

It seems to me the sound of a new uprising is abroad, and if the standard is lifted with courage and faith we shall see advance. The failure of all other parties to meet the obligations of success, and the causes of failure in their utter repudiation of the great fundamental moral principles of government, are written on the very skies in these days of discontent, bloodshed and fear. Some new party through unseen toward the doorways of destiny, but may not pass to victory without the prohibition of the saloon system and the enfranchisement of women.—Mary T. Lathrop.

The Templar says: "The countless of Aberdeen during her recent visit to Halifax endeared herself to the White Ribbon women and all friends of prohibition. She gave an 'at-home' and garden party on the magnificent grounds of the official residence of the admiral commanding the British squadron in North American waters. It was the most brilliant and successful affair ever held there. Among the many Americans present were Gen. Schofield, commander-in-chief of the United States army, and United States Consul General Ingraham. The feature of the function was the entire absence of wines and liquors. This is the first time in Canadian history that the wife of the governor-general has held a reception without dispensing liquors, and marks a new era in Canadian social life."

Dr. Norman Kerr, at a recent meeting of English physicians, related the following incident, making a personal application to his brothers and sisters of the profession: Before I practised what I taught in regard to this matter, I found that, sing however sweetly I might, my advice penetrated very little into the life and character of the febricants who came before me; but when in order to save a man whom I was called upon to see through the night, I took the pledge, my practice then squared with my precept. I said to this man, "What on earth do you mean by calling for me about once in every month in this way and wasting your substance, only for the benefit of your wife merchant and your doctor? You must be an unmitigated fool—why do you not take the pledge?" When I went to see him next morning, drunk as he had been the night before, he grasped what I had said. "Doctor," he said "you told me last night to take the pledge; I will, if you will." What was a poor doctor to do? It was a case of the spider and the fly, and the result was that we took the pledge in that house together, and that man has kept it till this day. I saw him on Monday last before I came here, not as a doctor, for he is of no use to me, as now he is never ill, but he has been the means of making hundreds of people abstainers, mostly among the slaves of drink as he was himself.

Temperance Notes.

[From the National W. C. T. U. Bulletin.] Does your influence assist in keeping the saloons open? Chicago spends nearly \$25,000 per day for tobacco. In 1891 the legalized liquor traffic gave this country 300,000 criminals, 800,000 paupers and 300,000 idiots. It is impossible to climb up with a bottle of whisky in the pocket. It is worse than a millstone about the neck. How startling are statistics! Three million children are born annually of drunken parents, half a million born idiots, and three hundred thousand born deaf, dumb and blind. Of the 12,000 saloon-keepers in New York city, no less than 8,000 have served terms in the prisons. And this is the class of men that the government licenses to undo all moral work.

Every mother should know that croup can be prevented. The first symptom of true croup is hoarseness. This is followed by a peculiar rough cough. If Chamberlain's Cough Remedy is given freely as soon as the child becomes hoarse or even after the cold has developed it will prevent an attack. 50 cent bottles for sale by S. L. Leneve.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder

ABSOLUTELY PURE

Our Creamery Statement.
The test sheet of the Coquille creamery, published in the HERALD last week, made an excellent showing for our dairymen under the co-operative system, no patron's milk testing below 4 lbs. per 100 of milk, and some going above 5— one running as high as 5.6.

We are informed by Superintendent R. D. Sanford that while the quantity of milk furnished has decreased materially, yet on account of the very high test and large over-churn of butter, and the greater price obtained, the patrons made more money out of their September milk than they did for the larger amount furnished in any previous month during the flush season.

Our dairymen are taking considerable interest just now in improving the quality as well as the quantity of milk furnished, and are learning that the price obtained for butter-fat alone does not govern the amount of cash received for a given quantity of milk, but must be figured in connection with the best obtained, to ascertain the facts as regards profit, so one patron may be receiving 22 cents per lb. for his butter-fat and another only 19 cents, yet the one receiving 19 cents may be getting more money for a given quantity of milk, on account of the higher test received, than the patron who receives 22 cts.

