J. C. Wilson, the machinist, received a new boiler from Norton & Cole Machinery Co., of San Francisco, by yesterday's train for his machine shop in this place. The one he has been using was rather small, and the fires required too close attention for his convenience, hence the change. The boiler formerly used is a good one and will be put in place in the Laird creamery by Freddie Von Pergert.

William Ross, at present a resident of Redland, California, but an early pioneer of Oregon, having lived in this state for many years, and as early as 1855 drove a band of cattle to Empire City for the government for the soldiers who were then engaged in subduing the Indians of this part of the coast, and on this trip the old gentleman, then a young man, saw something which interested him at the time, and which he has kept in mind, and on this occasion comes to investigate and see what it turns out to be. It is his opinion that it will prove to be asphaltum. We are hopeful that the old gentleman may not be disappointed and that something of great utility exists there and that he may rediscover it with general benefit to the section and profit to himself.

The home of Uncle Martin Miller, of the North Fork, was destroyed by fire on Tuesday evening. We are informed that the old gentleman was out in the field and saw that the house was on fire. On his arrival there he found Mrs. Miller up stairs trowing bedding and clothing out at the windows and he at once prevailed on her to get out of the house—in fact—carried her from the building in a fainting condition, just in time to prevent her from being burned. After he got her into the yard in a place of safety he returned to the house just in time to get the sewing machine out at the door, but nothing more. He then went to the window from which she had thrown the goods but all he could save was one quilt. This falls quite heavily upon these old people with whom all sympathize.
