BANDON.

The highest temperature for the month of June in San Francisco was 82 degrees, and the lowest 48. On the Bandon beach the highest was 70, and the lowest 49. But the difference between the extremes in July was much greater. On the 10th of July the temperature in San Francisco was 121; on the same date here it was only 65, the difference between the extreme of both places being as high as 56. We doubt if a more even temperature can be found anywhere than what we have here.
Eighteen kegs of powder, each containing fifty pounds, were exploded in one blast lately at the Blacklock stone quarry. The blasted stone was driven in every direction, but as all those engaged thereabouts knew what was coming, they all got well under cover, and consequently no one was hit. The tramway to the wharf is now nearly completed, and the quarrying and shipping will soon be in full operation. The surveying of the town of Blacklock is now completed, and when the registering and other legal formalities are duly complied with, Mr. Blacklock will leave for San Francisco.

As Giromi's hack will have no mails to receive or exchange, there will be no delay and his hack will arrive at both places on given time.

A Private Opinion.

Ed. HERALD:—In last week's issue of your valuable paper I saw an article written by Dr. J. P. Easter, in which he accepted a challenge, said to have been made by Elders Ward and Cole in their hand bills. I would request the doctor to reread that poster, and he will find no challenge there; but simply an invitation for the people to attend their tent-meetings where these important subjects will be discussed.
If Dr. Easter wishes to debate the Sabbath question. I should think he would come boldly to the front and challenge these gentlemen for a discussion, instead of accepting an imaginary challenge.
I have attended the lectures given by Elders Ward and Cole and have carefully read and reread their hand bills and therefore know that no such challenge has ever been made; neither did they say that the present keeping of the first day of the week is the mark of the beast.
It seems to me, that it would be absurd for these gentlemen to substantiate a challenge, which they had never made.

50,472 feet in two Days.

J. E. Taylor who is logging on Bear creek put in 33,201 feet of logs on July 23, and 17,271 feet the day previous, making 50,472 feet in two days with eight men and 4 yoke of cattle. Who can beat it? The picture of a well-hooped keg with the significant figures 10 marked on it at the bottom of the letter giving us this item indicate a banter, and we hope some camp will try to carry off the laurels. The following compose the camp with the part each performs: J. E. Taylor, boss; Geo. Woodruff, driver; Wess Nosler, hooktender; Dick Hayter, assist. hooktender; Jas. Appleton, barker; Fred Lawrence, barker; Geo. Williams and Willie Wright, roadsters; Oattie Willard, skid greaser or landing tender.
