LABIETINE MED. CO. OROVILLE, CAL.

FOR SALE BY

Foshay & Mason.

ALBANY OREGON

HAVE YOU A COUGH? IT IS THE SIGN OF A BRONCHITIS. It is a dangerous secretion of mucus or matter in the nasal passages which either may be blown from the nose or run back behind the palate, or hawked or sneezed backward to the throat. Are you troubled by having a sore, weak and inflamed eye, frequent soreness of the throat, ringing or roaring in the ears, more or less impairment of the hearing, loss of smell, memory impaired, dizziness or dizziness of the head, dizziness or heat of nose? Have you lost all sense of smell? Have you a hacking cough? Have you a discharge from the nose? If so you have the CATARRH. Some have all these symptoms, others only a part. The leading symptom of ordinary catarrh is increased secretion of mucus of yellow or greenish colored matter. Foul breath is caused by the decomposition of secretions exhaled from festering ulcers far back in the head; sometimes the membrane covering the bones is eaten away and the bones themselves gradually decay. Such cases are indeed objects of pity, as stench from sores rising above the corruption within.

As every breath drawn into the lungs must pass over and become polluted by the infection in the nasal passages, it must necessarily follow that poisoning of the whole system gradually takes place, while the mucus matter that is swallowed, enters the system into the stomach, enfeebles digestion, and often produces dyspepsia, flatulency, indigestion, nervousness and consumption.

DO NOT PROCRASTINATE.

If you have experienced any of the above symptoms do not delay, but try CALIFORNIA CATARRH CURE. We positively guarantee a few applications will relieve and a thorough course will cure. Six months treatment for \$1.00 sent by mail.

Santa Abie and Catarrh Cure. For sale by

FOSHAY & MASON.

ALBANY OREGON

GENERAL NEWS.

Busy Scenes at St. Louis Preparatory to the Convention

IT IS CLEVELAND AND THURMAN.

Jeff Davis Celebrates His 80th Birthday—Gen. Sheridan's Condition Unchanged—Old World Notes.

The Hunsato's Special Dispatches.

ST. LOUIS, June 4.—Delegates and alternates and officers of the political clubs and politicians of a high and low degree are arriving thick and fast this morning. As early as 7 o'clock the Union depot was packed, and during the morning, at intervals of five and ten minutes, regular and special trains have been coming in and emptying their loads of people, who come to take part in the fray. They wore badges and nearly all carried banners. The one word on their lips was Cleveland and Thurman.

TEMPORARY CHAIRMAN SELECTED.

ST. LOUIS, June 4.—White, of California, has been selected temporary chairman of the national committee.

JEFF IS IN GOOD HEALTH.

JEFF DAVIS Celebrates His Eightieth Birthday.

NEW ORLEANS, June 4.—At Beauvoir yesterday Jefferson Davis celebrated his 80th birthday. The mails bring many congratulations from old friends, and many substantial remembrances were received. Davis is in better health than for some time past.

Crown Heads of Brazil.

MILAN, June 4.—The emperor and empress of Brazil, accompanied by a retinue, went to Aix Les Bains today.

As the Empress of Asia.

BOMBAY, June 4.—The report is in circulation here that it is intended to crown the great emperor of Central Asia at Samarcand, in order to subvert the influence of Queen Victoria's title as empress of India.

The Report denied.

CHICAGO, June 4.—First Vice-President Smith, of the Atchison, Topeka and Santa Fe railway company says, there is no truth in the statement that his company has made a traffic agreement with the Erie railway company. The traffic tie, he says, has no intention of extending its system east of Chicago, or of making exclusive traffic arrangement with any one company.

The Queen's Sympathy.

LONDON, June 4.—Queen Victoria has sent a message of sympathy to John Bright, whose condition is slowly improving.

Heavy Snow Storm.

GLASGOW, June 4.—There has been a heavy snow storm in the district of Ben Lomond. The weather has been unprecedented for this season of the year.

Gen. Sheridan's Condition.

