Hearts Are due to indigestion. Ninety-nine of every one hundred people who have heart trouble can remember when it was simple indiges It is a scientific fact that all cases of heart disease, not organic, are not only traceable to, but are the direct result of indigestion. All food taken into the stomach which fails of perfect digestion ferments and swells the stomach, puffing it up against the heart. This interferes with the action of the heart, and in the course of time that

delicate but vital organ becomes diseased.
