Steam Renovating of Feathers.
As this work is new to a great many people, we would respectfully call the attention of all such, especially the ladies, to a few facts in regard to it:
The feathers, beds and pillows, will be called for at each residence and taken in the morning in the ticks, right from the beds, and during the day the feathers are thoroughly washed with steam and cured with steam, then dried perfectly dry by a cold blast. The ticks are all opened, and the feathers are emptied from them, and when the same ticks are to be used still they are turned and thoroughly cleaned; or where new ticks are wanted we can furnish them, of the best materials, as cheap as any one can purchase and furnish themselves. We also save you much trouble and annoyance in this.
One person's feathers are never mixed or come in contact with those of others; this is positive. The beds and pillows will be returned the same day, all filled and sewed up, just ready to place on the beds in the evening before bedtime. All moisture, dust, dirt and foreign substances, animal matter, micro-organisms, disease germs, and especially the vermin known as the feather worm, so destructive to feathers, are all destroyed and separated from the feathers. And when the feathers have been treated, passed through this process ready to return to you, they are in the most perfect sanitary condition, dry as a bone and pure as snow.
