We owe Henri de Bouillon, a HERALD correspondent, an apology for deferring the publication of two well written papers—the Vale of Coquille and the Rigs and Jigs of Bandon. All our small type was employed in legal ads and it was impossible to give them. The latter appears this week, and the former will appear next week if possible.

La Grippe has attacked the people of New England to an alarming extent, and the disease is by no means abating in Europe. Coos county must have a good central wagon road that can be traveled at all seasons of the year. It must extend from the navigable waters on the Coquille to those of Coos bay and really should extend from Empire City to Myrtle Point. Such a road will have to be planked since there is no gravel to be had. What say the county court. We should like a full discussion of this subject and invite correspondence on the subject.

The small boys of Coquille City forget themselves, as was shown by their wild, hilarious cheering at the church during the marriage ceremony Sunday night. Boys, it is too bad. You bring condemnation on your father and mother. Strangers question your raising. Little people of your own age may think it looks cute but your actions are condemned by all grown people who are properly raised. Did you ever notice how quick your parents would stop you from such actions? Respect your mother if you would not respect yourself.

Would it not be a good idea for Coos county to build a railroad from Coos bay to Myrtle Point? As the county becomes more densely populated the season for wagon road travel will become less. A county railroad would certainly pay remunerative, besides it could be regulated so that it would not fleece the people as if owned by private capital. Something must be done, and while a county railroad would be an innovation, it doesn't follow that it is not just the proper thing. There is nothing to hinder the scheme, and our county court could not render the people of Coos county as great a service in any of our way.

Having purchased the drug business of J. H. Nosler & Son, I will continue the business at their old stand, where I will keep constantly on hand a complete stock of drugs, medicines, chemicals, etc., the strength and purity of which I guarantee to answer the requirements of the pharmacopoeia; also all the patent and proprietary medicines that are in general use, and such sundry articles as are usually found in any first class retail drug store. Fair dealing shall be my motto. Satisfaction guaranteed. Soliciting your patronage, I am respectfully,

R. S. Knowlton.

ED. HERALD.—The first national club of Coquille City was formed at a meeting of citizens held in the Universalist church Dec. 28, 1889. A permanent organization was formed, which will hold public meetings every two weeks—alternate Tuesday evenings, the next meeting being on Tuesday, Jan. 14, at the Universalist church at 7 p. m. About twenty-five have joined. S. W. Harrington is president, W. H. Nosler, vice-president; H. H. Nichols, secretary. The club will form itself into a debating society to discuss the political questions of the day; how the people can get along without money as a circulating medium; how crime can be lessened; how millionaires and paupers can be wiped out; how a government can be run and the rights of man, woman and child be respected; theft and intemperance die a natural death, and happiness instead of misery be the existing state of society; that caste in society shall depend upon intelligence and moral worth instead of gold. An invitation is extended to all who can solve these problems to come and tell how. The club recognizes the equality of woman with man. The fight is for all of America's citizens regardless of sex. The ladies are especially invited to come out. Henry H. Nichols, Secretary.

Some people imagine that the rich discovery made by John Sturdivant in Iron mountain doesn't amount to much owing to the presence of iron. This is false for iron is favorable to a rich mine, so say experts. Some of the richest mines in the world have been found under iron mountains. This brings to mind the old German proverb: "Es ist nie nicht ganz so gut Der traugt nicht einen eisernen Hut." Which interpreted is "No mine is deemed so good As one that has an iron hood."

War Department, Signal Service, U. S. Army. Annual summary of meteorological observations, made by George Bennett, at Bandon, for the year ending December 31, 1889.

Table with columns: Month, Rainfall (Inches), Snow (Inches), Wind (Miles per hour), Clouds (Percentage), etc.

The average mean was 52.3; average maximum 69.7; average minimum, 38.3; total rainfall, 59.10 inches; snow, 1.24; days rain, 128; frosts 29. Our frosts were all hour frosts. No killing frosts. The rainfall in July did not average 0.02 per day. Our rainfall in October was 6.55 inches above the average. GEORGE BENNETT, V. O. Sig. Service, U. S. (Coos Bay News)

The new year promises well for the development of the resources of this section.

R. S. Knowlton, of Empire, was in town Monday on his way to Coquille City, where he lately purchased the drug store owned by Judge Nosler. The Coquille people will find Mr. Knowlton a thorough druggist, and a courteous and obliging gentleman.

Chas. Eckhoff sold his place near North Bend on Monday to Capt. Simmons for \$16,000. It is stated that capitalists at Washington, D. C. are interested, and that the property will not be allowed to remain idle long. There is a splendid town-site on the place, and the water front is second to none. As the resources of this section become known, and the facilities for shipping that the harbor affords are thoroughly understood, it will mean the investment of much capital. New industries will spring up; the old ones will be worked more extensively; Coos will take her place as the richest county in the state, and Coos bay will maintain its reputation as being the best harbor between San Francisco and the Columbia.

C. E. Edwards is agent for the Coquille river for the Whitley steel and half joint mowers and Champion self-binders, and sulky hay rakes.
