Hill, Chairman, Riverston. " 8—M. W. W. G. and Treasurer, Coquille City. " 9—J. SPANLEY, Sec., Empire City.

Before the law was written down with parchment or with pen; Before the law made citizens, the moral law made men.

BRABSTER WEST'S LETTER. The Political Pot Boiling—Grover wants a Third Term—Another Sample of Corruption—Congressmen Preparing to Receive Their Constituents—Grover sued for Damages.

The political pot is boiling over and no one appears satisfied with the situation but the McKinley crowd, who are already licking their chops in anticipation of the feast at the government pie counter, of which they dream of night and think by day.

John Reed, the Maine statesman, who, knowing that Grover Cleveland had no greatness of soul or intellect, but simply greatness of girth, set out to emulate Grover in that respect, and thus hoped to gain the presidency; even Reed, who erstwhile in his holiday strutted about the capitol like a game rooster; even Reed concedes the nomination of McKinley and is considering whether he shall take the vice-presidency, with the off chance of McKinley flying the coop before his term expires, or whether to accept the offer of the Wall Street gang and practice law in New York, play the go-between of Morgan and McKinley, as Stetson did for the first-named and Cleveland, become rich and be the candidate of the goldbugs in 1900.

The gold Democrats are very depressed and the silver wing of that party is correspondingly elated over the probability of the Chicago convention being controlled by the latter. To silver Demo's even go so far as to claim that the People's party will endorse their ticket, but the Populists in Washington wink the other eye. "Once bitten, twice shy" is their motto this year.

The Democratic leaders have a great record of broken promises, and Grover is not the only Democrat who is capable of betraying the people after election, so the Pops do not propose to go, horse and foot, into the Democratic camp and become beavers of wood and drawers of water for a parcel of professional politicians. However, the gold power will control the Chicago convention and then the silver Demo's can show their colors if they place principle above party by aiding the Populists to nominate two honest men at St. Louis on July 22d.

The obese accident who serves Rothschild and considers himself a man of destiny is fatuous in his belief that the nation, like a dog sitting on his haunches and begging for a tid-bit, is anxious for him to take a third term. When Postmaster Henshaw, of Chicago, said the other day that Grover would not be a candidate for renomination, the fat man was so mad that he went off his feet for a whole day, and gave out the following statement for publication: "President Cleveland has not told Postmaster Henshaw that he will not be a candidate for renomination; neither has he told any other person. He has written no letters on the subject and will not write any, though all kinds of inducements have been offered to him to express his intentions or desires in the matter of a third term. The reason for this is that the president has not yet entirely satisfied himself as to what he desires or intends to do."

Coy old Grover! The Wall and Lombard street usury shops, and their agents, the national banks, will enjoin, bulldoze, or bribe enough of the delegates to the Chicago convention to nominate Cleveland on a single gold standard platform. That self-sacrificing patriot will be fishing at Buzzards'

Bay when a deputation of similar patriots arrives to inform him that the Democratic party desires him to lead their pie-fattened forces against the common people who wish to subvert the beautiful system which keeps their vulgar noses to the grindstone while the new aristocracy of gold summers in Europe and fawns upon royalty.

Grover will try to reproduce the picture of Cincinnatus at the plow; will lay his pudgy right hand, soiled with the dirty work of signing bonds, on the roll of fat which covers the spot where his heart should be, and will exclaim: "I am the servant of the people. I accept the trust; I will continue to elevate the people of Europe by enabling the better classes of my country to spend millions amongst them annually, and will do all in my power to evangelize the lawless, uncultured people of the west and south, who dare to grumble at present conditions, when they should Christian-like realize that 'whatever is, is right.'"

A sample of the corruption in government circles came to light last week, when Cleveland appointed Napoleon J. T. Dana, of New Hampshire, First Deputy Commissioner of pensions. Dana is 74 years old. Two years since he was given a pension on the ground that he was 72 years of age and incapable of work.

In the debate preceding the grant of the pension, Gen. Sickles said of Dana: "He is wholly impoverished and unable to earn a dollar." Now he is sprightly enough to fill a responsible position and perform the labor of signing receipts for \$250 a month, besides drawing his pension. The affair is farcical; but such farces at the expense of the producers may lead to a tragedy.

Although there is no certainty as to when congress will adjourn, the members are beginning their campaign work. Senator Pugh will soon start for Alabama, to champion the cause of silver. It is said that he will join the reform forces at St. Louis if the goldbugs control the Chicago convention. Look out for Carl Browne. He has painted a new panorama on the financial question, and will take the field in a few days. He is ready to fix dates to exhibit and lecture at any point on the Atlantic seaboard until July 1st, when he will start on a tour of the south until the St. Louis convention, where he will land right side up with care. The commercial press has ridiculed Carl, but he has more brains and honesty than a dozen of the silk-hatted politicians who deceive the people.

