California, the Land of Discoveries

EUREKA
The motto of California nurses is "find it." Only in that land of sunshine, where the orange, the grape, the almond and the olive ripen in their highest perfection in mid-winter, are the herbs and gums found that are used in that pleasant remedy for all throat and lung troubles, **SANTA ANA**.
The leading symptom of ordinary catarrh is increased secretion of mucus of yellow or greenish color matter. Foul breath is caused by the decomposition of mucus from festering ulcers far back in the throat; sometimes the membrane covering the bones is eaten away and the bones themselves gradually decay. Such cases are indeed objects of pity, as stench from corroding sores force the corruption within.
As every breath drawn into the lungs must pass over and become polluted by the secretions in the nasal passages, it is necessary to follow that poisoning of the whole system gradually, takes place, while the mucus matter that is swallowed during the sleep passes into the stomach, induces indigestion, and often produces dyspepsia, and finally, great debility, nervousness and consumption.

HERBERT, PHOTICAL WATCHMAK-ER and jeweler, Albany, Oregon.

ULTIMATE FAMILY MEDICINE!
"I have used Simmons Liver Regulator for many years. Living in the tropics it is my only family medicine. My mother before me was very partial to it. It is a safe, good and reliable medicine for any disorder of the system, and if used in time is a great preserver of sickness."
—Rev. James M. Rollins, Pastor M. E. Church, So. Fairfield, Va.—

"TIME AND DOCTORS' BILLS SAVED by using Simmons Liver Regulator in the house."
"I have found Simmons Liver Regulator the best family medicine I ever used for anything that may happen. Have used it in Indigestion, Colic, Diarrhoea, Biliousness, and found it to relieve immediately. After eating a hearty supper, if on going to bed, I take about a teaspoonful. I never feel the effects of the supper eaten."
—"OVID G. SPARKS, "Ex-Mayor of Macon, Ga."—

ONLY GENUINE!

Wilbard has enlarged his store and stock so that he now has the most complete and desirable line of furniture in the valley. His double salerooms in Froman's block are filled with an elegant assortment of new furniture, consisting of lounges in the latest styles, gold picture frames, willow chairs, easy rockers, marble tables, brackets, etc., etc. An examination of the stock will show this to be true in every respect.

WANTED GOOD AGENTS TO INTRO- duce an article used in every household for every town and county in Oregon, and Washington and Idaho territories. Address Box 305, Albany, Oregon.

IMMIGRATION.

Unusually Busy Scenes at Castle Garden.

SCORES OF STRANGERS COMING.
A Rush of Foreigners Seeking Homes in the United States—Some Interesting Statistics.

New York Sun.
There is a spring and fall season for immigration to America, just as there are semi-annual seasons for selling dry goods, shoes and jewelry in the wholesale districts of trade. There is the same regularity about the rush of immigrants to America that is noticed in the periodic rushes in business circles. Necessities and seasons govern the trade rushes, and have much to do with regulating the flood of immigrants that pours into Castle Garden.

The garden is just now emerging from its midwinter lethargy. In fact it has been gradually assuming a more active appearance for a month past. Immigrants are now arriving at the rate of 1000 a day, and figures compiled by the rudy-faced and courteous superintendent Henry J. Jackson, show that for the three months ending March 31, 53,847 immigrants have passed through the garden. This is 3000 more than came over during the same months of 1887.

Swarms of immigrants now pester the registry clerks with statements of their names, means, country, occupation and destination. Superintendent Hezozuan of the Labor Bureau and all the clerks in the garden machinery are going from early dawn till dusk, and from Superintendent Jackson's predictions on Saturday not less than 100,000 immigrants will tramp the garden's knotty floors in the next three months.

