The dry cold weather of the early winter months is productive of a great deal of croup among children. Mothers should be on the lookout for it, and be prepared to arrest it as soon as the first symptoms appear. True croup never comes without a warning; a day or two before the attack the child will become hoarse, and that symptoms is soon followed by a peculiar, rough cough. If Chamberlain's Cough Remedy is given as soon as this hoarseness or cough appears, all danger and anxiety may be avoided; it has never failed, even in the most severe cases. There is no danger in giving the Remedy for it contains no injurious substance. For sale by Foshay & Mason.

Nipped in the Bud.

Is it not better to nip Consumption the greatest scourge of humanity in the bud, than to try to stay its progress on the brink of the grave. A few doses of California's most useful production, will relieve, and a thorough treatment will cure. Nasal Catarrh, too often the forerunner of consumption can be cured by California Cat-R-Cure. These remedies are sold and fully warranted by Foshay & Mason.

DESCRIPTION OF THE BLUEBERRY

The Blueberry is a valuable fruit and is reliable to grow in our Northern states, where the more tender varieties of fruits winter-kill. It is perfectly hardy, having stood 40 degrees below zero without showing any injury to the most tender buds. It ripens in this latitude about the 1st of July, and is borne in clusters like currants; shape, round; color, reddish purple at first, but becomes a bluish-black when fully ripened. The flavor is equal to the raspberry, a very mild, rich sub-acid, pronounced by most people delicious. It may be served with sugar and cream or cooked sauce, and is splendid canned for winter use The plant seems to flourish in all soils and is a prolific bearer. It grows very stocky and makes a nice hedge. The shining dark green leaves and the blue fruit making a pleasing contrast. The demand for the fruit is great, and ucually brings 15 cents per quart. They commence bearing the first year after setting out, and yield a full crop the second and third year after setting out. They are propagated from suckers and root cuttings. The plant is about the height and size of a currant bush and very stocky, holding the fruit well up from the ground Plants should be set in the spring, during March, April and May, in rows two or three feet apart, and five or six feet between the rows, making a perfect hedge, and no grass or weeds should be allowed to grow between rows.

AT YAQUINA BAY.

Annual Report of the Engineers of the Government Work.

IMPROVEMENTS AND WORK DONE.

How the Appropriations Have Been Expended—The Future Work—The North Beach Jetty.

The annaul report of the engineers, Charles F. Powell and Capt. Willard Young, who have been in charge of the works at Yaquina for the two years past shows that the prevailing depth over the bar at low water before improvements were 7 feet to 8 feet. Three distinct channels existed, known as the north, middle and south channels. The south channel was the most used, but was rendered dangerous by the presence of rocks. The middle channel, though free from rocks was usually the shoalest of the three and so was little used. The north channel besides being long and tortuous, was so studded with rocks as to be considered unnavigable. Owing to the shiftless nature of the bar, these channels were constantly changing both in position and in depth.

WORK DONE DURING THE YEAR.

It was thought that the funds available at the beginning of the year would permit an extension of 600 feet to be made to the jetty during the year. However, such a scouring took place around the head of the jetty as it advanced as to necessitate using much more stone than was estimated for. On this account an extension of only 460 feet was made.

An examination made June 9 1888, showed the channel to have a depth of 11 feet at low-water, and to be straight out on a line a little to the north of but parallel to the jetty.

A spur-dike for shore protection will also be needed.

If the present project is carried out an extension seaward of about 1,500 feet will have to be made.

A project was submitted by Captain Chas. F. Powell, Corps of Engineers, on April 6, 1887 (page 2467, Annual report of the Chief of Engineers, 1887), for a jetty on the north side of the entrance. This jetty would close the north channel, through which at certain times of the year, a large part of the tidal waters pass, and would, with the south jetty, tend to concentrate the tidal currents in one central channel, and thus insure the deepest water practicable over the bar. No notice has been received of the approval of this project, though Department instructions by telegraph of late date direct that the estimates in this report provide for a north jetty.

Such an improvement to the entrance as will permit foreign grain ships to cross out, when loaded, is most urgently demanded. A vigorous prosecution of the work of improvement would not interfere with navigation; and for the sake of economy it is desirable that the work should progress rapidly. The whole amount asked for could be profitably expended in one year.

Submitted in compliance with the requirements of section 2 of river and harbor acts of 1866 and 1867.

PLAN OF IMPROVEMENT.

The approved project, adopted in 1881, is to run out a dyke or jetty on the south side of the entrance so as to cause the south canal to and the flow to be deflected northward, with a view to opening and maintaining the central channel, with a least depth of 17 feet at high water.

As originally projected, the dyke was to start from near low-water line and run out into the sea a distance of 2,500 feet, and was to rise to 2 feet above mean low water. The beach on the line of the jetty, from high-water level to low water level, was to be protected by sinking gabions in the beach with sand heaped over them, and by covering the surface with a layer of mattresses and stone.

