EDITORIAL NOTES.

A new and more perfect method of identifying criminals, which originated in Paris, is being adopted by some of the prison authorities in this country. It is called the anthropometrical method.

The claim that electrical motors are to supersede steam engines as motive powers, receives a rather summary back set from the American Machinist.

THE KNIGHTS OF LABOR. A recent issue of your paper appeared a short time in these words: "Philadelphia, April 24—The knights of labor are in need of ready money, have authorized the sale of available property."

order has lost 21,700 members in a certain time, the more significant fact is carefully withheld from the public that a much larger number of members of better material has been added to the order of the knights of labor, giving them strength and power of resistance they have never had before.

The organization of the knights has grown to such dimensions, and is exercising such an influence in the commonwealth that it gives pride, pleasure and hope to every laboring man and woman who understands its purposes and power.

The awful amount of stuff sent out from headquarters through the non-political press concerning the knights of labor, indicates almost total depravity on the part of the miserable liars who furnish it, and questionable credulity on the part of the papers that repeat it.

We desire no concealment from the public of our principles, purposes and condition, but upon the contrary we want a thorough investigation by the people and fear not the result.

It is my intention to meet the people at every precinct in Linn county, on the same day and place that is appointed for the county candidates to meet for political discussion, and talk to the people at half-past seven or eight o'clock in the evening about the order of the knights of labor.

Newton Self-Wringing Floor Cleaner!

THE OLD WAY | THE NEW WAY

Every housekeeper knows from experience the hard labor required to wash floors and wring the cloths by hand. By using the Newton self-wringing floor cleaner, wringing the cloth by hand is avoided, the hard labor is thereby lessened; the hands do not come in contact with the water, whereby you can use boiling and ammonia water.
