John Johnson has taken a claim on North Coquille and last week moved up. He has a good claim there being several acres of good rich bottom land and the balance is low bench very rich and easy to clear. There are many such claims yet to be had in the county if diligent search is made.

Last Friday, Charles Riekerson, unfortunately got his foot caught in some of the machinery belonging to Capt. Parker at Parkersburg on the river. He was immediately brought to this city and placed under the care of Dr. Murphy who states that the tarsal arch of bones is unbroken and that the tarsal arch of arteries is intact, although all the soft parts in this connection are badly injured. There is good hope of the foot.

On Friday the Rev. T. P. Haynes made some mistake in regard to some medicine he was taking. It seems that the Rev. gentleman was suffering from the effects of poison ivy and had received some medicine—one bottle to be taken internally, the other to be used externally—both of the same size, and had misplaced the bottles, when he accidentally imbibed the liniment. After many remedies administered by Dr. Murphy the Rev. gentleman felt better, and will endeavor on the next occasion to make use of his solutions of iodine externally.

Mr. R. D. Hume, of Rogue river, arrived here on Thursday evening en route to Halls prairie where his race horses are. He chartered the tug to bring him up, such was the importance of his mission. He has great confidence in his horses, and we pity the man who has backbone enough to bet against them, if he loses.

L. B. Fetter, of Angora, returning from the bay Thursday whither he had been with a band of fine beef cattle, made us a pleasant call. He informed us that the deer interfered with his travel coming over from Ross' place, his horse scaring at them at every turn. They came out into the road in great numbers owing to the shower and were loth to give up the road.

It is a fact that while money goes begging for loans at 6 or 7 per cent in some parts, here in Coos county it cannot be had at 10 per cent with taxes paid. Loans of this kind have been sought all over the county for the past year, with success. There are many places here for profitable investment at this rate, and the demand is great. At a lower rate the demand would be almost limitless. If any of our readers has friends elsewhere who have money to loan they should call their attention to it.

The district fair races are all made up and lively times may be looked for this week at Halls prairie. To-day the half mile dash with Maplewood, Baldie and Clamdigger will come off. John E. Swift is the republican candidate for governor in California. He was once commissioner to China and helped to frame the restriction act. The latter will figure largely in his election or defeat.

If Blaine is discreet with his tongue, and not let that unruly member fly off at a tangent as Gen. Logan has, there will doubtless be little opposition to his taking the first place on the republican presidential ticket two years hence.

In the death of Andrew Peterson, the Coquille has lost one of its best citizens. He was scrupulously honest and was everything that could be wished in a husband, father and neighbor. His bereaved family have the sympathy of the entire river.

Ayer's Ague Cure, when used according to directions, is warranted to eradicate from the system all malarial diseases, such as Fever and Ague, Chill Fever, Intermittent, Remittent, and Billions Fevers, and disorders of the liver. Try it. The experiment will cost you nothing if a cure is not effected.

The gloomy fears, desponding views, and weariness, that many complain of, would disappear were the blood made pure and healthy before reaching the delicate vessels of the brain. Ayer's Sarsaparilla purifies and vitalizes the blood; thus promoting health of body and sanity of mind.

The Sailors' Strike.

San Francisco, Aug. 31.—There are now 600 striking sailors in the movement of the Coast Seaman's Union against the Pacific Coast Ship Owners' Association. The men who left work yesterday numbered over forty from the following vessels: Schooner Dora Bluhm, two; barkentine Portland, eight; schooner Novelty, five; ship Blue Jacket, ten; schooner Free Trade, four; schooner Fannie Hyde, one; ship Sumatra, ten; schooner Geo. Higgins, four; barkentine North bend, ten. The remainder of the crew of the four masted schooner Novelty leave the vessel to-day. There are several vessels now in port which will lose crews as soon as the cargoes are discharged.

To-day is the sixth day of the Coast Seaman's tie up, and it finds over fifty vessels tied up. The seamen claim the ship owners are weakening. A meeting was held last night, at which it was announced that deep water sailors would organize Thursday, and that the ferry boat organization was perfected. A resolution was passed endorsing Superior Judge Toohy, and recommended his elevation to the supreme bench.

Rebuke to the Chinese. Yokohama, Aug. 31.—Advices from Corea state that, in consequence of the rumors that the Russian government contemplated the establishment of a protectorate over Corea, the Chinese Minister at that place telegraphed to Pekin, asking that troops be sent at once to protect the Chinese interests. In compliance nine men-of-war, with troops, were sent to the peninsula and anchored off Chemulpo. The Coreans attacked the Chinese marines when they reached the shore, and a desperate fight ensued, in which a large number, principally Chinese, were wounded.

Services, morning and evening.

The Roseburg Juvenile band, a lot of kids from 9 to 15 years old, is expected in, and to play for the coming fair and races at Halls Prairie. There are about 14 of them, and they discourse excellent music. The press of the state, speak very highly of their attainments for a band so young in years and practice. This would be quite a novelty and an extra attraction for the fair, and it is expected, that should they decide to come, the people of this valley would treat them well, and do all they could to make their visit pleasant and agreeable.

Soda is to be substituted for coal for steam fuel in coal mines, it being better than anything heretofore found where there is poor ventilation.
