and also good heads that grew on stalks from which the first heads were cut last season.

At Empire, the other day, in the garden at the Lockhart hotel, we also saw some nice cabbages that had remained there through the winter. This is not particularly due to the mild winter we have had, for the people who have these cabbages tell us that they have them in this way every spring.

Then why should they be imported before ours would be gone if they had been raised? We are free to admit that California is a wonderful state, from which we should draw some supplies, but nature never intended this place for a cabbage and vegetable market for that state. Every year a vast amount of money goes from here to California for hay and vegetables.

The most of this money should be kept at home by our farmers supplying the home market. If the drain can be stopped it should be stopped as quickly as possible. There is a reason for it. Why is it?

[Coast Mail News.]
 Mrs. S. S. Bailey has been very ill at her home in Portland lately.

Katie Siglin, Hattie Dyer and Nellie Noble, all of Marshfield, are attending the Academy of the Sacred Heart, at Salem. Miss Dyer will probably return home about the first of July. Mr. Noble says he will keep Nellie there until she is 17 years old. Miss Siglin will probably remain until she graduates, which will be in June 1886, she having received a credit of one year on her examination.

The two boats lately built by Chinamen, on the sawdust, were manned by a Celestial crew last Thursday, and under command of Capt. Leung Soo started for the lower bay, to wait a favorable opportunity to cross the bar. Now ye red bellied rock cod and spider, webbed devilfish, look out. Either your days are numbered or the Chinaman's are—and we are inclined to think everything is in favor of the Chinamen. Some sweet and blushing mermaid, with a pretty face and the latest graceful skating-rink glide to her tail, who dwells three thousand leagues under the sea (Jules Verne modified) will have a chance to hug a man yet. More anon; for the present we are waiting for a mess of deep water fish, or mayhap we may have the pleasure of writing a few commonplace obituaries.

Smith Bailey and Harry Roberts returned Saturday from a trip to the coast. Mr. Roberts bargained for a ranch at Denmark, Curry county, and thinks of going there this summer to embark in the cattle business.

If all the direct war tax of '61 is returned to the State that paid it, Oregon will have \$15,541 more to squander, principally in green backs, perhaps silver certificates. It is pretty sure to come.

A Public meeting was held at Wabashaw a few weeks ago, and it was determined to send Captain and Dr. Stone to Southern Oregon to "spy out the land." These gentlemen are now on the way to carry out their instructions. If their report is favorable, on returning to Minnesota, they state quite a large colony will start for Oregon soon.

These gentlemen state that the climate in winter in Minnesota is so very rigorous that a great many people about Wabashaw are disgusted with the country and are determined to come out to the "glorious west."

The president of Costa Rica, whose name we shall not attempt—being crowded for space—died suddenly on the 13th inst.

The trouble between Russia and England is in a fair way to be settled, without the shedding of blood; in which case we presume the sin remains.