Mr. Jackson spoke of the nationalities of the immigrants, and divided the immigration for January thus: Out of 10,190 immigrants landed, 2153 were from the United Kingdom, including 1103 Englishmen, 643 Irishmen, 222 Scots and 139 Welshmen. The Italians flocked in to the number of 2129, the Germans 1876, the Russians 1091 and the Hungarians 1064. About the same distribution of nationalities was shown in the 15,157 immigrants who landed in February, and in the 28,500 who came to our shores in March.

It will be noticed that the tide has been steadily rising since January; the flood is setting in and will not ebb until July or August. The first two months of the year showed an increased immigration of from 2000 to 3000 over the same months in 1887, but during March there was a slight decrease when compared with March 1887. This, however, was spoken of as only a spasmodic reaction. The destination of the great majority of the immigrants in the Northwest. Very few find their way South. It is Mr. Jackson's opinion that immigrants are going farther westward.

There is one further point, however, worth notice, for it will show the advantage of our great-grandfathers in the matter of mechanical appliances they certainly were better off in the price of labor. The original contract for the tunnel made in 1782, was that it should be completed in thirty years and should cost \$7,000,000. For eleven years the work was done at this price, but the French revolution enhanced the cost of labor and materials to such an extent that for thirty years little progress was made.

For ten years following much progress was made, and then the work dropped for twenty years more until the water threatened to drown the mines altogether. Finally the tunnel was completed in 1878, the remaining part costing \$22 a yard, or more than three times as much as the original contract rate.

SCIENTIFIC SCRAP.
A Swiss watch manufacturer has just invented a watch for the blind, on the dial of which the hours are indicated by twelve projecting pegs one of which sinks every hour.

A patent has been granted in England for the manufacture of vinegar from tomatoes. The fruit when ripe, or nearly so, is reduced to a pulp and steeped in water for twenty-four hours. The resulting liquor is drawn off, sugar added, and the whole allowed to ferment.

The teeth of whales furnish one of the remarkable features indicative of the origin of that animal. They form a complete but rudimentary set, characteristic of a more perfectly developed land mammal, but disappear shortly after birth, performing no function whatever.

A wonderful landscape, on exhibition in Paris, has been executed in European and foreign insects. Every desired tone is supplied by 45,000 coleoptera in the foreground and 4,000 varieties of the insect tribe for the remainder of the picture. The work required four years of the artist's time.

The exhibition of fish, recently opened at Havre, France, includes many poisonous varieties, some of which are poisonous when eaten, others merely venomous. In the Japan sea is found one of the former class, which is sometimes used as a means of suicide. It brings on sensations like those produced by morphine, and then death.

An interesting development in photography is in the use of clockwork in printing from negatives. By this means a continuous web of sensitized paper is drawn at suitable intervals under a negative exposed to a source of light. After printing the paper is drawn, still by the mechanism, through "washer," "toner" and "fixer" successively, and appears finally as a series of finished pictures, ready for mounting, and all alike in exposure, color and tone.

the big features of the garden. It is directed by George B. Doane. He spoke of the very general desire of immigrants to seek the great Northwest.

"Here our rush is upon us," he added, "and you will notice that the immigrants are very evenly distributed among all the Western roads. It costs them \$13 to go to Chicago, and I must say that the Eastern trunk lines benefit little from the traffic, or at least not to the extent they should. The roads west of Chicago get the benefit of the traffic which is developed by the immigrants settling along the lines. Chicago is the great distributing center. The immigrants there branch off to Iowa, Wisconsin, Dakota, Minnesota, and through the great Northwest. Our rush will continue up to the harvest months in Europe, and in October the flood of immigrants will be turned on again."

A WONDERFUL TUNNEL.
The Longest in the World, and It Was Begun a Century Ago.

An engineering work that has taken over a century to construct can hardly fail to offer some points of interest in its history, and illustrates the march of events, during the years of its progress. An instance of this kind is to be found in a tunnel now being since completed but which was commenced over one hundred years ago. This tunnel, or adit, as it is called, is more strictly termed, is at Schemnitz, in Hungary. Its construction was agreed upon in 1782, the object being to carry off the water from the Schemnitz mines to the lowest part of the Gran Valley.

