GENERAL NEWS.
Jay Gould Not Likely to be Seriously Opposed.
CONFEDERATES NOT EXCLUDED.
Alexander Cannot Have Victory—General Crook Nominated for Major-General—Cooking Sick.

Why Things Go Slow.
In the course of a long experience with various classes of men, relative to new things of special importance to them, we have found three types of mental temperament manifested in habitual treatment of such subjects. First and most frequent, the sensitively conservative temperament that creates the arbitrarily conservative character; a kind of mud into which a new proposition enters like a thorn into the flesh, exciting instant repulsion. Something of this disposition, indeed, prevails in the majority of mankind, at least with reference to their own line of affairs, and certainly serves to keep the world from moving too fast for safety. It is, essentially, a disposition inordinately to cherish what ever is one's own. Those who hold their own as with a death grip, in the matter of property—in other words, those in general who acquire and wield capital—are most tenacious in like manner of their own thoughts and ways. Hence it is that the most important and the most manifest improvements—new inventions, new measures, originality in literature and thought—with difficulty and delay get recognition, if at all, from the "constituted" authorities in their respective matters. Hence, too, is the most unreasonable test of an advance discovery or proposition that can be imagined, to ask if it has been accepted by "any of the rulers, or of the Pharisees" in the professions and crafts. They are constitutionally antagonistic to innovation. And yet most people, for want of this knowledge, persist in estimating inventions by the test of success in public prints and business circles. There is not wanting an extreme opposite to the hold-your-own temperament—a sort holding nothing firmly, to whom change is fascinating for its own sake. Of course they seldom have, and never keep, and thus are of no consequence in the world, except as a foil to throw into clear relief the true nature of the opposite type. Between the extremes there are a few characters with the enthusiasm of progress rationally graduated in a keen sense of values both present and future. The value of a notion because it is their own or an old one, or a standing one, or a new one, is nothing to them; but their rich appreciation of all substantial values makes them in equal degrees tenacious of existing good, eager and hopeful of new, and earnest in scrapping of both. An eminent example of this temperament was the great pioneer of apostolic enterprise, who gave the watchword for every true son of progress: "Test everything, and hold fast that which is good."

CONFEDERATES NOT EXCLUDED.
WASHINGTON, April 6.—Senator Daniels today introduced a bill to repeal the section of the revised statutes which provides that no person who has served in any capacity in military, naval or civil service of the so-called Confederate states, or any states in the insurrection during the late rebellion shall be appointed to any position in the army of the United States.

Victims of the Disaster.
CARS FILLED UP, AND COMPLETELY DELETED.
NEW HAMPTON (Iowa), April 6.—Up to 10 o'clock this morning six bodies were taken from the rail road disaster at the Wapsie river. It is supposed that the passenger train after crossing the Wapsie river ran into a large pile of ice washed on the track by the high water. The engine ran off the rail turning completely around and is out of sight in the water. The baggage car was thrown completely over the engine, and the smoking car is on top of the engine. The next coach is on its side in four feet of water. On account of the high water further search at present for the dead is impossible, though it is not thought that any other dead bodies are in the wreck. Twenty are injured, but all will live. They were brought to New Hampton in the fatal train's sleeper.

Satisfactory Settlement.
LONDON, April 6.—A dispatch from London says that everything remains quiet. It is generally expected that a satisfactory settlement between the American and Moorish governments will be effected through the mediation of the British, French and Italian ministers.

Bismarck Not to Resign.
BERLIN, April 6.—The National yesterday says renewed efforts to obtain the consent of the Emperor to the marriage of his daughter Victoria to Alexander of Battenburg, have not been successful. For this reason there are no longer any grounds for secret conflict between Bismarck and the Emperor, and therefore there is no question whatever of Bismarck resigning.

Gets a Life Sentence.
NEW YORK, April 6.—Recorder Smith today sentenced Francis W. Pittman to imprisonment for life in the state prison. He was tried for the murder of his daughter Rachel and was convicted last night of murder in the second degree.

Cook Gets the Crib.
WASHINGTON, April 6.—The president sent the following nomination to the senate today: Brigadier General George Crook to be Major General; Colonel John H. Brooks of the first infantry to be Brigadier General.

CONFEDERATES NOT EXCLUDED.

STATE NEWS.
Items of Interest From the State Capital.
SIXTY-NINE ADMITTANCE OF A HAND
Sixty-nine Year Old Bachelor—Telegraph Office Refused—Concrete Want in Oregon.

