

THE LABOR EXCHANGE.

THE LABOR EXCHANGE.

Its Importance, Magnitude and Possibilities. Getting Back to First Principles.

Mrs. J. B. Milhollin, in the Grandeur Age, says of the Labor Exchange:

Unhesitatingly give it as my fullest conviction that the Labor Exchange is the most practical and comprehensive scheme for the emancipation of the human race that was ever presented to the minds of men.

I say practical, because it comes right to our very doors, no matter where we may be located. We do not have to go to it—as to co-operative colonies—but it comes to us, bringing the possibility of employing ourselves all we will, and insures bread in proportion during life.

It brings liberty, because we do not have to ask task-masters for these blessings neither do we have to go to the city of Washington for them. I repeat, it brings liberty, because it practically emancipates from the present tyranny of our government. What have we been asking at the hands of our government—is it more laws? Surely not, when they are ground out to us 2500 strong every year. We are completely snowed under by laws. There are scarcely numbers sufficient of the classes to execute those laws on the masses! We are not needing more governing as a people, but we do need bread enough to govern our hunger.

Then what is it that Coxey and Debs and all our great reformers are requiring as the bounty of our government? Is it not employment of the idle to insure bread to the hungry? Have they got it, or is there any chance for them to get it? Then come into the Labor Exchange, where all these blessings can be obtained, without money and without price, if you only take hold of salvation when it comes right to your very hand.

I say it is comprehensive, because of its capacity to carry the whole human race through the entire journey of life. It affords ample opportunities to the black man, the brown man, the red man, and the yellow man as it does to the white man. The Labor Exchange sounds the first trump of freedom, and through it in a few short years we shall see all great obstacles to human progress as completely annihilated as are now the walls of Jericho. I repeat, comprehensive, because it is the all-sufficient and only practical foundation on which to establish all other reforms. On it we can complete the beautiful structure of socialism, the grand co-operative commonwealth, and tow the bark of equal suffrage from the muddy waters of politics. The Labor Exchange makes possible all the Utopias and beautiful dreams of the seers of the past.

The Labor Exchange will carry on its bosom the first complete brotherhood of mankind the world has ever witnessed—The completed ideal of Christ: "Peace on earth, good will to men." And women, too; I must not forget that!

The Labor Exchange check is issued on real values of labor deposited in the association and is always redeemed in the products in its possession. Money deposited there is regarded on an equal with merchandise and can always be secured in exchange for checks if any in stock.—Express.

Labor Exchange checks issued on home manufactured goods are a better protection to home industries than all other means ever tried. The checks are intended to circulate locally and will not go away of somewhere else and help kill home manufacturers.

Denver Branch 158 of Labor Exchange has published and distributed, free of cost, 5000 copies of Edward Irving's "Concentration of Wealth," a 40-page pamphlet full of truths about present conditions and how to cure them.

The government should foreclose its mortgages on the Pacific roads, but it should see that there is no dead African in the wood-pile when the sale is made.

Why follow a precedent that was made when conditions were entirely different? We should progress in the science of government as well as in the arts.

Don't be a clam. Study Labor Exchange methods and then help put them into use. No person will be injured by acquiring more knowledge.

Capital is but the child of labor, but it seems to have taken possession of the ranch and orders its parents around without ceremony.

The Labor Exchange methods can be applied to any of our everyday transactions.

Whoever does not work is a drone—consuming the products of another's labor.

Deny men justice and they become hatless slaves or dangerous fiends.

LOCAL ITEMS.

Will Price was up from Riverton last Thursday.

John Quick was up from their dairy ranch last week.

Don't forget the bon-bon ball at Masonic hall next Saturday night.

Miss Eralie Tyrrell, of Bandon, was seen on our streets last Wednesday.

Sheriff Gage was in this valley on business last Wednesday and for a day or two following.

Superintendent Hennessy, of the Newport mines, made a trip to San Francisco last week, on business.

The traveling public will find it to their advantage to patronize the livery-stable of J. S. Hayes, when at Empire City.

John Giles sold out his market stand at Riverton and returned with his family to Myrtle Point last Wednesday.

Mr. Nicholson, civil engineer and surveyor from the bay, was in this locality last week finishing up for the government some geological surveys.

The Riverton school has secured the services of Prof. Kinnicut and daughter for another term. The school starts off with an enrollment of 165 scholars.

Mrs. Zevely, son Robert and daughter, Miss Pearley, made a trip to Riverton last Wednesday on a visit. Mr. Zevely works at one of the mines there.

L. L. Dietz, a practical watch repairer, will soon open a shop in Coquille City—in the meantime will do all kinds of repairing at home, at the Judge Nosler residence.