We are pleased to see our dairymen taking such a lively interest in these matters, as the time is upon us when intelligence in dairying will be the key-note to success, and those who do not keep near the front of the race will eventually be ruled out on account of the business becoming unprofitable to them, while their more shrewd neighbors get well on at the business.

In last issue of the HERALD may be found a statement of the Co-operative Patrons company, for the month of September, which is commendable inasmuch as it gives those interested in these matters something to figure from, and must be of material benefit by way of comparison.

Take Simmons Liver Regulator to remove the bile, clear the head and restore digestion.

The HERALD had a pleasant call last week from Prof. Wm. Tappan, representing in our state the interests of Messrs. Ginn & Co., publishers of Boston, Mass. In view of the possible adoption of new text books in this state for our public schools, Mr. Tappan is here on the merits of their publications, and is represented to us specially by a prominent citizen, deeply interested in educational matters in the city of Portland and throughout this state, as fair and open in his treatment of the question of school-book adoption and worthy of a hearing.

One Small Bile Bean every night for a week around Torpid Livers. 50c. per bottle.
Mrs. R. J. McMullen and two children arrived in this city last Thursday from Portland. Their trip Wednesday night over the mountains during the storm was quite all they could stand. She joins her husband at Bandon, who has established a broom-handle factory there, and will reside at that place. He expects additional machinery per steamer Bandonville.

The schooner Chetco, owned by R. D. Hume, was wrecked at Needle Rock, Westport, Cal., on the 10th, where she was taking on a cargo of bark.

The schooner Eureka finished loading at Morras Bros' mill last Thursday and was towed to the lower river about 2 p. m. by the tug Triumph.

Cure for Colds, Fevers and General Debility. Small Bile Beans. 50c. per bottle.
Mrs. Wilbur of Bandon spent part of last week in this place delivering patterns to patrons who had ordered from her.

Guaranteed to cure Bilious Attacks and Constipation. Small Bile Beans.
The ladies prepared the church handsomely for the county convention of Christian Workers, held in this place last week.

GOLD BEACH MINING.

Immense Bodies of Auriferous Earth and Sands Awaiting Proper Development.
Portland, Oct. 21.—The renewed interest taken in gold mining in Oregon at the present time promises to add considerably to the prosperity of the state. We hear of greater effort in eastern Oregon and success in quartz mining there. All eastern Oregon is waking up to mining enterprises; both quartz and placer work will be prosecuted with energy. The other day I found a pruned grower who was going to gold mining, and had leased ground to work on shares, while my landlord at Myrtle creek had discovered the old channel of Cow creek on the hills near there, and showed me lively chunks of pure gold he had extracted from its bed.

We have heard a great deal about gold in the sands of the ocean beach for 40 years past, and that is now being revived, and will be scientifically prosecuted. At Roseburg they told me the chief mover is Simon Lane, a grandson of the old general, who has extensive interests along the west shore, and I gathered brief but interesting details of what is intended from conversation with a gentleman who occupied the seat with me for half an hour on a late trip south. He had come to the country a month ago, being interested in gold beach mining and was then on his way to San Francisco to secure concentrators and other supplies and material for the company. The short time did not allow of full investigation, but the few points touched are of interest.

His company controls eight miles of sea beach near the Coquille, where beach mining has been carried on for years in a crude way. They use sluices, with a sheet of copper and rough boards to gather the fine gold in the crevices or saw cuts. He showed almost two ounces of gold, worth \$30, he and another man washed out in two days and a half, and they dug down to the stakes where some one else had in the past once mined the same ground. The sea had washed up new sands that were also rich in gold, to replace the gold formerly extracted. How far out this rich sand extends no one knows, but probably further than they can possibly reach after it; though it is intended to rig machinery to pump the sand ashore from some distance out, as sand is pumped from the bottom of the river to fill up the low places about Portland.