Which reminds me that I was in a clothing store the other day and saw a well-known congressman in a cheap, hand-me-down suit and a slouch hat. As he is one of the most dour and proud men in congress, I was surprised, and asked him if he was going fishing. He laughed and replied: "Yes, fishing for suckers. I am going into my district for renomination, and have got to do the plain farmer act with the grangers." I dare say that walking-lie humbugs his constituents into the belief that he is one of themselves in policy and conduct.

A man in Cleveland, Ohio, has entered suit against Grover Cleveland for \$1675, which he claims he has lost in the last three years by the reason of Cleveland's failure to fulfil his promises of higher wages and better times. It would indeed be pleasant to see Grover forced to disgorge some of his millions.

MEXICO'S GOOD GOVERNMENT. British Minister Testifies to Her Prosperity and Commends It.

The S. F. Call of May 26th publishes the following interview with Sir Henry Dering, which will be of interest at this stage of the financial discussion:

Sir Henry Dering, Bart., British minister to Mexico, Lady Dering, Mrs. Canacho, wife of the mayor of the City of Mexico, and W. A. Dering, arrived here yesterday and are at the Palace.

They came by rail from the City of Mexico, the post of the distinguished English gentleman. Sir Henry is a large man, with dark hair, a brownish beard tapering toward a point, and with a large nose. He is a very pleasant, affable gentleman.

GOOD FOR EVERYBODY

Almost everybody takes some laxative medicine to cleanse the system and keep the blood pure. Those who take SIMMONS' LIVER REGULATOR (liquid or powder) get all the benefits of a mild and pleasant laxative and tonic that purifies the blood and strengthens the whole system. And more than this: SIMMONS' LIVER REGULATOR regulates the Liver, keeps it active and healthy, and when the Liver is in good condition you find yourself free from Malaria, Biliousness, Indigestion, Sickness, Headache and Constipation, and rid of that worn-out and debilitated feeling. These are all caused by a sluggish Liver. Good digestion and freedom from stomach troubles will only be had when the liver is properly at work. If troubled with any of these complaints, try SIMMONS' LIVER REGULATOR. The King of Liver Medicines, and Better than Pills.

EVERY PACKAGE Has the 2 Stamp in red on wrapper. J. H. Zetta & Co., Phila., Pa.

As a truthful and honest speaker Tongue is a total failure, but as a failure he is full 180 pounds.

It is a poor wind that doesn't blow a little good. Mud-Ball Bob hasn't struck us for a quarter since he commenced booming our local bankers for office.

The claim that Buckman is worth \$800,000 and pays taxes on \$250 in this county of course is a falsehood. The fact is Buckman has a farm in Clackamas county and the rent from it does not pay the taxes on the same. He has no money, consequently he does not live on interest; neither is he a bonus schemer. Do the Populists want a banker to go and make some laws for them? I should smile. He would raise your wages and farm products, and lower your interest right away, quick.

My purpose is to remain here some time, probably several weeks. I will go to Monterey and will visit other places of interest. It is not my purpose to go east. This is the first time I have been in this country.

"Mexico is very prosperous. One reason is that it has honest men at the head of the government. President Diaz is also exceedingly able as well as honest. I think the present administration will undoubtedly be continued for the next four years.

"Another very capable man is Minister of Finance Limantour. He is a man of vast wealth. He owns large property interests in San Francisco, as you doubtless know. With such men there is no incentive to be anything but honest. The result is that Mexico is splendidly governed.

"The Minister of the Interior, General Cosio, and General Mena, the minister of transportation and communications, are also full of energy and are effecting much good for the country.

"Business is good down there. It could not be otherwise when the purchasing power of the dollar is considered. All their wages are paid in silver and the produce going abroad is paid for in gold. No wonder the country is prosperous. It will continue to be so, too.

"Mexico has always had silver money, and the way she gives silver and takes gold gives her a natural protection. It is the very best protection, too, that a country could have. Wouldn't such a policy be good for any country? Yes, I think it would, especially if it could be carried out as successfully as in Mexico.

"It has been very dry in Mexico lately. There have been no rains, and it was so hot on the way up and through Arizona and California that we couldn't at any time keep the car under 95 degrees."

Sir Henry said he had intended being present at the banquet last night in honor of the queen's birthday, but his trying trip, combined with his rheumatism, would likely prevent it, much to his regret.

The Coming Nation: A big grocery store syndicate has been formed at New York, which will make the corner and village store look sick. It is stated that immense branches or agencies will be established in 164 cities. "They will buy goods by the millions of dollars' worth and no other dealer will be able to compete with them."

