MARSHFIELD OREGON

To the Unfortunate

Dr. Gibbon

This old reliable and
most successful speci-
alist in San Francisco,
still continues to
cure all cases of
Semi-inal Discharge,
such as Gonorrhoea,
Gleet, Stricture,
Syphilis, in all its
forms, Skin Diseases,
Nervous Debility,
Impotency, Seminal Weakness and Loss of
Mambood, the consequences of self-abuse
and excesses producing the following symp-
toms: Sallow countenance, dark spots under
the eyes, pain in the head, ringing in the
ears, loss of confidence, diffidence in
approaching strangers, palpitation of the
heart, weakness of the limbs and back, loss
of memory, pimples on the face, consti-
pation, etc.

DR. GIBBON has practised in San Fran-
cisco over 37 years and those troubled should
not fail to consult him and receive the ben-
efit of his great skill and experience. The
doctor cures when others fail. Try him.
CURES GUARANTEED. Persons cured at
home. Charges reasonable. Call or
write.
DR. J. F. GIBBON,
625 Kearney street, San Francisco.

GOOD ROADS BY FEDERAL GOVERNMENT

The following bill introduced by
Hon. Peter J. Orty, providing for
better roads under national control
is a step in the right direction, and
should be contended for by our
people:

The House being in Committee
of the Whole on the state of the
Union, and having under consider-
ation the bill (H. R. 13895) mak-
ing appropriations for the De-
partment of Agriculture for the
fiscal year ending June 30, 1903—
Mr. Orty said:

Mr. CHAIRMAN: In considering
the matter of the agricultural bill
the following bill introduced by me
should, in my opinion, have the
most prominent place, for nothing
can be so essential for the well-
being and progress of the great
farming interest of this country as
good roads:

A bill (H. R. 12650) to provide
good roads in the 45 states and 4
territories of the United States.
Whereas it is of the greatest im-
portance that there should be a
uniform system of good roads in
the 45 states and 4 territories of
the United States, knowledge by
means of rural free delivery and
more intimate and efficient inter-
state commerce; and

Whereas the people of the
United States demand good roads
as part compensation for the bur-
dens of taxation which they bear
for foreign commerce: Now, there-
fore,

Be it enacted by the senate and
house of representatives of the
United States of America in con-
gress assembled, That the sum of
\$100,000,000 be, and the same is
hereby appropriated, out of any
money in the treasury not other-
wise appropriated, to be set aside
by the secretary of the treasury,
to be known as the "good-roads fund";
Provided, That the secretary of
the treasury may, if no money is
available unappropriated, sell bonds
for the purposes of this act, rate of
interest not to exceed 2 per cent
per annum, under such rules and
regulations as he may deem proper.

Sec. 2. That the secretary of
agriculture be, and he is hereby,
authorized and directed to apply
the said amount, or so much thereof
as hereinafter provided, in the
construction of good roads and
highways in the 45 states and 4
territories in such plans and spec-
ifications as he may adopt as being
fitted to secure permanent, good,
and substantial highways in the
respective localities, such roads
and highways to be varied in con-
struction only as may be demanded
in the character of material in
different sections.

Sec. 3. That the secretary of the
treasury be, and he is hereby,
authorized and directed to transfer
from said fund so much of the said
good-roads fund as the secretary
of agriculture may from time to
time call for to pay for the said
construction of said highways.

Sec. 4. That the said construction
shall proceed contemporaneously in
the aforesaid States and Territo-
ries as nearly as practicable: Provi-
ded: That after \$1 per capita has been
expended in any State or States or
Territory or Territories no further
expenditure is to be made until
work is completed in all the afore-
said States and Territories: Provi-
ded: That any section of road not
exceeding 25 miles may be com-
pleted in excess of the aforesaid per
capita to prevent deterioration and loss.

Sec. 5. That condemnation pro-
ceedings must be had under the
existing laws of the respective States
and Territories, and all damages as-
sessed must be charged to and paid
out of that State's quota of the
good-roads fund in which the dam-
age is assessed.

Sec. 6. That the Secretary of Agri-
culture be, and he is hereby, au-
thorized and directed to organize
a force of engineers to superintend
the construction of said roads and
highways, which shall consist of
one chief engineer to every—
miles, at a salary of—dollars, and
one assistant engineer to every—
miles, with such camp allowance and
equipment as may be approved by
him (the Secretary of Agriculture)
and such other clerks, operatives,
and laborers below the grade of \$1-
200 as he may determine: Provi-
ded That all such appointments
must be distributed in the respect-
ive States in proportion to popu-
lation, if practicable, and such total
number of employees shall not
exceed—in number to every—
miles under construction.

Sec. 7. That the Secretary of
Agriculture shall construct said
roads by letting to contract to
lowest bidder, unless, in his opin-
ion, the work may be done more
satisfactorily otherwise, and he is
authorized to do any part or the
whole of the work in any or all of
the aforesaid States and Territories

by Government force or contract,
as it may appear to him best for
the public interest.