BOY BURGALAR.
Johnny Booth, a boy of 16, was arrested this morning on a charge of burglarizing a telegraph office last week and taking \$10.05 from the till. With Jim Nesbit, another boy, he entered the office by getting in the cellar and coming up through a trap door. Nesbit has disappeared. These boys are suspected of having committed numerous other robberies.

ANOTHER SALEM PAPER.
Democrats in Salem are agitating the project of starting a straight-out Cleveland-Pennyroy democratic paper, to be run in opposition to the Vidette, which they denominate as a Ben Butler organ.

Big Salaries.
There are a score of men in New York who are paid as much for their services each year as the President of the United States. Forty thousand dollars a year is a very tidy salary. There are hundreds of men who get \$25,000 a year salary, and the number who get from \$10,000 to \$20,000 are legion. Very ordinary men get from \$5,000 to \$8,000 a year, or as much as a Cabinet officer. Dr. Norvin Green, President of the Western Union Telegraph Company is paid \$50,000. So is Chauncey M. Depew, President of the New York Central Railroad. Richard M. McCurdy, President of the Mutual Life Insurance Company, gets a like amount. John A. Roebling, President of Adams Express Company, fares equally as well. President Henry B. Hyde, of the Equitable Life Insurance Company is also on the list. George G. Williams, President of the Chemical National Bank, the richest banking institution in America, with nearly \$5,000,000 of surplus \$20,000,000 average deposits, is paid a salary of \$25,000 yearly. President Potts, of the Park Bank, and President Tappan, of the Galatin National Bank, receives a like sum every twelve months.

The Best Paid Minister in New York is Dr. John Hall, a brainy man from the north of Ireland, who preaches to \$200,000,000 every Sunday. His is the richest church in town. Robert Bonner, of the Ledger foundation in Dublin, and induced him to come to America. He gets a salary of \$20,000 a year, and makes \$5,000 by his newspaper and magazine articles. He is given a luxuriously furnished house as well. Dr. Morgan Dix, the chief pastor of Trinity Church congregation, receives \$15,000 yearly. Dr. William L. Taylor of the Broadway Tabernacle, gets the same amount. He does literary work and lecturing that brings his income up to \$20,000. Dr. Charles Hall, of the Fifth Avenue Presbyterian Church, is paid \$15,000. Dr. Parkhurst, of Madison Square Church, gets \$12,000. Dr. Paxton is paid \$25,000. The Rev. Robert Colver is paid \$10,000.

A Chicago Drummer Outdone.
New York Tribune.
It is stated that the business of the London Postoffice is of such magnitude that the present Postmaster-General has saved \$15,000 a year in sailing wax and tallow expenses alone. That's nothing. A few years ago a drummer for a Chicago drygoods house was boasting in the presence of one of his characteristically modest professional brothers from Boston of the immense business which "his firm" transacted. The Bostonian listened with respectful attention to the tremendous figures which the other man produced for his benefit, showing the colossal receipts and expenses of the Chicago house. When he got through the Western drummer com recently remarked: "Ah—how much of a business do you people do?" "I'm sure I don't know," quietly repeated the drummer from the East. "But I can state one fact which may give you some light on that point. The first of last January the head of the firm directed the book-keepers and the shipping clerks to refrain from dotting a or crossing T's until further notice. The result was a saving for the year of over a million of dollars in our ink bills. I believe the precise amount was a million and forty-nine dollars and five cents."

THE WAGON ROAD GRANTS.
Mayor Pond, of San Francisco, Inter-views Cleveland on That Subject.
WASHINGTON, April 5.—Mayor Pond, of San Francisco, had an interview with the President today in relation to a number of matters of Pacific Coast interest, including Cleveland's message accompanying the bill for the absolute forfeiture for the Oregon wagon road land grants. Mayor Pond was one of the number of purchasers of Oregon Central wagon road land grants. The purchase was made after Senators Dolph and Mitchell certified to the validity of the title and Governor Grover, of Oregon, had certified to the general government the fact that the road had been built, and upon his certification patents had been issued to persons claiming lands under the grant.

Particulars of the Descent from a Balloon with a Caracine.
CHICAGO, April 5.—A special following particulars of aeronaut ascension: Prof. Hezard made a magnificent trip from his balloon yesterday. The first attempt at ascension was a failure, but the second effort was a success, and the airship soon reached a height estimated at nearly 6000 feet. At this elevation the balloon seemed to shunt with and by the aid of Professor Hezard could be seen edging over the side of the car. Suddenly the cry went up: "He has jumped!"
