Miss Mamie Millard occupied the pulpit at the little church last Sunday night, as per previous announcement. The subject was "Heaven," which she treated in a very pleasing and edifying way; not so much in a literal sense, by location and measurement, but rather as "home," for which the best years and can only attain to in the simple manner provided for in the gospel. Her remarks were scriptural and very pleasantly spoken, and without effort at oratory. The room was full to overflowing, many not even being able to get into the building. As her address was brief, not over half an hour, Prof. Millard added a few thoughts.

The excursion from Bandon last Sunday, per steamer Dispatch, was a very large affair, as many as 120 persons coming. There were many at other points on the lower river who were disappointed. The morning was cool and blustery at Bandon when the excursionists left, but on arrival here at 10:30 o'clock they were given a "warm" reception, the thermometer marking between 85 and 90 degrees. It was the warmest day of the season, unusually warm for April, and will rival anything we can furnish during the whole summer. However, the excursionists enjoyed themselves fairly well and had a pleasant outing. The only source of entertainment provided was a tramped-up game of baseball by a volunteer nine from Bandon and this place. This began about 1:30 p. m. and continued till the boat whistled to depart, about 3 o'clock. The game stood, at quitting, 18 to 6 for the Coquille boys.

The Mount Lebanon Shakers have recently perfected an ingenious cure for dyspepsia. Their Digestive Cordial consists of a food already digested and a digester of foods happily combined.

The importance of this invention will be appreciated when we realize what a proportion of the community are victims of some form of stomach troubles. Thousands of pale, thin people have little inclination to eat, and what they do eat causes them pain and distress.

This Digestive Cordial of the Shakers corrects any stomach derangement at once. It makes thin people plump. Every one will be greatly interested to read the little book which has been placed in the hands of druggists for free distribution.

Holes in Your Health.

What does that mean? Suppose you are taking in money all day, and drop it into a pocket with holes; you will find yourself a loser instead of a gainer by the day's business.

Same with your health. You eat and drink and sleep, yet lose instead of gain strength. There's a hole in your health. Some blood disease, probably, sapping your vitality. You can't begin, too soon, to take the great blood purifier,

Now that we have assurance from headquarters that the steamer Coquille River is to make regular trips direct between Bandon and San Francisco, it would be well for the merchants and others of the whole valley, who contemplate shipping goods or going as passengers, to patronize our own steamers and thus to help build up a lucrative business for the boats. We can expect the Coquille River once again, and as this will be rapid enough to accommodate all you ought to see to it that our part of the county should get credit for the products she raises and ships.

Albert Odell, a prominent citizen of Dayton, Oregon, is visiting in this county and has spent several days in this place, representing the Oregon Fire Relief Association at McMinnville. This is a mutual fire insurance corporation, furnishing its members fire insurance at actual cost, upon the same principle that the orders of Woodmen, Workmen, etc., furnish life insurance. It was organized in 1894 by citizens of the lower Willamette valley, and they find a great saving over stock company insurance, besides it keeps all their money at home. We hope Mr. Odell will be successful in establishing his business in Coos county. It is just in line with the reform principles which the HERALD advocates, and in that particular channel will be a great step for the benefit of the people.

Rumblings from Rural.

Rural, April 24.—The beautiful sunny weather of the past week enables the farmers to start their plows, and they made good use of the time during the continuance of the delightful weather, but before they got their crops in and the gentle April showers set in and stopped the plows for a few days. But during the showery weather the farmers were not idle, for they put in most of the time improving the roads.

The citizens of the North Carolina settlement are putting in a great deal of volunteer work on the roads this spring, and making great improvements on them. Darius Gant has not only put in a considerable amount of volunteer work himself, but has hired several hands to work on the roads. Now, if all our moneyed men would follow the example of Mr. Gant, a huge wave of "prosperity" would soon roll over our lovely valley, sure enough, whether it would be the wave President McKinley promised us or not. Good roads are of incalculable benefit, and speak well for the inhabitants of any community through which they pass. But how can we have real and lasting prosperity with one half of our money of final payments demoralized? My old home county in North Carolina which had the lands of the delinquent taxpayers of the county advertised for sale for the taxes due on them. There are about 6000 voters in the county, and about 2000 farms advertised for sale for taxes! Is not such a state of things that enough to prove to anyone who has common sense and a particle of judgment, that the single gold standard is the prime cause of all this privation and suffering among the laboring classes? The single gold standard has already proved to my satisfaction to be a complete failure. I notice that there is some talk of another issue of bonds at no distant day. Why not coin all the silver now lying idle, and put it on an equality with gold as it was prior to 1873? If our rulers would only do this and put the money in circulation, it would not only put an end to the necessity of issuing bonds, but it would restore "confidence" among the people and such a wave of prosperity would flow over our country as has never been seen since the days of bimetallicism prior to 1873. Yes, silver must be restored to its original place in our monetary system, and the sooner it is done the better. RU-RAL.
