EDITORIAL: I returned yesterday from a few weeks' stay at a mining cabin on the upper South Sixes. This cabin is located about 3 miles above the mouth of Rusty and is the only cabin on upper South Sixes. It is about 2 1/2 miles beyond Rusty Butte, which is the best way to reach it.

Ben Harrison, jr., went in with me and we reached there June 4th. In the forenoon of the 5th someone entered our cabin and ate heartily our frugal fare. On the 6th after breakfast we found a man's tracks up the creek in front of the cabin. On that day about dusk someone fired a shot (it sounded like a pistol shot) near the dam about a hundred yards up the creek from the cabin, but not in sight of it. The next day we heard nothing from our man. On the 8th we went over to Rusty. Mr. Harrison taking his gun. At noon after I had eaten my dinner and was standing in front of the cabin, a shot was fired up near the dam. This made a loud report like a shotgun. I left the cabin for Rusty and met Mr. Harrison coming down. He got within range of the cabin and watched while I went for assistance. About 10 o'clock Bob and Bert Harrison and I returned. Ben Harrison reported that about sundown a man appeared on the opposite side of the cabin and peeped through the cracks and looked in at the chimney place. He shot twice at him and our mysterious guest disappeared and gave us no further trouble. He had again entered the cabin and rolled up our blankets, but had left them.

At Antelope, six miles south, only about two inches of snow was on the ground while on the hills surrounding the town it is said the snow was twelve inches deep.—Shaniko Leader.

Hints on the Care of a Watch.

Wind your watch in the morning and as near the same hour each day as possible. It will keep better time. Hang your watch up when not carrying it as it will keep better time by keeping it at all times in as near the same position as possible. A watch should be cleaned and oiled at least once a year. The balance wheel of an American watch makes 157,680,000 vibrations in a year, hence there will be friction if not clean and lubricated. We make a specialty of fine and complicated watch repairing. Jewellery of all kinds made to order. We solicit your patronage.

Published accounts award medals to eleven powders exhibited. Tricky newspaper advertising and medals do not explain why any manufacturer should ask the same price for his goods that he did twenty years ago. Cream of Tartar was then 49 cents per pound. It is now 19 1/2 cents per pound. It is extortion to ask 45 or 50 cents per pound for any Baking Powder. No better Baking Powder than "Calumet" can be made at any price.

"Calumet" is not made by the trust. Therefore, its price is moderate. Full one pound can for 25c. Why Pay More? Samples Sent for 5 cents in Stamps.