Sec. 8. That the Secretary of Agri-
culture shall provide all instru-
ments, stationary, appliances, uten-
sils, camp equipage, live stock, ve-
hicles, and other articles, and shall
cause all necessary printing to be
done, the cost of all of which and
salaries of all engineers and opera-
tives shall be paid out of the gener-
al fund and be chargeable to the
quota of the good-roads fund of
a State or Territory: Provided, That
the salaries of all engineers, assist-
ant engineers, and other employees
while actually engaged in any State
or Territory shall be charged to the
said State's quota of the good-roads
fund.

Sec. 9. That the balance of the
\$100,000,000, remaining after the
general expenditure and the ex-
penditure of \$1 per capita in said
States and Territories shall consti-
tute a reserve fund to be dealt with
by Congress.

Sec. 10. That for purposes of this
act the census of 1900 is to be the
basis, and this appropriation shall
be available July 1, 1902.

Sec. 11. That nothing in this act
shall be construed as authorizing
the improvement of any part of a
road or street within the corporate
limits of any incorporated town or
city.

Sec. 12. That the Secretary of
Agriculture may, if he deems it ad-
visable, establish under his super-
vision a bureau of good roads, with
a salary of—dollars, to be ap-
pointed by the President and con-
firmed by the Senate.

Sec. 13. That all roads construc-
ted under this act when completed
are to become the property of the
respective States and Territories
and subject to the laws and regula-
tions of said States and Territories.

Sec. 14. That no work shall be
done in any State or Territory un-
der this act until the legisla-
tures of said States and Territories
have passed resolutions accepting
and approving of its terms.

Sec. 15. That the Secretaries of
the Treasury and Agriculture are
hereby directed to enforce the pro-
visions of this act without delay,
and all acts or parts of acts in
conflict with this act are hereby
repealed.

In my opinion the most impor-
tant question before the American
people today is that of good roads.
Before it Nicaragua Canal, ship
subsidy, Cuban, or any other re-
ciprocity sinks into insignificance.

Good roads, like all other good
things, cost. Cheap articles are of
inferior quality, hence our bad
roads.

If we are to have good roads, we
must pay for them. To pay for
them we must be taxed. Then if
taxed, how? By the Federal or State
government? I am in favor of the
whole system of roads in this
country being placed under Gov-
ernment construction, to be paid
for out of the United States Treas-
ure.

In a word, as you will observe,
my bill provides for the direct
appropriation of \$100,000,000 to be
expended in the 45 States and 4
Territories of the United States in
proportion to population, the cen-
sus of 1900 to be the basis, and in
no State to be expended more than
\$1 per capita of population. Con-
struction to be under Department
of Agriculture; work to be done
contemporaneously in all sections
as nearly as practicable. Secretary
of Agriculture may let by contract
or conduct otherwise, as he may
determine, under specifications
and plans to be uniform except as
to variations to suit climatic and
local conditions, but in all cases
good and substantial highways.
Legislature of States and Territo-
ries to approve and accept the pro-
visions of this act before work
shall begin. Appropriation to be
available July 1, 1902; purpose of
the act to facilitate dissemination
of knowledge by means of mail
delivery to every man's door, to foster
education by facilitating school
attendance, and to promote more
interstate relations.

Mr. Orty's arguments will be
continued next week.

Emperor William of Germany
will present to the people of the
United States a statue of Frederick
the Great, to be erected at Wash-
ington. He seems determined not
to be outdone by the French with
their statue of Rochambeau, the
dedicatory exercises of which are
now taking place.

Representative Metcalf of Califor-
nia recently introduced a bill in
congress to provide for the estab-
lishment of a national academy and
conservatory of music and art for
the education of advanced pupils in
all branches of the beaux arts.

It is not impossible that watches
and clocks may be run and regulat-
ed by the action of Hertzian waves
from a central station. They would
always be right and would require
no winding. Scientists say there is
nothing chimeric about this.

Fate of an Oregon Salmon.

There was a great time at the
Senate end of the Capitol yesterday
Senator Mitchell, of Oregon, received
a magnificent salmon from the Col-
umbia River. It was a monster
fish, four feet long and weighing
sixty pounds.

"Serve this fish at 3 o'clock,"
said Mr. Mitchell to Col. Page, the
restaurateur of the Senate, and then
he proceeded to invite the entire
Senate to lunch with him. Quite a
number of Senators were in the
room of the Senate Commerce Com-
mittee conferring over the river
and harbor appropriations. When
Mr. Mitchell appeared at the door
of the committee room the guard
stationed outside did not want to
let him in.

"Let me go in and you shall have
a piece of fish," said Mitchell, and,
of course, the door was opened.
"Come down and eat salmon with
me," said Mr. Mitchell, when he
had apologized for breaking into the
conference, "and I want you
House river and harbors, to come
along."

