OF INTEREST TO THE PEOPLE.

An Extract from a Letter from the Devil.
To the political fools in the
United States--My Dear Huckle-
berries: I will try to write you
something you can understand. I
made a bet with the "man in the
moon" the other day that I had the
greatest aggregation of fools on
earth that was in the whole plan-
etary system. The test of this bet
was that I was to tell you fellows
how big fools you are and if you
keep right on doing the same thing
I was to win; if you quit it he was
to win. Now I'm not a bit afraid
of you fellows, so here goes:
In the first place, I want to call
your attention to the existence of so
much poverty around you. The
United States is the richest country
in natural resources on the earth
and that which labor produces con-
tributes to the life and comfort of
the people. Now thousands and
millions of you people have nothing,
while others have more than they
can use to save their lives; and you
fellows just keep denying your-
selves and taking from the needy
and adding more to these great
piles that belong to the rich. That
is to say, you fellows who work hard
give your earnings to the fellows
who don't work. Now in all the
wilderlands of Asia and Africa there
is not a tribe of monkeys that would
do such a foolish thing, but you
fellows will go right on doing it and
I'll win my bet.
Take the Pacific Railroad matter;
you fellows gave in bonds more than
enough money to build the roads.
You gave the companies sixty mil-
lions of dollars worth of land besides.
Then you allowed the company to
borrow thirty millions of dollars to
divide up between the pirates and
consented to take a second mortgage
on the road to secure what they
owed you. Now you are going to
let them swindle you out of more
than half of what they owe you.
No business man was ever under any
circumstances as big a fool as this,
but you will go right on voting to
keep in power the parties that are
responsible for the whole thing,
instead of snatching the pirates
bald headed, taking all the property
they have, and if you "peep,"
putting them in jail at hard labor.
Anybody that got a little bit of
sense knows that business is dull
when there is no money with which
to transact it.
That money is only a ticket to
facilitate exchange and that the more
of these tickets you have the more
convenient it is to do business. You
fellows had some fathers that had
some sense. They provided in the
constitution that congress alone had
the power to create or make money
and to regulate its value. If one of
you common fellows was to make
any money you would be put in
jail. But you have voted that the
government shall not make any
more money, except out of a little
gold, and that the banks can issue
and control the paper money and
you fellows pay them two prices to do
it. * * * You fellows pray that the
"earth may be as the kingdom of
heaven," yet you license bawdy
houses and saloons, cheat your
neighbors of week days, expecting
to be forgiven on Sunday; vote for
bad and corrupt men in office, talk
about your neighbors, vote to in-
crease poverty instead of decreasing
it and think a mere form of religion
is all that is necessary to carry you
to heaven "on flowery beds of ease."
The fool killer has just come in
and says he'll "go partners" with
me if I'll raise the bet with the "man
in the moon." I think I'll do it.
Yours, till I get you.
SATAN DEVIL.

Oregonian: Settlers who have
already located claims on unsurveyed
lands will be pleased to learn that
there is now the sum of \$20,000
available for surveys on application
from such settlers. All set-
tlers who want their claims sur-
veyed should file applications with
the surveyor-general by whom
blanks and all necessary informa-
tion will be furnished on applica-
tion. As many applications as
possible should be sent in, as it
is hardly worth while to undertake
the survey of only one or two
townships. Applications should
be filed as early as possible in
order that bids may be advertised
for and contracts let so as to have
the surveys made as early in the
spring as the weather will permit.

The proposition, submitted by
German capitalists, to build a sugar
factory near La Grande, is in effect:
that in consideration of a subsidy
of the value of \$100,000 and 60
acres of land for a building site,
the company will build and equip
a factory with a capacity of 500
tons of beets daily with the best
and latest machinery for converting
beets into refined sugar. One of
the conditions is that there shall
be furnished the product of 3000
acres of beets for a period of 5
years, and the company is to have
90 days in which to complete
arrangements for securing machin-
ery and making other preparations
for building the factory.

If the weather office at Wash-
ington is going to prove that hot spells
have the effect of increasing crime,
its attention is respectfully called
to Aug. 20 in St. Louis, when a
cold wave struck that place. On
that date five people committed
suicide there, four persons were
run over by trains, six wives were
brutally beaten by their loving
husbands, three men went crazy,
two women pulled each other's
hair in the streets, one brother
shot the other, a prominent citizen
was found with his skull crushed,
a woman was bitten by a horse
and two men furnished meals for
mad dogs, besides a number of
other things of lesser importance.

H. Russell Ward, the eccentric
Englishman who recently eloped
with the wife of millionaire J. R.
Bradbury, of Los Angeles, is dead.
His body was found beside the
railroad track in Iowa Thursday
night. It is generally believed
that he committed suicide by
jumping from a car window, al-
though he may have fallen off.
Passengers on the train say he
acted crazy during the trip. The
body was not mangled, but
there was a deep cut in the fore-
head that caused death.

