TESTING SUGAR BEETS.

How They Thrive in This Locality—About Sugar Factories.

Last spring Claus Spreckles, the sugar king, as he is called, wrote a long letter to S. E. Young, of this city, now president of the Albany Board of Trade, relative to the growing of sugar beets, in which he stated that if they could be successfully raised in this portion of Oregon he desired to establish a factory in this city. At the same time he sent a quantity of sugar beet seed, which was distributed in different portions of Linn county and along the Yaquina river, for the purpose of testing the capabilities of the different localities for raising this product. Mr. Ashby Pearce, residing near this city, planted about half an acre of these beets, and has now some fine looking ones, some of which were exhibited in this city yesterday. When they attain their growth this fall they will be tested by Mr. Spreckles' direction, and if they prove to possess the necessary qualities for making sugar, and the conditions here are deemed favorable for this enterprise it may lead to a profitable industry here.

Mr. Spreckles is experimenting in sugar beet raising in different portions of the country, and if he should inaugurate a big business like this here we might overlook some of the evils of his sugar monopoly.

At Waterloo.

Mr. J. G. Gross, proprietor of the popular hotel at Waterloo was in the city yesterday. He states that many people from different parts of the country are visiting this pleasure resort now, yet there are ample accommodations for many more. Board up there is only $5 per week. A bathing house has been fitted up in connection with the hotel, and visitors find everything convenient for rendering their stay pleasant. Parties who stay two weeks or more are conveyed from Lebanon to and from Waterloo free of charge, by giving Mr. Gross notice so that he can meet them. The stage leaves Lebanon for Waterloo on Tuesday, Thursday and Saturday of each week. Waterloo affords a nice, level camp-ground, while fishing and boating can be indulged in at pleasure, and the scenery is universally admired. The soda springs bubble up from the solid rocks, and are enclosed in a neat rustic building. Campers can purchase any and all kinds of supplies from the well stocked store.

Up With the Times.

In the tailoring department of L. E. Blain, under the management of W. R. Graham, can be seen one of the finest lines of men's suitings ever brought to Albany. They have made a specialty this season of this line of goods, and have just received from the East the latest and most desirable patterns for all kinds of men's clothing, which will be made up to order in the most approved style. There is no need to send away for fine tailor made clothing when the same quality can be procured right here in Albany at a less price. An examination of these patterns will satisfy the most fastidious.

Railroad Commission.

The railroad commission is now engaged on the preliminary work of preparing their report to the legislative assembly. The commissioners are hunting up law points and studying the reports of commissions of other states, with a view to making the report elaborate in facts while it is condensed in form. One of the commissioners or the clerk will be at work in the office nearly all the time from now on to October, when their report will be ready for the printer. All railroads doing business in the state are required to file their annual report to September first.

Tame Chinese Pheasants.

The Corvallis Times is responsible for the statement that last Friday a covey of young Chinese pheasants lit on Main street in that place. One of the young birds flew into Hanson's clothing store and another into Hershner's grocery store. They were both captured and kept for two or three days and then given their freedom. They are naturally a very tame bird, but this is getting unusually sociable.

Arrival of the New Engine.

The new steam fire engine recently ordered by the city council for Albany Engine Co. No. 1 arrived in the city yesterday. It is a fourth class Clapp & Jones engine of the latest and most improved make. THE TEACHERS.

A Pleasant Reception Given Them at the Depot Hotel Yesterday Morning.

As previously announced by a telegram to S. E. Young, president of Albany Board of Trade, yesterday morning's train brought through a large delegation of teachers. Our citizens, on receipt of the word late the evening before, set about preparing for a reception at the depot, and right royally was it accomplished, at least so W. N. Ackley, who was in charge of the party of teachers, and several other gentlemen of the party, desired a HERALD reporter to express their appreciation of the occasion. A temporary platform by the side of the depot building was improvised for a fruit stand, was completely loaded down with quantities of plums, peaches, apples, crabapples, cabbage, pie plant, corn, wheat, etc. The fruit was in quantities to furnish the party with a taste as well as a sight of the unequalled production of this celebrated Willamette valley, and blackberries by the crate, all of which were loaded into the teachers' hands—not a small share of it going directly to mouths—and on board of the train for the delectation of the teachers on their way. They all seemed perfectly delighted, and one lady teacher filled her arms with fruit, several boquets of flowers that were presented to her, a head of cabbage and a bunch of pie plant that Superintendent McElroy had piled on top, and was so encumbered that she found it impossible to get on board the train before it started, and Conductor Conser had to halt the train and wait for her. The Albany boys' band furnished music for the occasion. The party was made up of teachers from the New England states, mostly from Rhode Island, Mr. Ackley, the manager, being from Warren in that state. The time of stopping was so short that not many could be interviewed, but Messrs. C. W. Hill, of Roxburg, Mass., and W. C. Hardy, of Boston, were spoken with by the HERALD reporter. They presented a lively appearance, seemingly to be intellectually and, for the time being at least, gastronomically well endowed.