WASHINGTON, June 4.—It was stated at 9:30 o'clock that the had been no material change in Gen. Sheridan's condition since 5 o'clock this morning. Col. Blunt says that it has been decided not to issue another bulletin, except in a case of fresh complication.

His Modest Demands.

PARIS, June 4.—Gen. Boulanger will today in the chamber of deputies move for a revision of the constitution and dissolution of the chamber, and will demand urgency upon his motion.

THIRTY THOUSAND IMMIGRANTS.

Came into Oregon and Washington in the Past Year.

Charles W. Hansen Immigration Agent of the Northern Pacific Railroad who is well posted in regard to the business said in answer to the query, "How many immigrants came into Oregon and Washington during the year ending June 1, Mr. Hansen?" says:

"Fully 30,000 came in during the twelve months ending June 1. In this estimate tourists are not counted but those coming by both rail and steamer are included. The newcomers are principally from Iowa, Wisconsin, Dakota and California. Not a few from the latter State came from Mendocino, Colusa and San Bernardino counties. The Big Bend country is being settled up rapidly by those new comers, so are various portions of Oregon and Washington Territory.

"The largest month was April, when nearly 8,000 immigrants arrived. I think August and September will show larger totals than April did."

Regrets.

Every man who thinks at all (and thinking is a rare gift) has formed some ideal of life. He has his cherished aspirations and secret aims. Some beautiful dream of youth may have haunted him in manhood, and hoping against hope he may have been unable to part with it, even in old age. He knows, perhaps, that it can never be realized, that every effort he makes is a vain effort, and yet he will not let it go, since it would be parting with what is as dear to him as life. That such a man should suffer from regrets is inevitable, but it is not so certain that he needs our pity. It is surely better to aspire and to fail than to have no goal for the spirit at all. Perhaps the secret regrets of life are the weightiest, and chiefly on this account—that they are incommunicable. The man who respects himself, and is conscious that his ardent hope will never be satisfied, does not proclaim his grief to the world, nor, in all probability, does he tell it to his nearest friend. He wears his shirt of sackcloth, and conceals it under fine linen. The regrets caused by our own folly or incapacity are among the most painful to endure. A girl, by some act of waywardness, has lost her lover; a man, by his careless conduct, has missed a post that might have led to fame and fortune. A word, a look, an unjust suspicion, has broken hearts before now; and many a person, owing to a fatal error in youth, has walked ever afterward in the valley of humiliation. There is no comfort in feeling you will act more wisely another time, for that other time never comes. You have no more powder in your flask, no more arrows in your quiver; and now you are left to bear, as best you may, the consciousness of defeat. There is but one sorrow more lasting and more poignant than this, and that is when a man knows that his defeat in life's battle has been due to vice or to any laxity of principle. The regrets common to the race, being common, are more readily endured. We suffer deeply, but our grief is not without alleviations. As the years move on there is not a man, but may confess with Dogberry that he is "a fellow that hath had losses." Friends die and leave us desolate; but our grief, bitter though it may be, is softened by the thought that those we love have reached the haven where they would be. It is worth noticing, and indeed, when one comes to think of it, the fact is very significant, that regrets never follow virtuous actions.—London Illustrated News.

FOUND DROWNED.

The Body of a Young Girl Discovered Floating in the Columbia.

ARLINGTON, June 3.—The body of a young woman was discovered floating in the Columbia by a fisherman, named Capt. Babbe, yesterday morning near the Willows and word sent to this city to the coroner.

Dr. Bacon, the county coroner and a number of citizens went up to the Willows and an inquest was held, but no verdict as part of the jury believed the woman came to her death by violence and others by drowning. The body was then brought to this city to await developments.

There are several theories about the case, one being that the deceased belonged in Goldendale, W. T. She had a ring upon one finger, marked T. H. H. to R. S., or L.

A letter was received by the ticket agent here which inquired about a girl of a like description to the body found. The girl inquired after in the letter was called Rosa May Wedgewood, and the person making the inquiry signed himself, Ralph W. Schooner.