Recently a small boy ate butter-
cups and as a result died. Since
then there has been published a
list of poisonous wild flowers,
popularly considered harmless,
but certain to be fatal if eaten by
a careless person or ignorant
child. These flowers are butter-
cups,celandine, wood anemone,
daffodils, narcissus, lily, snow drop,
jonquil, wild hyacinth, monk's
hood, foxglove, nightshade, triony,
mezerone and henbane.

Roseburg Review: The Finan-
cial Review, whatever that is, of
Washington, is sending out ad-
vance sheets of articles on finance
to be absolutely non-partisan, and
the Review is asked to use the stuff
as editorial matter, free of charge.
It seems to be one of Mark Hanna's
schemes to fool the unsophisticated
(?) newspapermen.

The fourth annual exhibition of
the Southern Oregon District Agri-
cultural association begins at
Medford, Tuesday, September 21st,
and will continue five days; \$1800
will be offered in premiums, and
\$1600 in purses for trials of speed.
The whole is under the manage-
ment of W. T. York, the secretary.

WANTED--TRUSTWORTHY AND
active gentlemen and ladies to travel
for responsible, established house in state
of Oregon. Monthly \$25.00 and expenses.
Position steady. Reference. Enclose self-
addressed stamped envelope. The Domi-
nion Company, Dept. Y, Chicago.

Why Is It?

Some find work where 't was not,
And so the weary world goes on,
I sometimes wonder which is best,
The answer comes when life is gone.
Some eyes sleep when some eyes wake,
And so the weary night hours go,
I sometimes wonder which is best,
The answer comes when life is gone.
Some find work where some find rest,
And so the weary night hours go,
I sometimes wonder which is best,
The answer comes when life is gone.
Some find work where some find rest,
And so the weary night hours go,
I sometimes wonder which is best,
The answer comes when life is gone.
Some find work where some find rest,
And so the weary night hours go,
I sometimes wonder which is best,
The answer comes when life is gone.
Some find work where some find rest,
And so the weary night hours go,
I sometimes wonder which is best,
The answer comes when life is gone.
Some find work where some find rest,
And so the weary night hours go,
I sometimes wonder which is best,
The answer comes when life is gone.
Some find work where some find rest,
And so the weary night hours go,
I sometimes wonder which is best,
The answer comes when life is gone.
Some find work where some find rest,
And so the weary night hours go,
I sometimes wonder which is best,
The answer comes when life is gone.

The Herald's Report of the Teachers' In-
stitute at Band, August 24-26, 1897.

The many teachers of Coos county
from the bay and Coquille river as-
sembled on board the steamer Dis-
patch, Monday, en route for Band.
Many were the songs and merry
laughters that rang out over the
waters as we were being carried to
Band--"That beautiful city by
the sea."
We were met at the wharf by
Superintendent Barklow and many
others who came to bid us welcome
to their city.
Monday evening we were given
hearty greetings at the hall by Rev.
Scott, who presented, in a most
friendly manner, an address of wel-
come in behalf of the people of
Band. In the absence of Prof.
P. L. Campbell, Prof. F. A. Golden
made the response, making the
audience laugh most heartily at the
expense of the teachers. Prof. L. R.
Traver rendered a vocal solo which
was highly appreciated. The en-
tertainment closed with music by
the orchestra.

The regular institute work began
Tuesday morning at 9 o'clock with
thirty-two teachers present. Ses-
sion was called to order by Supt.
Barklow, followed by singing.
Committees were appointed. Prof.
Campbell being absent school man-
agement was dropped.
The subject of reading was taken
up by Prof. L. R. Traver. He began
with the primary work, recom-
mended the use of objects very
extensively in this grade, also script
writing, which should be taught
from the first.

Wednesday he extended the work
through the intermediate grade.
His main object was to gather
thought quickly, then there would
be little trouble in expressing it.
Thursday he began by giving
some good instructions on organiz-
ing and managing schools. He
finished his subject by carrying it
into advanced reading and elocu-
tion. His work was very instructive
and showed it had been carefully
prepared.

In the absence of Profs. Camp-
bell and Knight, Prof. Traver kindly
consented to take up the subject of
history and penmanship. The able
manner in which they were pre-
sented showed his executive ability
in those studies, as he had so little
time to prepare his work. He was
thoroughly conversant with them
and could successfully assist the
superintendent in whatever branch
he was called upon to discuss. The
work done by his pupils at
Myrtle Point is very commendable.

Prof. W. D. Reedy presented the
subject of physiology. On the first
day a splendid outline was placed
on the board. The outline was pre-
pared by the teachers for the second
day's recitation.
On the last day the work was
brought to a successful close. The
teachers feeling that Prof. Reedy's
work had been thoroughly prepared.
That it covered the entire subject
and was unusually instructive.
The lecture by Prof. Reedy Wed-
nesday evening, "Some Thoughts
on Psychology," was the feature of
the evening. It contained some
very practical hints to teachers and
was well enjoyed by the large
audience present.