So at 9 o'clock just as Senator
Hear had finished his speech, the
Senators looked at the clock. No-
body wanted to talk because in a
few moments all the audience would
be downstairs gathered around the
salmon. Senator Teller cut the
gordeau knot by suggesting that
the Senate take a recess of thirty
minutes, to which Senator Lodge
roughly agreed. A few minutes
later a Senatorial procession was
wending its way downstairs, and by
the time the Senate again assembled
only the backbone of the salmon was
left upon the platter.—Washington
Post.

Spring Fever.

Spring fever is another name
for biliousness. It is more serious
than most people think. A torpid
liver and inactive bowels mean a
poisoned system. If neglected, serious
illness may follow such symptoms.
DeWitt's Little Early Risers remove
all danger by stimulating the liver,
opening the bowels and cleansing
the system of impurities. Safe pills.
Never gripe. "I have taken De-
Witt's Little Early Risers for torpid
liver every spring for years," writes
R. M. Evely, Monmouth, W. Va.
"They do me more good than any-
thing I have ever tried." R. S.
Knowlton.

Cadet Bingham of Alabama who
was just graduated near the head of
his class at Annapolis, was at first
refused admission because he lacked
three and one-half inches of the
required height. His mental exami-
nation was so satisfactory, however,
that he was admitted with the pro-
viso that he might obtain his diplo-
ma if he made up the physical
defect before graduation. He ap-
plied himself diligently to athletics
and grew tall enough before the
first year was over.

The Marconi wireless telegraphy
company has been awarded the con-
tract to install a system for use in
Alaska, covering the longest distance
yet attempted over land, one
transmission being 195 miles. The
stations will be in operation in Oc-
tober for Alaskan service and engin-
eers will then determine on the sta-
tion in the territory to be put in
communication with the state of
Washington, this giving Alaska the
first direct telegraphic communica-
tion with the rest of the world.

Public schools of New Jersey
have made mosquito-killing part of
the curriculum, and the school chil-
dren of some cities are asked to as-
sist in the annihilation of the dead-
ly Jersey pest. The president of
the state board for the extermination
of mosquitoes says that a few
thousand children looking out for
the mosquito in its embryo state,
when it is amenable to kerosene
treatment, will dispose of many mil-
lions.

A Great Extent.

"I suffered from dyspepsia and
indigestion for fifteen years," says
W. T. Sturdevant of Merry Oaks,
N. C. "After I had tried many do-
ctors and medicines to no avail one
of my friends persuaded me to try
Kodol. It gave immediate relief.
I can eat almost anything I want
now and my digestion is good. I
cheerfully recommend Kodol."
Don't try to cure stomach trouble
by dieting. That only further
weakens the system. You need
wholesome, strengthening food.
Kodol enables you to assimilate
what you eat by digesting it with-
out the stomach's aid. R. S. Knowl-
ton.

Turkish and other Oriental rugs

are declining in value, quality and
popularity, due chiefly to the inferi-
ority of the manufactured wools
now used in them. American capi-
tal ingenuity and "Germanotta"
yarns have invaded the field and
spoiled the original pastoral pro-
duct. The same is true of the
Navajo and Mojave Indian blankets
of our own country.

WOMAN'S RELIEF

A really healthy woman has lit-
tle pain or discomfort at the
menstrual period. No woman
needs to have any. Wine of
Cardui will quickly relieve those
smarting menstrual pains and
the dragging head, back and
side aches caused by falling of
the womb and irregular menses.

WINE OF CARDUI

has brought permanent relief to
1,000,000 women who suffered
every month. It makes the men-
strual organs strong and healthy.
It is the provision made by Nature
to give women relief from the
terrible aches and pains which
blight so many homes.

ARE YOU DEAF? ANY HEAD NOISES?

ALL CASES OF
**DEAFNESS OR HARD HEARING
ARE NOW CURABLE**
by our new invention. Only those born deaf are incurable.
HEAD NOISES CEASE IMMEDIATELY.
F. A. WERMAN, OF BALTIMORE, MARYLAND.

Profession—Being entirely cured of deafness, thanks to your treatment, I will now give you
a full history of my case, to be used at your discretion.
About five years ago my right ear began to ring, and this kept on getting worse, until I lost
my hearing in that ear entirely.
I underwent a treatment for catarrh, for three months, without any success, consulted a num-
ber of physicians, among others, the most eminent ear specialist of this city, who told me that
only an operation could help me, and even that only temporarily, that the best noise would
then cease, but the hearing in the affected ear would be lost forever.
I then saw your advertisement, according to the directions, I ordered your treat-
ment. After I had used it only a few days according to your directions, the noise ceased, and
today, after five weeks, my hearing in the diseased ear has been entirely restored. I thank you
heartily and beg to remain, Very truly yours,
F. A. WERMAN, 726 S. Broadway, Baltimore, Md.

Our treatment does not interfere with your usual occupation.
Examination and service free. **YOU CAN CURE YOURSELF AT HOME** at a nominal
cost.
