ABETINE MED. CO. OROVILLE, CAL. HAVE YOU A COLD IN THE HEAD? Do you get better? Have you an excessive secretion of mucus or matter in the nasal passages which either must be blown from nose or drop back behind the palate or hawked or snuffed back into the throat?

Do you have the CATARRH. Some have all these symptoms, others only a part. The leading symptom of ordinary catarrh is increased secretion of mucus or yellow or greenish colored matter. Foul breath is caused by the decomposing secretions exhaled from festering ulcers for rank in the head; sometimes the membrane covering the bones is eaten away and the bones themselves gradually decay. Such cases are in fact deep objects of pity, as stench from corroding sores reveals the corruption within.

As every breath drawn into the lungs must pass over and become polluted by the secretion in the nasal passages, it must necessarily have the same effect on the sleep stolen to the stomach, which causes the most distressing and finally greatest suffering.

DO NOT PROSTATE. As every breath drawn into the lungs must pass over and become polluted by the secretion in the nasal passages, it must necessarily have the same effect on the sleep stolen to the stomach, which causes the most distressing and finally greatest suffering.
