You will waste time if you try to cure indigestion or dyspepsia by starving yourself. That only makes it worse when you do eat heartily. You always need plenty of food properly digested. Kodol Dyspepsia Cure is the result of years of scientific research for something that would digest not only some elements of food but every kind. And it is the one remedy that will do it. R. S. Port Orford Tribune: Sheriff Walker, and Bert Walker, arrived up from Gold Beach last Friday, en route to Salem with James Gibson, who had been adjudged insane. Mr. Gibson is a pioneer resident of Gold Beach, perhaps sixty years of age. He has been more or less an invalid during the past thirty years, and although until recently, of sound mind, has had the faithful care and attention of his brother, M. B. Gibson, during all those years. Last week he developed unmistakable evidence of insanity, and continued very violent up to the time he left Port Orford. His case is evidently hopeless, and the remainder of his life will be passed in the asylum.

A Composition on Editors.

A Pennsylvania schoolboy is said to have produced the following essay on the editor: "Newspapers are sheets of paper on which stuff is printed. The men look over the paper to see if their names isn't in it, and women use it to put on shelves. I don't know how newspaper men come into the world. I don't think God knows. The Bible says nothing about editors, and I have never heard of one being in heaven. I guess the editor is the missing link them fellows talk about. The first editor I ever heard of was the fellow who wrote up the flood. He has been here ever since. Some editors belong to the church and some try to raise whiskers. All of them, are liars, at least all that I know, and I know only one. Editors never die, at least I never saw a dead one. Sometimes the paper dies and the people feel glad, but someone else starts it up again. Editors never went to school because they never got licked.

Our paper is a mighty poor one, but we take it so ma can use it on our pantry shelves. Our editor don't amount to much, but pa says he had a poor chance when he was a boy. He goes without underclothes in the winter; wears no socks and has a wife to support him pa hasn't paid his subscription for five years and says he don't intend to."—Ex

\$100—Rewrad—\$100. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. Stuck Rich Digging.

Mrs. Joseph Fox received a letter, some time ago, written by her son, Ernest Fox, at Cape Nome, under date of Dec. 19th, 1900, in which he said that he and partners had made two unsuccessful attempts to reach Good Hope, in the Arctic, and that at time of writing they had secured an Indian guide and were about to make another attempt. News received last week from Nome by the S. F. Examiner says that Jim McTavish, Ernest Fox and Andrew Donnelly had returned to Nome from the Arctic on Feb. 17th, after Donnelly had both his feet badly frozen and his partners had to pack him nearly all the way back.

McTavish and his partners were the first to get over the divide into the Good Hope country, and they are the only men who went on the big stupped who have returned to Nome. They were on the trail seven weeks.

The party staked several claims and Walker, and Bert Walker, arrived up from Gold Beach last Friday, en route to Salem with James Gibson, who had been adjudged insane. Mr. Gibson is a pioneer resident of Gold Beach, perhaps sixty years of age. He has been more or less an invalid during the past thirty years, and although until recently, of sound mind, has had the faithful care and attention of his brother, M. B. Gibson, during all those years. Last week he developed unmistakable evidence of insanity, and continued very violent up to the time he left Port Orford. His case is evidently hopeless, and the remainder of his life will be passed in the asylum.

According to the stories extant and of the most reliable origin, the strike is destined to be the biggest and greatest in extent since the foundation of Nome and the discovery of Anvil creek. There are Old Glory, Pennell, Maloney and Good Hope creeks. They are said to be goldbearing, easily worked, with an occasional nugget to line the pan of the venturesome prospector.—Coos Bay News.

Morlin Miller, living on Elk creek, had the misfortune to have his dwelling house burned with all its contents on the 16th, which was a great loss, as he had gotten well fixed in the house. The fire caught in the roof and no one being at the house but Grandma Miller, the fire got beyond her control and ere Mr. Miller got there the house was doomed, and burnt very rapidly as at 2 or 3 o'clock the wind fanned the fire which made rapid work of destruction. Subscriptions were circulated and something like 160 dollars in money and bedding were secured.

J. D. Bennett is now working at the Minard mill putting in the machinery.

OVER 100 Million Dollars For Dividends

READ THE PROOFS: United States Official Report

MADE TO Commissioner of the United States, GENERAL LAND OFFICE, WASHINGTON, D. C.

by a Geologist and Mining Expert of world-wide reputation, Professor Benjamin Silliman, who spent several months there, then being connected with the United States surveying corps, and in his official report says: "Here are contained millions of tons of rich gold quartz reduced by the great forces of nature to a condition ready for the application of the hydraulic process, while the entire bed of the Rio Grande for over 40 miles is a sluice on the bars of which the gold derived from the wearing away of the gravel banks has been accumulating for countless ages, and now lies ready for extraction by the most approved methods of river mining. THE THICKNESS OF THE RIO GRANDE GOLD GRAVEL EXCEEDS IN MANY PLACES 800 FEET, OR NEARLY THREE TIMES THAT OF THE LIKE REELS IN CALIFORNIA, WHILE THE AVERAGE VALUE PER CUBIC YARD IS BELIEVED TO BE GREATER IN THE NEW MEXICO BEDS THAN IN ANY OTHER SUCH ACCUMULATIONS YET DISCOVERED."

"I have made a reconnaissance of the whole of this gravel along the Rio Grande, and have examined with all the care possible in the time at my command the character of the gravel and its contents of gold. NOTHING I AM PREPARED TO SAY OF THE DISCOVERY OF CALIFORNIA AND AUSTRALIA IS COMPARABLE FOR ITS MEASURABLE RESOURCES OF GOLD AVAILABLE BY THE HYDRAULIC PROCESS TO THE deep placer of the Rio Grande."

Other reports from eminent mining experts of national reputation pronounce the property of this Company the richest and most extensive known.
