Coast Mail: The expenses of bringing J. N. Russell out to the asylum was $110.30. This the taxpayers have to pay. There should be some means of making the hysterical idiots who signed the petition for the pardon of Russell reimburse the taxpayers.

Is that the only thing you find fault with and interpose a suggestion in the interest of the taxpayer for? Then you will begin with the court—judge, jury and attorneys—and the balance of your list of "hysterical idiots" will be made up of the taxpayers themselves. But that is your law in the case, the summum jus of succeeding Republican law-makers during many years back; but why lose your breath at that and have nothing to say regarding your county court and other officials and outside pullers right here at home violating both law and contract, by wresting the county's advertising from the official paper and giving it to a youthful agent and tool to go to Portland and have it set in type, then return with it and issue it in installments at a cost to the taxpayers of $377.82—or 25 cents per line—when the contracting parties would have performed the work at home for less than $5!

Baltimore News, September 9th: The Patent Record is the title of a richly illustrated and interesting monthly published in this city by the Patent Record Company, the September number of which makes an unusually creditable showing. There are special articles of value and interest treating upon topics of present moment, notably one by W. T. Stead on "The Cape to Cairo Railroad," and in addition might be mentioned those on "Telephony," "Electrolyptic Generators and Their Work," "Progress in Airships," "The United States Secret Service," and "The Scientific and Machanical Progress of the Nineteenth Century." The September number contains forty pages, and in addition to the special articles is crowded with interest for scientists, inventors and the general reader. The large two-page supplement gives an excellent picture of the new battle-ship Alabama and Kearsarge. The frontispiece affords an excellent view of the Olympia on her passage through the Suez Canal. The paper is devoted to the interests of American Inventors.

The trust conference in Chicago closed Saturday in a blaze of oratory, in which Colonel W. J. Bryan and W. Bourke Cockran were the central figures. Cockran followed the noted Nebraskan, but disclaimed any intention of debating the conclusions of his immediate predecessor, and declaring his complete concurrence in much that Bryan had said. The westerner had delivered the speech of the day during the forenoon amid frequent interruptions of tumultuous applause. Foulke, of Indiana, commenting on the speech, made assertions which Bryan desired further to discuss. He was requested to take the stage and complied for a second time, amid a wildly enthusiastic house. When the doors opened today the crowd that swarmed about the entrance amounted almost to a mob, and when Col. Bryan concluded his address 80 per cent left the hall, not caring to hear the other speakers.

The eight-hour working day and $2-a-day for labor law in New York city is in force.

Good Enough to Take.

The finest quality of loaf sugar is used in the manufacture of Chamberlain's Cough Remedy and the roots used in its preparation give it a flavor similar to that of maple syrup, making it very pleasant to take. As a medicine for the cure of coughs, colds, la grippe, croup and whooping cough it is not equaled by any other. It always cures, and cures quickly. For sale by R. S. Knowlton.

COOS COUNTY BOOMS.

Its Dairying Interests and Lumber Industry are Growing.

TO THE REVIEW: I have just finished a tour of Coos county and thought perhaps my friends would be pleased to hear from this coast county.

Dairying, the chief industry, is making rapid progress, and ranches which a few years ago were barely paying expenses are now, under the deft management of the dairymen, yielding a handsome income. Many separators are in use, thus leaving the milk to be used on the ranch again. They, too, realize that a good cow is cheaper than a poor one, and some of the finest herds I have seen in the west are right here in Coos county. Their creameries are a decided success, being fully equipped and well managed by competent men. Their butter commands the highest market price in San Francisco, and is all that a first-class butter can be. Some of the creameries run the whole yearround, while others close down in the fall and do not start up until spring, as some of the ranchers are not prepared to feed during the winter months, though winter milking is coming more and more into vogue.

The lumber interest is also picking up and logging camps are numerous, while every sawmill, excepting one, is running in full blast. Three schooners are under course of construction on the bay. One at North Bend, and another at Marshfield and a third at Ross' shipyard. These all bespeak of the return of prosperity and a bright future for Coos. Such industries give rise for a demand in the vegetable line, and the rancher calmly smiles as his loaded craft floats gently with the tide to a ready market place.

For the hearty welcome and hospitality received in our sister county, I extend to its people my most sincere thanks. MARK C. MUNSON.
