THE SANTIAM MINES.

The Attention That Is Now Being Given to This Lining Region.

Mr. Legh Harnett, of Portland, contributes an article to the Oregonian on the Santiam mines, in which he pays this tribute to the value of this mining district: "I regard the Santiam district as a perfect repetition of Wallowa county, where the little galena at first existing will entirely disappear and give place to virgin silver and the sulphurets of silver. The rich, fine carbonates on the surface and the development work so far as carried, both tend to confirm the impression that the district will not be a silver-lead but a silver-gold producing district, with silver predominating. At the point I visited there are four distinct veins, three of which can be cut eventually by the same tunnel. The lowest vein of this group, down the mountain, is four feet wide of the very finest carbonate ore. It was cut, by tunnel, twenty-five years ago with the parties at work knowing it. After cutting right through the vein and then crossing several feet, they proceeded quite a distance beyond the vein into barren rock. All this seems incredible, but it is an actual fact. So much for mining a quarter of a century ago. The vein above this one is very handsome, opened by a shaft some ten feet deep and cannot fail to prove rich at depth. By actual measurement I found it twenty-eight feet wide from top to bottom. Several of these are in an advanced state of development, and all are daily improving as the work goes on. The drenching rain prevented my reaching this point, as was intended. In fine weather a man can see more and learn more than in wet, and I propose to make another trip to the Santiam mines before the season closes. The owners of these locations, in different companies, are Messrs. Read & Co. of Albany, and Messrs. Gamble, Hendrie and Andrusky of Portland, with others whose names I did not learn. It is not my province to give advice. Still, I cannot help saying, in my opinion, the Galena Milling and Mining Company need do no more development work on their property. The formation and veins are all established beyond question and need no further preliminary work, which, in fact, could be so much money thrown away. All that is now wanted is development at depth to make the property salable at a high figure if they want to sell. There is an old rule governing the game of whist, which applies equally well to mining. It is, first establish your suit and then trump like. So in mining, first establish your formation and prove your veins and then tunnel like—only at depth. Preliminary tunnels, fifty feet deep and one hundred feet long, prove nothing of the value of the property, but put together, cost more in the end than a good working tunnel 300 feet deep, which is available for all times. It was this silly, desultory way of tunneling that at first impoverished so many men in Coeur d'Alene without improving their property a single dollar. The formation and the veins at Santiam are thoroughly established already. All now wanted is a good working tunnel that will be useful to the end. At 300 feet deep, \$500 rock would not surprise me at all. Shallow tunnels will prove nothing more than can be seen to-day, but they will cost lots of money which can be put to a better purpose. I now come to the last point to be considered, the best route to REACH THE MINES.

LANDRETH HUNG.

The Slayer of His Step-Daughter Swung Into Eternity.

THE SCENES AT THE SCAFFOLD.

He Breaks Down and Cries Like a Child—A Bible and a Message Left for His Wife.

Special to the Herald. INDEPENDENCE, July 6.—When Landreth was hung in the jail enclosure at Dallas at 12:30 o'clock to-day for the murder of his step-daughter, Summie Antler, on the morning of January 28, 1888, in Independence, Oregon. Landreth had been lodged in the Marion county jail since his conviction, until this morning, when he was brought to Dallas. He slept well last night, resting easy, and was talkative on the way over, and kept up his spirits well until about 11 o'clock when Sheriff Smith and Ex-Sheriff Groves entered to dress him for the execution, when he completely gave way, and cried like a child, and his strength failed so that he could not stand while being dressed. Stimulants were administered to him, and he rallied and rested easily and ate a small piece of pie and cake for dinner. At 12:20 he was led from the jail to the scaffold erected on the north side of the jail, a structure 16x20 feet and 22 feet in height, by Ex-Sheriff Groves, of Polk county, and Sheriff Croisan, of Marion. He, with great difficulty, ascended the steps of the scaffold escorted by the before named gentlemen. When they reached the top of the stairs and turned, Landreth's eye caught sight of the rope dangling before him and he completely gave way, and was seated in a helpless condition on the chair just back of the trap door. Sheriff Smith took his place in front of him, and in a clear and distinct voice read the death warrant, while with closed eyes the murderer sat helpless as a child, steadied in his chair by the hand of Ex-Sheriff Groves. When the warrant was read, Landreth was asked whether he had anything to say, to which he replied "Nothing." He was then placed on the trap, and arms and feet pinioned, the black cap was drawn over his head and the noose adjusted to his neck. His body was raised for a moment by the hand of Ex-Sheriff Groves, when Sheriff Smith touched the lever, and the body of William Landreth shot through the trap, and tightened the noose, by which his soul was LAUNCHED INTO ETERNITY. After the fall the body hung motionless, and not a visible tremor shook the frame. Two minutes after the drop his pulse was 75, four minutes, and it had quickened to 120, six minutes, and it was 140. At seven minutes it was so rapid that it could not be counted, at eight minutes, it was very slow, beating about once in ten seconds, and then grew fainter as his life ebbed away. At 12:50, after hanging 20 minutes, the attending physicians, Drs. Lee and Wood, pronounced life extinct and the body was taken down. The fall completely dislocated his neck, the body falling 5 feet and 8 inches, and so quiet did it remain, that a handkerchief held in hand in life, remained in his grasp in death. He was placed in his coffin, and the spectators who had gathered, were admitted to see the body. At Landreth's request, his bible was sent to his wife at Independence. It had the following passages marked: Matthew XI, verses 28 to 30. Acts XVI, 31 verse. Luke III, verses 14 to 19. On the fly leaf were the following words: "I want you to have our children read this book, and teach them to live in accordance to its directions, so that the world will not be able to get away with them as it did with me. I want all to forgive me if possible, and I say God bless you all, and good-bye to all." On the last leaf of the bible was written: "I want to appoint three trustees to see after the welfare of my children, I. Vanduy, L. M. Butler and R. Shelley. I say God help these men to be a father to my children." The body of the murderer was consigned to a grave in the potters field, beside the grave of a man named Tarr, who killed a woman and then suicided some seven years ago in Dallas. Those who witnessed the hanging were: H. J. Kiley, Gas Sargeant, J. D. Ellis, T. J. Graves, C. C. Doughty, J. A. Smith, W. W. Williams, W. W. Brooks, P. W. Haley, Geo. E. Houck, Chas. Farley, I. T. Mason.

His Potato Bill Surprised Her

The funniest thing in town is the mishap of a gentleman whose wife runs the store bill. He has been in the habit of having his cigar bill charged up as potatoes, and the other day, his wife took her pencil and began to reckon. She finally found that they had been whooping it up at a regular starch factory rate in potatoes. Why, they had eaten over ten carloads of potatoes this winter and the past year and she didn't believe that the account was right. The grocer and the smoker and began to reckon.
