THE CORPORATE LIMITS.

To THE EDITOR OF THE HERALD: In the Democrat of the 30th ult. appears an article from "Third Warder," which gives the W. V. & C. R. R. Co. a merited rebuke for opposing the proposed extension of the corporate limits of the city of Albany.

Of course we all know that the advent of the afore-said railroad into the heart of the Willamette Valley has been of vast importance to the people, and no locality appreciates this fact more highly than do the good people of Albany, in proof of which we refer to the substantial aid extended, in more ways than one, and we all say with one accord: May the good Lord speed them on their Eastern course to an early connection with some transcontinental road. After having been made the recipient of a magnificent donation of land, and after having been granted free right of way through our streets, and after having abused that right of way by appropriating the whole of some parts of the street for side tracks, switches, stock corrals, temporary depot buildings, etc., and when re-constituted with by the council for such abuse, they assume an air of inspired innocence and say: "These are only temporary improvements, and just as soon as we locate our permanent depot we will remove all but our single track." Well, they have now enjoyed the right of way for more than two years, and if there is any prospect in the near future of locating a permanent depot, it certainly has not been proclaimed from the "house-tops of Albany."

And now when the people of Albany, to meet the demands of our fast increasing population, ask our state legislature to extend our corporate limits to a moderate degree they are up in arms in a moment and say: "Thus far shalt thou come and no farther." To say the least it looks just a little out of place. MIDDLE WARDER.

[The above communication, is we think, a little too severe criticism upon the Oregon Pacific railroad. The people of Albany are in the fullest sympathy with the interests of this road, which has contributed much toward the city's growth. The plain facts of the matter is that to meet the steady growth of the city it is desirable to extend the corporate limits, and the people of Albany feel that the Oregon Pacific Co. ought not to oppose it. Through the enterprise of her citizens in liberal expenditures for public improvements and enterprises Albany is becoming a city of commercial importance. The residence portion of the city has been largely increased during the past two years, and in order to make room for this steady growth, both in business interests and population, the city limits ought to be extended.—EDITOR.]

Yaquina Fishing Interests. Yaquina Bay has a fair prospect of becoming the headquarters for deep sea fishing on the coast. Reliable information on the subject of deep sea fish on the coast is meagre and the knowledge possessed by the people is limited. It is an industry yet undeveloped, and it requires considerable nerve for men to invest much money in a project to test the matter. It is known that extensive fishing banks or feeding grounds are located about forty-five miles southwest of this Bay, where hali out, cod and other valuable food fish are plenty. We hope the company formed to prosecute fishing on these banks will meet with complete success.—Yaquina Republican.

Evergreens for Sale. Mr. H. W. Settemire the largest nurseryman that has a full supply of all the leading and desirable varieties of evergreen trees from two to three feet high, which are in season cheap, and those desiring such trees will do well to call upon him before going away from home. He has also several thousand Italian and Hungarian prune trees, as well as a general variety of fruit trees. Make out your orders and send or go to him for the trees you want, and support a worthy home industry.

Property Exempt. In Oregon the following property is exempt from execution: Musical instruments books and pictures \$75; household effects, \$300; clothing \$100; and clothing to each member of the family \$50; team, tools, instruments or library or whatever is needed in the trade or profession of debtor, \$400; ten sheep, two cows, five hogs three months provender. No exemption is good against a claim for purchase money; no homestead.

Information Wanted. Mrs. Fanny Morrison would like information respecting the present whereabouts of her husband, Geo. Morrison, who went to Portland last fall and has not been heard of since. Anyone who knows of Mr. Morrison's whereabouts and will communicate the information at Waldport Oregon, will confer a favor on the anxious wife.

An Incipient Blaze. About noon yesterday a fire alarm was sounded which quickly called the department out. It proved to be an incipient blaze in the barn of F. S. Crosby in the third ward, caused by sparks blowing from some burning rubbish. The fire was extinguished without damage before the fire companies reached the spot.

G. W. Simpson has purchased at a bargain a new stock of boots and shoes, consisting of such standard makes as P. Cox, Buckingham & Hecht, Porter, Bessinger & Co., etc., including men's and boys' boots and shoes and ladies' fine shoes, which will be sold at cost. Call and see them.

DESCRIPTION OF THE BLUEBERRY. The Blueberry is a valuable fruit and is reliable to grow in our Northern states, where the more tender varieties of fruits winter-killed. It is perfectly hardy, having stood 40 degrees below zero without showing any injury to the most tender buds. It ripens in this latitude about the 1st of July, and is borne in clusters like currants; shape, round; color, reddish purple at first, but becomes a bluish-black when fully ripened. The flavor is equal to the raspberry, a very mild, rich subacid, pronounced by most people delicious. It may be served with sugar and cream or cooked sauce, and is splendid canned for winter use. The plant seems to flourish in all soils and is a prolific bearer. It grows very stocky and makes a nice hedge. The shining dark green leaves and the blue fruit making a pleasing contrast. The demand for the fruit is great, and usually brings 15 cents per quart. They commence bearing the first year after setting out, and yield a full crop the second and third year after setting out. They are propagated from suckers and root cuttings. The plant is about the height and size of a currant bush and very stocky, holding the fruit well up from the ground. Plants should be set in the spring, during March, April and May, in rows two or three feet apart, and five or six feet between the rows, making a perfect hedge, and no grass or weeds should be allowed to grow between rows.

PRICE LIST. 1 dozen plants by mail \$ 60 2 dozen plants by mail 1 00 100 dozen plants by express 2 50 1000 dozen plants by express or freight 15 00
