W. M. BURGESS, Coquille, Or.

Type plays sad havoc with "ye editor," now and then, oftentimes making him a liar and saying things he never said at all. Thus last week, in Mr. Holdins article, where the probable cost of a portable saw-mill was written from \$2,000 to \$2500 because someone blundered and the proof reader lost his eyesight for a moment, the writer was made to say, "from \$12,000 to \$2500. Values do not run downward like that, and the reader must have seen at a glance that he had only to pull out the figure "1" to make it all right. No man is advocating the buying a mill costing \$12,000. Read it from \$2000 to 2500, and we are all right, or will be when we get the mill working.

If you are thinking of getting a wheel for this season, be sure and investigate the Rambler before purchasing. By a thorough investigation you will find that there are more Rammers in this state than all other wheels put together. In regard to the tires on the Rambler, (the G. and J.) we will say that F. Long & Sons have sold them here for the past five years, and the first ones sold are good yet, and but one has been returned for repairs, one which has been in an accident which would have injured any tire.

We wish to call the attention of our readers to the necessity of "registration." Every citizen who expects to vote at the June election must re-register between now and the 15th of May. Don't delay this important duty. Do not think you can do it at your leisure. Do it now. The 15th of May will soon be here, and at present writing only about 1300 voters are registered in the county. Whatever may be thought of the present bungling registration law, we must comply with it, if we expect to vote at the coming election. Time will change it for the better. The election is an important one DON'T NEGLECT TO REGISTER.

To The Public.

Timon, March 31, 1902.—There is so many mistakes made in regard to the name of this Post-office, and where it is situated, I will state that it is not Carbondale, Lympa creek or near Parkersburg, as some letters are addressed, but just straight "Timon," Coos county Oregon, and it is on the bank of the Coquille river just below Lampa creek school house.

Anent the discussion of "good roads," now somewhat agitating the public mind, as has been stated in these columns, the older states are "working at it," even more zealously than we are and expecting to spend a good bit more money.

In New York states, for instance, many of the leading journals are agitating the subject of bonding the state for twenty million dollars for the purpose of building good roads, while we would be only too glad to have their present assortment of roads shipped to Oregon. We could manage to worry along several years yet if we had as good public thoroughfares as the old Empire states.