Union Printer: Carroll D. Wright, the national labor statistician, has figured out that the average rate of wages per year paid in the United States is \$347, and the average product of each laborer is valued at \$1888. This gives the employer 82.2 per cent, while the man who does the work and produces the results is allowed a paltry 17.8 per cent.

Our Marshfield Letter.

Mrs. H. Field, Or., May 24, 1896. ED. HERALD: We, the Pops (50 per cent of the audience), had the privilege of hearing the horse jockey from Washington county tell the Pops what their views are on the money and tariff questions. He says our views on the silver question are these: You want to go to the bank with 1 gold dollar and buy 16 silver dollars to pay your debts with. He simply discarded all truth in giving our tariff views. If I were to place the lies he told in brackets I would write his speech and place something like this [] at each end of it. He is as wise on some things here as he is in the valley, and one is this, he knew better than to meet a Pop in a political discussion. He is afraid he might run a-fool of another Jeffreys. We could get no talk with him here, though we were promised the privilege before we got here. But the wind changed when he arrived. We offered to pay half the expenses for 30 or even 15 minutes after he talked one hour, he to have all the time he wanted to wind us up. Our man, and who he was, worried them come, but they would have been worried worse if Tongue had met him.

As a truthful and honest speaker Tongue is a total failure, but as a failure he is full 180 pounds.

It is a poor wind that doesn't blow a little good. Mud-Ball Bob hasn't struck us for a quarter since he commenced booming our local bankers for office.

A SHORT TALK ON MEDICINE OF GREAT INTEREST TO WOMEN.

Pale Cheeks and Nerveless Hands are no Longer Admired. To be Strictly Correct you must have Rosy Checks and Good Health.

Men Admire Wholesome-looking Women, and now Seek their Wives from that Class.

A FEW POINTERS FOR THE GIRL OF THE PERIOD.

Pure blood is the secret of health and beauty. The features may be regular, the form perfect, but no woman can be beautiful in the full sense of the word while suffering from any of the peculiar ailments of her sex. Disease destroys the complexion, is productive of wrinkles and premature old age. If you notice any of these symptoms, it is to every woman's health, and it is this function of life is checked. Give up a pale and sallow complexion, and a feeling of exhaustion, are the result. The monthly secretion must continue from puberty to the turn of life without unnatural obstruction. Any breach of this law of Nature will result in the distressing symptoms which make the lives of seven-tenths of the women of this country miserable, almost unbearable. A few of these symptoms are severe headache, loss of appetite, pale or sallow complexion, palpitation of the heart, swollen ankles or legs, nervousness, offensive breath, etc., etc. The sufferer may exhibit one or more of these symptoms, or may have all. They simply indicate the ravages disease has made upon the system, and the more of the symptoms the patient shows the greater the necessity for prompt and persistent treatment, until they have been banished and the bloom of health is restored.

Dr. Williams' Pink Pills are the only unfailing remedy. They positively cure all suppurative and inflammatory diseases, and, if neglected, inevitably entail sickness and trouble. By taking these pills for a week or ten days before the expected return of each period, the prompt appearance of "the visitor" is insured. For suppurative diseases, the pills must be taken steadily until the responsiveness takes place—generally in a month's time, sometimes less. Follow the directions on the pamphlet about each box. Nursing women will find their milk improved in quality and quantity by taking these pills, and also obtain relief from pain in the back and general discomfort feeling. All displacements from weakness of the uterine ligaments are speedily relieved and completely cured by the use of these pills. Leucorrhoea, bearing down, weight in the pelvis, and all female weaknesses, find speedy relief from the administration of the Pink Pills for Pale People.

The most critical period in the life of a woman is that shortly after the cessation of menstruation, or, as it is most generally termed, the change or turn of life. The symptoms attending this period are fainting spells or attacks of dizziness, headache, general debility, exhaustion, a feeling of melancholy, hysterical pain in the loins or limbs, hyperaesthesia, etc. The change is a gradual one—for better or worse—for the former if the patient is wise enough to fortify the system against the ravages of the symptoms attending the change. For this purpose no remedy ever discovered equals Dr. Williams' Pink Pills. They purify the blood by acting directly upon the sexual system, lessen the severity of this critical period, and finally leave the patient in the enjoyment of robust health. All ladies approaching this critical period should take Dr. Williams' Pink Pills.

PALE AND SALLOW GIRLS. What can be more distressing than to see a girl drooping and fading in the prime of youth? Instead of bright eyes, glowing rosy cheeks, and an elastic step, there are dull eyes, pale, sallow, or greenish complexion, and a languidness of step that bespeaks disease and an early death if proper treatment is not promptly resorted to, and persisted in until the impoverished blood is enriched, and the functions of life become regular. Upon parents rests a great responsibility at the time their daughters are beginning into womanhood. If your daughter is
