Eld G. R. Edmunds left a sample of some good corn at this office last week. It is of a variety known as "hiawassa," and this, of the second crop raised on this coast, is well developed, the first having only sufficiently matured to make seed. The sample is 12 feet high with two large ears to the stalk. The ear nearest the ground is over six feet high, a hight seldom attained by the tassel of the best varieties here a few years ago. In this connection we wish to say that it is becoming more apparent every year that our climate is changing. Only ten or twelve years ago, grapes, corn, melons, peaches and tomatoes could hardly be brought to perfection and maturity, whereas now they are nearly, and some of them quite, as good crops as any we can raise.

Coming, Coming, Coming!!!

COQUILLE CITY!

The coming Town of S. W. Oregon!

Few towns possess the natural advantages that Coquille enjoys, and which will, in the near future, cause it to blossom as the rose. It has a beautiful and pleasant site, being situated, for the most part, on a level plateau on the sunny side of the Coquille River, thirty miles from the Pacific ocean, which is reached every day by a four-hours' steamer ride. Coquille City is at the center of the converging wagon road system of Coos County, and is at the head of deep-water navigation, and in the central part of a vast body of rich, river bottom land, which is the source of all true and enduring prosperity The country round about is filled with precious metals, minerals and coal to an unparalleled extent, and is covered with a variety of timber that for quantity and quality is not excelled by that of any place on the Coast, if, indeed equaled. As a dairying and stock-raising country, and a sanitarium for those seeking health, it is bound to come to the front rank. The fishing industry will prove an important factor, while the numerous mills and factories, completed, in course of construction, and contemplated, will make the whole county a buzzing hive of industry and wealth. Coquille City is in the center, is the most eligible and will enjoy all. Its school, church, and society advantages are second to none in the county. Building material is cheaper at this point than at any other in the county. It has the advantages of a corporation, and is to soon have a mountain stream of water run through it for protection against fire. Property reasonable.

J. A. DEAN, AGENT, Coquille City.
