Roy, of a mile above town brought us samples of figs grown on his place which are fully grown, well developed and perfectly ripe. It is not generally conceded that this fruit matures in this climate, but these specimens are surely a positive proof of the fact. There are a number of trees in the county which do not bear, and for the benefit of their owners we will give Mr. Roy's experience. A few years ago Miss Grace Madocks, of California, told him there were a great many fig trees, from some unknown cause did not bear, and that she would send him some cuttings on her return home which she did, and by grafting those into his trees, he has developed some fine bearers.