Ex-Superintendent Reid and State Superintendent McElroy accompanied them as far as Salem. To the undefatigable labors of these two gentlemen is due the credit for so many of the excursionists coming this way, as well as the pleasant success of this hastily improvised reception. The affair was under the control of the Board of Trade but the citizens turned out and vied with each other in making the display and the pleasant issue. Among the prominent ones working lustily was Prof. Walker of the public school who seemed exuberently happy, as well as President Condit and Prof. Lee of the Albany College. Our citizens will preserve a pleasant memory of this glance of this noble body of Atlantic seaboard teachers, and the teachers will bear away a kindly remembrance of Albany with its fruit, corn and cabbages.

COMING SOON.

Sell's Bros. Great Three Ring Circus Will Be Here August 27th.

Mr. S. H. Barrett, press agent of Sells Bros.' great Royal Roman hippodrome, elevated stage, three ring circus and five continent menagerie, is in the city, and the advertisers of this justly celebrated show are "painting the town red" with splendidly executed pictorial announcements of its coming. No exhibition in the world is better, if as well, advertised, and none so completely and to the letter fills the bill. Its reputation of being among the best tented displays on the road is cosmopolitan, and wherever its immense volume of mighty canvas is spread the patronage is sure to crowd it to its capacity. It comes to us this year with numberless added features, all strong drawing cards, and many of them never before presented to an American audience. Their bareback equestrians, both male and female, are marvelous performers; and the hippodrome attractions are as exciting as they are realistic. The show will be here Monday, Aug. 27.

Helping the Right Side.

To help the right side is not only commendable in a general point of view, but is judicious and prudent when that help is enlisted in behalf of the right side of the body, just over the lower ribs in the region of the liver. The most efficient help is afforded by Hostetter's Stomach Bitters, an anti-billious medicine of incomparable efficacy. Inaction of the liver is accompanied by constipation, sick-headache, furred tongue, nausea, occasional vertigo, an unpleasant breath, yellowness of the skin and ball of the eye. The author of these symptoms, liver complaint, routed by the Bitters is accompanied by them in its flight. Fever and ague, which always involves the liver, dyspepsia, rheumatism debility and kidney troubles are all maladies to the early relief and final cure of which this standard medicine is adapted. Don't use it by fits and starts, but systematically, that its effec may result in a perfect restoration of health.

ABOUT HAY PRESSES.

MAPLE BROS., FARM Aug. 6.

As there is at present quite a competition in hay baling machines I wish to say a few words in regard to a machine we have which I consider the leader of all other machines. I refer to the baler called the "Farmer's Favorite," manufactured by Martin & Jenks, Corvallis. We considered it the fastest on the turf. On Aug. 2nd, with a crew of four men viz., Wes. Maple, Dan Foster, Henry Cleveland and Ed. Dustin, in a run of a little less than nine hour, turned out 125 bales averaging 160 to the bale. The best time made on a single bale was two minutes and ¼ from the time the hay was brought to the baler until it was rolled away. The general average was a bale every 2½ minutes. If any one can beat our record we would like to hear from them through the columns of your valuable paper. W. M.

A Warning.

The modes of death's approach are various, and statistics show conclusively that more persons die from diseases of the throat and lungs than any other. It is probable that everyone, without exception, receives vast numbers of Tubercle Germs into the system and where these germs fall upon suitable soil they start into life and develop, at first slowly and is shown by a slight tickling sensation in the throat and if allowed to continue their ravages they extend to the lungs producing consumption and to the head, causing catarrh. Now all this is dangerous and if allowed to proceed will in time cause death. At the onset you must act with promptness; allowing a cold to go without attention is dangerous and may lose you your life. As soon as you feel that something is wrong with your throat, lungs or nostrils, obtain a bottle of Boschee's German Syrup. It will give you immediate relief.