The stone for the jetty was to be deposited in place from barges, and cribs were to be used, if practicable. It was found however that cribs could not be used on account of the strong currents and high seas and that the ocean swell, even in quiet weather, was too great to permit the use of stone barges. Accordingly, the jetty had to be built from the shore end, carrying the stone out over a tramway, and was begun at high tide line instead of at low-tide line, thus making the total projected length of the jetty, in 1881, 3,700 feet. In 1884 the jetty was extended shoreward a distance of 316 feet, making the present total projected length of the jetty about 4000 feet.

COMMERCIAL STATISTICS.

Yaquina Bay is in the collection district of Yaquina. Yaquina is the port of entry. The nearest light-house is at Cape Foulweather 4½ miles north of the entrance. Yaquina Bay forms, with the Oregon Pacific Railroad, a competitive line from the Willamette Valley to San Francisco. A coasting steam schooner runs to and from the bay. A new shipping company has recently been incorporated, with the object of developing a trade with Portland and intermediate ports along the coast.

Are We to Have Another War?

Some political prophets aver that we shall. Be that as it may, the battle waged by medical science against disease will never cease until we arrive at the utopian epoch when the human family shall cease to be afflicted with bodily ailments. One of the most potent weapons which the armory of medicine furnishes, is Hostetter's Stomach Bitters, which is of special utility as a family remedy, as it is adapted to the immediate relief and ultimate cure of those disorders of the stomach, liver and bowles which are of commonest occurence. Indigestion, biliousness and constipation are inseparable companions as these ailments are completely eradicated by the Bitters. But the remedial scope of this superlatively wholesome and genial medicine takes in also nervous ailments, rheumatism and kidney troubles; its action in these, as in the other complaints, being characterized by unequaled thoroughness.

Eureka.

The motto of California means I have found it. Only in the land of sunshine where the orange, lemon, olive, fig and grape bloom and ripen and attain their highest perfection in mid-winter, are the herbs and gum found that are used in this pleasant remedy for all throat and lung troubles, Santa Abie the ruler of coughs, asthma and consumption. Worth Knowing.

Mr. W. H. Morgan, merchant, Lake City Fla., was taken with a severe Cold: attended with a distressing Cough and running into Consumption in its first stages. He tried many so-called popular cough remedies and steadily grew worse. Was reduced in flesh, and had difficulty in breathing and was unable to sleep. Finaly tried Dr. King's New Discovery for Consumption and found immediate relief and after using a half dozen bottles found himself well and has had no return of the disease. No other remedy can show so grand a record of cures as Dr. King's New Discovery for Consumption Guaranteed to do just what is claimed for it. Trial bottle free at Foshay & Mason

NEW YORK, Jan. 19.—Harriet Coffin, arrested last night for annoying Kyrle Bellew, was committed for examination as to her mental condition. She is very indignant because she has been locked up with a number of dissipated women. She denied that she had given the actor any annoyance.

ALASKA'S RESOURCES.

Governor Swineford's Estimate of Their Value.

WASHINGTON, Jan. 18.—Governor Swineford, of Alaska, estimates the annual resources of the territory at about $9,000,000, divided as follows: Fisheries, $4,000,000; minerals, $2,000,000; all other resources, $3,000,000. He urges the development of the territory's mines, especially those of coal, which he claims exist there in large quantities, naval vessels frequently coaling up there with native coal.

MAY HAVE ICE YET.

Idaho's Weather Prophet Says the Severest Weather Is to Come.

OGDEN, Jan. 19.—Old man Wigs, a well-known weather prophet of Northern Idaho, announces that the winter yet to come will be the severest ever known. He bases his prediction on the assertion that the moon is away out of its place in the heavens, being several degrees further north than usual, which, in his opinion, is an unfailing sign of cold weather.

"I never knew it to fail," he said the other day, in discussing the matter. "If the moon had only gone a little out of its way I wouldn't say a word, but here it is at least 5000 miles further north than it has any business to be. Three times since I have lived here this thing has happened, and there has always been killing weather. One time it was so cold that the earth cracked and men were frozen stiff standing up. I never saw the moon so far north before though, and I tell you to look out for what's a coming."

Detective Pinkerton's Denial.

NEW YORK, Jan. 19.—Robert A. Pinkerton, of Pinkerton's detective agency, writes to a morning newspaper denying that he was employed by the London Times or the British government to secure evidence against Parnell, as has been charged.

McCaffrey and Fallon Matched.

NEW YORK, Jan. 18.—Jack Fallon and Dominick McCaffrey to-day signed articles for a ted-round fight, Marquis of Queensbury rules, at Hoboken, in about a fortnight. McCaffrey has also written to the California Athletic Club, offering to fight Jack Dempsey to a finish for a purse of $5000 to be given by the club.