Geography was introduced by
Miss Alice Clinkenbeard. She first
brought out the natural boundaries,
then went into details. This caused
general discussion of various meth-
ods.
Miss Hanna Keeley, late of Phila-
delphia, gave a somewhat extended
discussion on the subject of draw-
ing in the public schools. She
dwelt upon the opportunities of
both teacher and pupil, the extent
of development, and the great ad-
vantage in the possession of the art
whatever the vocation in after life.
The beautiful language and clear-
ness of thought presented by Miss
Keeley will no doubt find their way
into the schoolrooms of all thus
fortunate in hearing her.

Prof. L. R. Edmunds very suc-
cessfully presented the subject of
arithmetic. Tuesday he took the

A SCIENTIST SAVED.

President Barnaby, of Hartsville College, Survives a Serious Illness
Through the Aid of Dr. Williams' Pink Pills for Pale People.

From the Republican, Columbus, Ind.
County, Mich. Being of an ambitious na-
ture, I applied myself diligently to my work
and studies. In time I noticed that my
health was failing. My trouble was indigestion,
and this with other troubles brought
on nervousness.

"My physician prescribed for me for some
time, and advised me to take a change of
climate. I did as he requested and for some
improved. Soon after, I came here as pro-
fessor in physics and chemistry, and later
was financial agent of this college. The
change agreed with me, and for awhile my
health was better, but my duties were heavy,
and again I found my troubles returning.
This time it was more severe and in the
winter I became completely prostrated. I
tried various medicines and different phys-
icians. Finally, I was able to return to my
duties. Last spring I was elected president
of the college. Again I had considerable
work, and the trouble, which had not been
entirely cured, began to afflict me, and last
fall I collapsed. I had different doctors, but
none did me any good. Professor Bowman,
who is professor of anatomy and physiology,
of his experience with Dr. Williams' Pink
Pills for Pale People and urged me to give
them a trial, because they had benefited him
in a similar case, and I concluded to try
them.

The first box helped me, and the second
gave great relief, such as I had never ex-
perienced from the treatment of any phys-
ician. After using six boxes of the medicine
I was entirely cured. To-day I am perfectly
well. I feel better and stronger than for
years. I certainly recommend this medi-
cine."
To allay all doubt Prof. Barnaby cheer-
fully made an affidavit before
EMANUEL SCOTT, Notary Public,
Dr. Williams' Pink Pills for Pale People are
sold by all dealers, or will be sent postpaid on
receipt of price, 25 cents a box, six boxes
for \$2.50 (they are never sold in bulk or by
the 1.00) by addressing Dr. Williams' Medicine
Company, Detroit, Mich., N. Y.

A \$65.00 Machine
For \$18.50
Cash with Order and Coupon

The "Arlington" swings on patent sockets, firmly held down by a thumb
screw. Strong, substantial, neat and compact in design, and beautifully ornamented in gold.
Bed plate has rounded corners and is inlaid or counter sunk, making it flush with top of table.
Highest Arm--Space under the arm is 24 inches high and 9 inches long. This will admit the
largest skirts, and even quilts. It is self-opening--absolutely no holes to put thread through
except eye of needle. Shuttle lock, open on end, entirely self-threading, easy to put in or
take out; bobbin holds a large amount of thread. Shuttle together is at the back of the machine,
beneath the bobbin winder, and has a scale showing the number of stitches to the inch, and can be
changed from 8 to 32 stitches to the inch. Feed is double and extends to the end of the
needle. Adjustable bearings--All seem to move, movement is positive; no springs to
break and get out of order; can be raised and lowered at will. Automatic Bobbin Winder--For
filling the bobbin automatically without holding the thread. The thread is drawn in by the
needle, and runs while winding bobbin. Light Running--Machine is easy to run, does not fatigue the oper-
ator, makes little noise and sews rapidly. Stitch lets double lock stitch, the best for all
work, and will admit thread from 8 to 1000000 cotton without changing. Never gets out of order.
The Needle is a straight, fine needle, flat on one side, and cannot be put in wrong. Needle
Bar is round, made of case-hardened steel, with oil cup at the bottom to prevent oil from getting
on the goods. Adjustable Bearings--All bearings are case-hardened steel and are made so
that they will not run while winding bobbin. Light Running--Machine is easy to run, does not fatigue the oper-
ator, makes little noise and sews rapidly. Stitch lets double lock stitch, the best for all
work, and will admit thread from 8 to 1000000 cotton without changing. Never gets out of order.

work, and will admit thread from 8 to 1000000 cotton without changing. Never gets out of order.
The Needle is a straight, fine needle, flat on one side, and cannot be put in wrong. Needle
Bar is round, made of case-hardened steel, with oil cup at the bottom to prevent oil from getting
on the goods. Adjustable Bearings--All bearings are case-hardened steel and are made so
that they will not run while winding bobbin. Light Running--Machine is easy to run, does not fatigue the oper-
ator, makes little noise and sews rapidly. Stitch lets double lock stitch, the best for all
work, and will admit thread from 8 to 1000000 cotton without changing. Never gets out of order.