A girl answering the description came here May 29th, and just put up at the hotel. The day before the body was found she went away with a man named Al. Wallace, who told some of his friends that the girl was in trouble and he was going to take her home. Wallace has not been seen since. A doctor who examined the body said there were no marks of violence, but one of the jurors, Fred Varnum, insisted that there was the mark of the blow upon the forehead which would have caused death, and refused to assent to a verdict of accidental drowning.

Professor Procter's Worlds

The supposition that there may be "other worlds than ours" seems to excite a peculiar fascination upon the mind of Prof. Richard A. Procter. The "other worlds than ours," of which he speaks, are, of course, habitable worlds; and from the fact that Mars, for instance, in the solar system, is a planet whose physical features are not so different from those of the earth as to render it unhabitable by beings not greatly different from the fauna with which we are acquainted through actual contact, he judges it not unreasonable to infer that, being a habitable globe, it is an inhabited one. The bodies that compose our solar system are much more intimately connected with each other than they are commonly supposed to be, and it is by no means impossible that a contagion of life might spread from one planet to another, just as Canada thistle is blown down on to the north. According to Sir William Grove, something like two hundred millions of meteorites enter the earth's atmosphere every twenty four hours, and, though they are pretty hot when they reach the earth's surface, as some of them do, yet it is possible that their high temperature may not have destroyed all germs of life, which is conceivable, they might bring to us. Indeed, there is a scientific theory, the upholders of which contend that it was through meteorites that life was originally brought to light on our planet. If life be once granted in any quarter of the universe, there seems to be no good theoretical reason why it should not spread in all directions in which comical winds can blow comical dust. Professor Procter is wrong in saying that the question of life in other worlds "belongs rather to the domain of philosophy than of science, for it belongs to neither, and is a pure speculation, not for a moment to be dignified with the name of philosophy. There may be life in other worlds than ours, or there may not be, and at present there is absolutely no way of deciding the question. In order to the existence of life, environments such as those which earth affords are by no means necessary. Experiments which were made subsequently to Dr. Bastian's announcement that he had proved spontaneous generation—otherwise called abiogenesis and heterogenesis in the Spencian lingo—showed that living germs could withstand and survive an enormous degree of heat, and it is known that intense colds does not destroy their vitality. While one is speculating it would not be demonstrably absurd to say that life could not exist on Mercury or even on the suppositious Vulcan, or even in the sun. The life might not, may, could not, be like that of human beings, but none the less on that account would it be life, and when we remember that so great a scientific philosopher as Ernst Haeckel posits life even in the ultimate atoms themselves, where are we to stop? If the question were a metaphysical one we should recall Newton's exclamation, "O, Physics, beware of Metaphysics!"—New York Commercial Advertiser.

RESOLUTIONS OF THANKS.

HEADQUARTERS McPHERSON POST, No. 5, G. A. R., Department of Ore., June 5.

At a stated meeting of McPherston Post No. 5, held at their hall on Saturday evening June 2nd., the following resolutions were unanimously adopted.

Resolved, That the thanks of the post are sincerely tendered to Rev. H. P. Webb and other clergymen of the city, and choir who assisted in the Sabbath memorial services at the opera house, to Messrs. Wilkins and Black for martial music furnished on memorial day, the Mayor and business men of this city for their courtesy in closing stores and other places of business on that day, and to the W. R. C. and others for their aid and sympathy on that occasion, and especially to Miss Margery Brink and her class of little girls for the assistance rendered us at the cemetery and to Co. F, 2nd Regiment O. N. G., for their courtesy in acting as escort on that day. By order of the Post, S. F. TABLER, S. W. REECE, Adj't.

W. M. Stanley, while riding near Ashland a few evenings since, was accosted by a man who stepped up to the horse, and with his hand in his back pocket demanded that he get off and give him the horse. Mr. Stanley at first thought it was some acquaintance, but when he insisted on it Mr. Stanley pulled out a revolver, when the highwayman hastily fled.

FOUND DROWNED.

The Body of a Young Girl Discovered Floating in the Columbia.
