There is no medicine so often needed in every home and so admirably adapted to the purposes for which it is intended, as Chamberlain's Pain Balm. Hardly a week passes but some member of the family has need of it. A toothache or headache may be cured by it. A touch of rheumatism or neuralgia quieted. The severe pain of a burn or a scald promptly relieved and the sore healed in much less time than when medicine has to be sent for. As a remedy for sprains, it is a cure in about one-third of the time otherwise required. Cuts and bruises should receive immediate treatment before the parts become swollen, which can only be done when Pain Balm is kept a hand. A sore throat may be cured before it becomes serious. A troublesome corn may be removed by applying it twice a day for a week or two. A lame back may be cured and several days of valuable time saved or a pain in the side or chest relieved without paying a doctor bill. Procure a 50 cent bottle at once and you will never regret it. For sale by Dr. S. L. Leneve, druggist.

Besides renewing acquaintance with Capt. Bob Dunham of the steamer Alice Blanchard, we had the pleasure of an introduction to F. N. Cramer, purser, Wm. D. Logan, chief engineer, and Peter Cunningham, assistant engineer, clever members of the crew of the same vessel. Purser Cramer is a very genial young man, and while this was his first visit to the Coquille valley, he had made frequent trips to the bay as one of the officials on the bay steamers. He expressed an agreeable surprise at our grand river and valley, and thinks a great future awaits us. Engineers Logan and Cunningham, the former a Pennsylvanian and the latter a Louisianian, were agreeable and talkative gentlemen. They have seen much of the country and been long in the service of their calling on the eastern seaboard, in the Mississippi valley, on the gulf and Pacific coast, and have a store of information. Politically, too, we were "three of a kind," and Capt. Bob, thinking he was about to be "talked to death" on reform issues, turned them over to us.

Probably you will find interesting paragraphs under our "marriage" heading.

Sixty scholars are enrolled in the upper room of our public school building, and 55 in the lower. While the seats are about all occupied, there is a scholastic enrollment of another 100 who are not attending school, a number of whom are of the age specified in the law which we publish in another column today, providing for compulsory attendance under certain conditions. Parents should read the law. Another thing had better be considered seriously, and that is the procurement of additional school facilities, so that the public may get a better and more effective use of the school fund for educational purposes. Half as much more added to the present fund would fully double our school service.