It is well known that the shore of the Pacific is rising out of the sea, especially on the Oregon coast. It was told years ago, that a man dwelling on the lower Coquille found the step by which he landed his boat to be a foot higher than when he first located it 30 years ago, and that the river is now a rife where it was once deep water. So this company has the old sea beaches, that reach back a mile or more, to work on, as well as the sands of the present seashore. The mountains are so close by that water power can be utilized to any extent that may be necessary. The origin of the gold is explained by the finding of rich ore veins in the near mountains, one being four or five feet wide, and very rich quartz veins a 30-stamp mill at work all the time. Undoubtedly the action of time has reduced more or less of these mountain shores to sand and pulverized the gold in the process, though not entirely, for the sand is much of it quartz sand, and they contemplate erection of crushing machinery to reduce and set free the gold that is part of it. Gold is not the only valuable product of these sea sands, for platinum exists there even more abundantly, tests having shown four ounces to the ton of it, and platinum was half a century ago even more valuable than gold. It is still worth \$4 an ounce, he said, and greatly in use to make electric light wire. The black sand of this ocean beach also contains gold in combination, and will be saved by itself, and if necessary sent to England for reduction. In fact, my traveling companion had only come to interest me in the treasures that line the ocean shore by the waters of the Coquille, when the engine gave a shriek that woke the night echo among the Umpqua hills, and the brakeman called out my station, so I can only give a kaleidoscopic glimpse of the subject. Among the treasures of that shore he said rubies exist in profusion. Occasionally a "gem of parent ray serena" is disclosed to be made much of and ennobled the world, but an inferior article is found among the sands that answers the demand of this utilitarian age, to be ground fine and furnish diamond dust for various uses.

It would be incomplete not to add that he spoke of a mountain of rich iron ore as being a near neighbor and possible source of future

wealth. In recently alluding to the natural wealth of southeastern Oregon it might have been included that mountains of most beautiful marble are found, and will some time supply the western world; also that quarries of the finest building stone exist along the ocean shore as well as in the interior. Several of these locations of fine building stone were sold at speculative prices to California capitalists years ago, as I remember hearing. S. A. CLARKE.

To Aid Digestion take one Small Bile Bean after eating. 50c. per bottle.

(Cooks Bay News.)
John Ward has severed his connection with the sheriff's office, and J. C. Stanley is deputy now.

The Manzanita called into the bay Friday. She is hunting for information regarding the missing ship Ivanhoe.

John Youkam brought a burbank potato to town Saturday, which is the best spud yet reported. It was raised on the old Youkam home stand on South Coos river by Morris & Condron, and weighed 6 1/2 pounds. It was placed on exhibition at Sengstacken's.

Roseburg Review.—Ex-Sheriff B. C. Agee tells us that the price he received for his prizes was \$4 for Petite and \$4 for Italians and Silvers. This includes all his fruit regardless of size, and is the net price, sacks furnished him. He has probably 150,000 pounds.

Roseburg Review.—B. C. Agee and E. E. Weekly are establishing a creamery in Happy Valley, and will probably put in a good sized plant in the spring. This is a step in the right direction, similar enterprises having proven a great success in Coos county. They distribute a great deal of money in the neighborhood in which they are situated.

Prevent and cure Constipation and Rick-Headache. Small Bile Beans.

Forty Years Ago.

Glen Aiken is engaged in the coal business, and at present is filling orders from the Beaver Mill mine. When supplying a patron Monday, he said that hauling coal brought him back to old pioneer days, when he was one of a company who opened the Boatman bank, and hauled the first load of coal ever shipped from Coos bay, just forty years ago. The members of the company engaged in that enterprise with him were his brothers James and John, Frank Ross, Dick Learn, B. F. White, Doc Gaddis and Sam Darlington. The coal was hauled with oxen from the mine to the head of Coal Bank slough, where a wharf had been built of poles. It was then loaded on lighters and taken to the mouth of the slough, near where the railroad depot now stands, where a vessel was waiting to receive it. James and Pat Flanagan, who were living where Empire now is, handled the cargo, and disposed of it in San Francisco.—Coos Bay News.