HOMES—Several desirable and low-priced pieces of property not in our advertised list, and several town lots, way-down in prices, have been placed in our hands for sale. Call quick.

WANTED—A good dairy ranch, on or close to the river; enough land to have 30 to 40 head of cows. Address the HERALD, Coquille City, stating location and best terms to a good tenant.

Henry Sengstacken came over last Wednesday and transferred the Wells-Fargo Express Co's office from Mr. Lorenz's to Lyons' store. W. S. Perry, we believe, takes the management here.

Mr. and Mrs. Charley Lavine were down from Myrtle Point last week and spent several days at Mrs. L's father's, Jonathan Quick. Mrs. L. also visited the ranch on the lower river a day or so.

Mrs. C. W. Perry, an elderly lady who made her home in California with our new towns-people, Mr. and Mrs. F. A. White, arrived in this place last week and resumed her residence with these good people.

Uncle Bird Vowell came up from Bandon last week, and spent several days on business and rest. The HERALD had a pleasant call. Uncle Bird is now 71 years old, and yet in good health and works six acres thoroughly. He says he can climb his trees and saw off the top limbs.

The HERALD is authorized to offer a sewing machine that is equal to the best and less than one-third the cost of others to the public. The "Improved New High-Arm Arlington" is offered on a 30-day trial, and is warranted for 10 years. Read our advertisement, on last page.

A Mr. Black and Mr. Wilson moved to this place from Beaver Hill last Wednesday with their families. Each have bought properties here—one from A. L. Nosler and the other from Will Sogg—in the north part of town. They will take a hand in developing the coal mines at this place.

There are some people who are never positive in anything. It is always, "I don't know," or "I guess so." There is a world of such people, and it is refreshing sometimes to hear a person speak as one having convictions, like Mr. Chas. F. Snyder, of Bangor, Pa., who wrote: "I can heartily recommend Simmons' Liver Regulator to all who are troubled with Dyspepsia or Liver Complaint."

The little steamer, "Ralph," was launched last Thursday at Myrtle Point. Her dimensions are 50 feet by 11.6 over all, with a 10.4-foot beam. Her passenger cabin is a beauty and comfortable. It is 12x6 feet, of neat panel-work, stained, varnished and finished like street-car work. The pilot-house is 6x8, and furnishes a vantage point for viewing the river scenery. She will be temporarily supplied with the machinery from the Camtex, though she should be supplied with double the power, and possibly will shortly be fitted with new Westinghouse 20-horse-power engine. She is a 17-knot model. The painting was done by a Mr. Wilson, of Portland, we learn, and is said to be a good job.

Teacher—What animal attaches himself to man the most? Johnny Thickhead—The—er—er bulldog, ma'am.

D.W. MARION, President of the Swamp Angel Medicine Co. Warm by Condensed Fish Life.

Two years ago, at 38, I was a consumptive, dyspeptic, emaciated, debilitated, ailing man, weighing but 120 pounds. Now, at 40, I weigh 170 and am in perfect health. Each are the wonderful results of using Swamp Angel Medicine for two years when every symptom of disease showed themselves.

When the scientific men of the world, and all the health boards of the large cities informed the public that consumption, and the most malignant and fatal diseases, were caused and produced by living bugs, germs or microbes, I then determined to find a germ or microbe killer, in the entire lot of medicines every preparation on sale for throat troubles, bronchial affections or consumption. I could not find a germ or microbe killer in the entire lot of medicines. I then commenced experiment with naphthal, and produced a medicine similar in effects to Ely's naphthal. While my medicine was very strong, yet, I could drink it like water. I then bought and tested every preparation on sale for throat troubles, bronchial affections or consumption. I could not find a germ or microbe killer in the entire lot of medicines. I then commenced experiment with naphthal, and produced a medicine similar in effects to Ely's naphthal. While my medicine was very strong, yet, I could drink it like water. I then bought and tested every preparation on sale for throat troubles, bronchial affections or consumption. I could not find a germ or microbe killer in the entire lot of medicines. I then commenced experiment with naphthal, and produced a medicine similar in effects to Ely's naphthal. While my medicine was very strong, yet, I could drink it like water. I then bought and tested every preparation on sale for throat troubles, bronchial affections or consumption. I could not find a germ or microbe killer in the entire lot of medicines. I then commenced experiment with naphthal, and produced a medicine similar in effects to Ely's naphthal. While my medicine was very strong, yet, I could drink it like water. I then bought and tested every preparation on sale for throat troubles, bronchial affections or consumption. I could not find a germ or microbe killer in the entire lot of medicines. I then commenced experiment with naphthal, and produced a medicine similar in effects to Ely's naphthal.
