THE CALAPOOIA MINES.

Some Recent Strikes in this District Have Given it a Genuine Boom.

Correspondence of the Oregonian.]

BROWNSVILLE, June 12.

The Calapooia mining district, which for the last year has received but little attention, is now enjoying a genuine boom, in consequence of some recent "strikes." A party consisting of some of Brownsville's enterprising citizens—numbering some experts, and headed by Capt. Von Hagen, a miner of 18 years' experience—started for the above named district on the 7th of May last. A glance at the country revealed a mineral belt of perhaps two miles in width and in length co-extensive with the Cascade range.

Beginning at a point about one mile below the scource of the Calapooia, is "The Consolidated Calapooia." This consolidation comprises five distinct claimes. The Jumbo mine, a ledge 25 feet in width, is located one mile further down the river. This claim was but recently located, and already several persons, eager to swell their purses, have posted claims on this mammoth lead, still further west, and in the immediate vicinity of Treasure mountain, are located the Emma, Blanchard's Favorite, The Gold Dust, Zamoni, Brownsville, and other mines.

These mines are located in a region favorably situated. Their proximity to the farming belt, the short distance to Brownsville and other towns, and better than all else, an abundance of timber, an extensive water-power and other mining facilities, warrant us in beleiving that this section will prove a bonanza.

Already this company is negotiating with an Albany firm to put up a custom mill on Gold Flat.

THE FISH LAW.

Violated by the Trap and Pound Net Men.

The Portland News says: Alex Sutton, secretary of the Columbia river fishermen's protective union, has written a letter to Governor Pennoyer, complaining of violations of the fish law by trap or pound net men. One requirement of the fish law is that all fishing in the Columbia and tributaries shall cease between the hours of 6 P. M. each Saturday, and 6 P. M. Sunday, during four months in the year. Mr. Sutton alleges that these pound net men arrange their traps on Saturday nights so that to the inexperienced eye they appear inoperative; but the fact is that they are as effective in entrapping the unwary salmon as at any other time. On the other hand, Mr. Sutton alleges that the gill net fishermen have observed the law strictly, and he asks that trap fishermen should be compelled to do likewise. Gov. Pennoyer has referred the matter to the fish commission to investigate, with instructions to take such action as the law directs.

Harvesters.

Yesterday a large number of enterprising and influential farmers of this, and adjoining counties, were in the city looking up the matter of harvesters to garner in the approaching abundantly promising harvest. After viewing the different machines, and comparing all points of merit, including price and terms of purchase, they decided on the Osburne harvester, which is carried by the popular firm of Stewart & Sox. These gentlemen are commanding a large trade throughout the valley.

First Guns.

The first gun fired during the civil war in America was discharged by Franklin J. Moses at the steamer Star of the West, sent to supply Fort Sumpter in 1861. Edmund Ruffin, an old Virginian fired the first gun at Sumpter It is said that Moses is now a convict in the Massachusetts penitentiary, and it was stated in southern papers after the war that Ruffin had committed suicide after the surrender of Fort Sumpter.

U. S. and Canadian Territory.

The relative area of the United States and Canada is seldom understood by those who are not especially versed in geographical facts. Many people are surprised at learning that the area of the United States only exceedes that of Canada by about 30,000 square miles. The United States has 3,501,404 square miles; Canada, 3,470,392.

A Commendable Project.

W. H. Looney is making active efforts to induce the stocking of Lake creek a body of water some mile or so in extent near his fathers's place, with carp fish. If he is given sufficient aid he will succeed in his efforts and thus establish a very profitable business for future years, as the locality named is finely adapted to propagation of carp.

"My daughter was greatly troubled with Scrofula, and, at one time, it was feared she would lose her sight. Ayer's Sarsaparilla has completely restored her health, and her eyes are as well as ever, with not a trace of scrofula in her system."—G. King, Kilingly, Conn.

New Depot.

The Corvallis Gazette says: The Oregon Pacific railroad company recently purchased a portion of the Graham estate at Toledo adjoining the railroad and on Monday last commenced cleaning the grounds for the purpose of erecting a new depot and warehouse, which they expect to have completed at an early date. This improvement will be of great convenience to the people of Toledo as heretofore they have had no depot facilities whatever. The company has also purchased a portion of the water front for wharf facilities.

Cherries.

The cherry crop this season seems to be most abundant.