\$100—Reward—\$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and a lasting nature in doing its work. The proprietors have made application at once, if they have not already done so, to the U. S. Patent Office for a patent on this cure. Send for list of testimonials. Address: F. J. CHENEY & CO., Toledo, Ohio.

"Quite a change in the weather, isn't it?" "Yes," replied the Populist with a grin. "Greatest season for flops I ever saw!"

Dr. Price's Cream Baking Powder World's Fair Highest Medal and Diploma.

ALMOST A NEW YORK DAILY.

That Democratic wonder, the New York Weekly World, has just changed its weekly into a TWICE-A-WEEK paper, and you can now get the two papers a week for the same old price—\$1 a year.

Think of it! The news from New York right at your door fresh every three days—104 papers a year—and your home paper THE HERALD all for **Only \$2.25!**

G. A. R. NOTICE.

We take this opportunity of informing our subscribers that the new Commissioner of Pensions has been appointed. He is an old soldier, and we believe that soldiers and their heirs will receive justice at his hands. We do not anticipate that there will be any radical changes in the administration of pension affairs under the new regime. We would advise, however, that U. S. soldiers, sailors, and their heirs, take steps to make application at once, if they have not already done so, in order to secure the benefit of the early filing of their claims in case there should be any future pension legislation. Such legislation is seldom retroactive. Therefore it is of great importance that applications be filed in the departments as early as possible dates. If U. S. soldiers, sailors or their widows, children or parents, desire information regard to pension matters, they should write to the Pension Claims Company, at Washington, D. C., and they will prepare and send the necessary application, if they find them entitled under the numerous laws enacted for their benefit. Address: PENSION CLAIMS COMPANY, 1000 Broadway, New York, N. Y.

DR. PRICE'S CURE FOR COUGHS, BRONCHITIS, AND CONSUMPTION. SURE WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use as Directed. Sold by Druggists.

"For Years,"

Says CARLIE E. STOCKWELL, of Chesterfield, N. H. "I was afflicted with an extremely severe pain in the lower part of the chest. The feeling was as if a ton weight was laid on a spot the size of my hand. During the attacks, the perspiration would stand in drops on my face, and it was agony for me to make sufficient effort even to breathe. They came suddenly, at any hour of the day or night, lasting from thirty minutes to half a day, leaving me suddenly; but, after several days' rest, I was quite prostrated and sore. Sometimes the attacks were almost fatal. After about four years of this suffering, I was taken down with typhoid fever, and when I began to recover, I had the worst attack of my old trouble I ever experienced. At the first of the fever, my mother gave me Ayer's Pills, my doctor recommending them as being better than anything he could prepare. I continued taking these Pills, and so great was the benefit derived that during nearly thirty years I have had but one attack of my former trouble, which yielded readily to the same remedy."

AYER'S PILLS
Prepared by Dr. J. C. Ayer & Co., Lowell, Mass.
Every Dose Effective

THE NATIONAL TRIBUNE.
WASHINGTON, D. C.

For the Year 1894
It will be made much better and more attractive than ever, while retaining all of its present popular features. It will be constantly and new ones.

ITS FEATURES.

War History, by men who actually served and fought in the struggle.
Sharp Notices of Romance, Travel, Experience and adventure, by leading writers.
Editorial opinions of the ablest of the veterans, and maintaining the highest loyalty to the Government, and the promotion of the best interests of the whole people.
Washington News. Full accounts of what is taking place at the seat of Government, careful reports of all important matters in Congress and the Executive Department, a complete and up-to-date record of the proceedings of the National House of Representatives. Edited by a staff of National reporters.
G. A. R. News. Full accounts of the doings of all National and State organizations, carefully edited by practical men.
The National Tribune is strictly non-partisan, and is published for the benefit of the people, and the highest interests of the Nation. It is the most widely read and most influential of National papers, and is published weekly.

Price \$1 a Year Payable in Advance

It claims to give more and better matter for the sum of two cents a week than any other publication. Every line is a gem in its kind, and it is a pleasure to read it.
