Remedies for Pesky Flies. Everybody, especially bald-headed men, bantailed horses and bob-tailed cows, knows that flies are a plague and a pest. The little wretches have a useful place in the economy of Nature, but they neglect their legitimate business to go buzzing around and bothering and bedeviling everybody and every animal, consequently they are hated and despised of all nations. Fly traps of many kinds for their destruction have been in use for ages, but flies seem to have an insane desire to kill or to drown themselves in anything from the cream jug to the water bucket, and even in biblical days the dead flies made the ointment of the apothecary stink worse than was natural. Of late years fly-paper, both poisonous and sticky, has been largely used, and has caused the death of myriads of the pests, but without any perceptible effects on their numbers. The fly has one advantage over man in being born full-grown and ready for business. Within the past few years a new species of fly has been introduced here. It is supposed that it arrived on cars in which Texas cattle were transported. They are a much greater pest than the old-fashioned horsefly, as their bite brings blood, even through the thick hide of a horse or a cow. They cause much loss to dairymen by annoying cows, so that they cannot eat half as much as they should, consequently there is a falling off in the flow of milk, and less butter and cheese. Some dairymen have tried to overcome this by blanketing their cows with burlaps, others by keeping their cows in dark barn during the heat of the day and feeding them only at night and in the morning and evening. Dealers in dairymen's supplies now keep on hand fly-boucer and other liquid preparations for the protection of milch cows and driving horses. These are not grateful to the olfactory nerves of the flies, and when the cows or horses have been brushed over with the preparations the flies fly away. The stuff has to be renewed every two or three days, and as it costs about \$1.25 per gallon, the expense of keeping a herd of cows pained with it is considerable. The stuff can be most expeditiously applied with a sprayer. Every family should have a battery of sprayers for spraying cows, fruit trees, hives and about everything else that grows on or out of the earth, and the farmer should begin their daily devotions with "Let us spray."

All Doctors have tried to cure CATARRH by the use of powders, acid gases, inhalers and disinfectant paste form. Their powders dry up the mucous membranes causing them to crack open and bleed. The powerful acids used in the inhalers have entirely eaten away the same membranes that their makers have advised to cure. The use of acid treatments cannot reach the disease. An old and experienced practitioner who has for many years made a close study and specialty of the treatment of CATARRH, has at last perfected a Treatment which when faithfully used, not only relieves at once, but permanently cures CATARRH, by removing the cause, stopping the discharges, and curing all inflammation. It is the only remedy known to science that actually reaches the afflicted parts. This wonderful remedy is known as "SNUFFLES" the GUARANTEED CATARRH CURE and is sold at the extremely low price of One Dollar, each package containing internal and external medicine sufficient for a full month's treatment and everything necessary to its perfect use. It is no ordinary remedy, but a complete treatment which is positively guaranteed to cure CATARRH in any form or stage if used according to the directions which accompany each package. The difference—Blank tells us verbally to sell his ranch every time he gets a snell on him and puts the price so high, and changes so often we never get started on it and it don't sell. Dank put his in our hands by contract at a legitimate figure and we got down to business and sold it. Who will be next.