The work is now complete, and forms the longest tunnel in the world, being 10,277 miles long or about one mile longer than St. Gothard, and 2 1/2 miles longer than Mount Cenis. The height is 9 feet 10 inches and the breadth 5 feet 3 inches. The tunnel, which has taken so long in making, has cost very nearly a million sterling, but it appears to have been well spent; at least, the present generation has no reason to grumble, for the saving from being able to do away with water-raising appliances amounts to £15,000 a year.

There is one further point, however, worth notice, for it will show the advantage of our great-grandfathers in the matter of mechanical appliances they certainly were better off in the price of labor. The original contract for the tunnel made in 1782, was that it should be completed in thirty years and should cost \$7,000,000. For eleven years the work was done at this price, but the French revolution enhanced the cost of labor and materials to such an extent that for thirty years little progress was made.

For ten years following much progress was made, and then the work dropped for twenty years more until the water threatened to drown the mines altogether. Finally the tunnel was completed in 1878, the remaining part costing \$22 a yard, or more than three times as much as the original contract rate.

GENERAL NEWS.

Secretary of the Interior on the Alaska Seal and Fur Co.

HE DENOUNCES THEIR OPERATIONS
Powderly Defines His Position and Says He Does Not Want Any Office—
Eastern News.

The Herald's Special Dispatches.
WASHINGTON, April 4.—The secretary of the interior transmitted to the house the report of Governor Swineford, of Alaska, upon the operations of the Alaska Seal and Fur Company, in which he alleges that the company has grossly abused the natives, and has attached affidavits to his charges. He concludes with quoting from his last annual report: "It would be better to allow every fur seal exterminated than to continue so blighting a monopoly as is illustrated by the company's methods of conducting business." In court he details a case where he found himself in conflict with the company whenever he cited to protect the interests of the government, and declares that no United States officer can properly perform his duties in Alaska wherever the company has any interests, without incurring its displeasure, and coming into open hostility with its agents.

THE METHODIST CONFERENCE.
The Day Consumed in Debate on the Eligibility of Women.

New York, May 4.—Bishop Foss, of Minneapolis, was elected president of to-day's session of the Methodist Episcopal conference. The order of the day was a debate upon the eligibility of women as lay delegates. The debate was opened by Dr. Leonard, of the Cincinnati conference. He began by saying that he had received a number of letters warning him to speak in favor of admitting women. He was strong in the advocacy of their admission, and closed by urging that if women were not to be recognized they should not be allowed to vote for the election of lay delegates.

Rev. John Miley, president of the Drew Theological Seminary, spoke against the admission of women. If the question were submitted to a vote of the women he believed nine out of ten would vote against it.

Rev. J. R. Day, of the New York conference, also argued against the admission of women. He thought the question before it settled should be submitted to a general vote of the church women. He said that women lacked the necessary experience, and it admitted would weaken the force of the lay delegates.

POWDERLY'S POSITION.
He Says He Will Not Be Candidate for President.

PHILADELPHIA, May 4.—General Master Workman Powderly has written a letter, in which after quoting from letters from all sections of the country and from articles in various labor papers, giving him advice as to what should be done at the coming election, he says: "As the campaign warms up I will be questioned still more, and I therefore take this opportunity to say that I am not a candidate for anything. I do not favor candidates of Knights of Labor in either party, and will not have anything to do with parties."

Notable Dead.
WASHINGTON, May 4.—Charles Lyman, for many years at the head of the dead letter office of the post-office department, died yesterday evening, in his 80th year.

Heavy Grain Fleet.
CHEROKEE, Mich., May 4.—Heavy gales last night opened the straits of Mackinac and probably the largest grain fleet on record passed down this morning.

The Emperor Better.
BERLIN, May 4.—The Emperor is free from fever and able to rise. His strength is gradually increasing. No further bulletin will be issued unless he relapses.

Great English Remedy.
Trade Mark.
