Farm Boundries.

When a farm is bounded "along," "by" or "upon" a public highway, the boundary line follows the center of the road or highway, and unless an intention to exclude the road, or convey only to one side of it is very clearly indicated in the deed, the boundary will always be the center of the road.

The Raising of Geese.

The raising of geese is one of the most profitable branches of poultry raising where any one has plenty of water and a good range of grass. A wooded pasture makes a good run for them.

I keep a flock of seventy geese and have extra good luck raising goslings on the above plan. The geese are ready to pick every seven weeks.

A City Moving.

From recent surveys it has been ascertained that the entire city of Virginia, Nevada, has moved over thirty inches to the east since the big fire of 1875.

be gradually sliding down in the direction of Gold Canon, and has moved nearly two feet since its erection. This movement is so gradual that it does not affect in any manner the safety of the building, as the ground to a depth of nearly one hundred feet to the bed rock is known to be continually sliding.

Beans as a Farm Crop.

"I should think," said the Doctor, "that the farmers on the new cheap land of the Northwest would go into the raising of beans on a large scale."
