He was buried the following day at one of the Fishtrap burial grounds which is on the farm of his father. They went to the place and found where it struck, making quite a hole in the ground. The meteor has been dug up and is now on exhibition at the camp. The missile is of a pumicestone formation, being light enough to float on water, and the boys estimate the weight of it to be about one hundred pounds. It came down with such force that it went from six to ten feet into the ground.

In speaking of the large cherry tree at Norway last week we made a mistake and gave the circumference of the tree for the diameter. The tree is some three feet four inches in diameter instead of ten feet. It was an oversight on our part. We did not mean to outstrip George Washington in telling a cherry tree story or even tell a real Coos county whopper, but really made a mistake, which newspaper men so seldomly do, you know.
