

Morning Daily Herald.

15 CENTS A WEEK.

ALBANY, OREGON, SATURDAY, MARCH 23 1889.

VOL. IV.—NO. 101.

We Can and Do
Guarantee Acker's Blood Elixir for it has been fully demonstrated to the people of this country that it is superior to all other preparations for blood diseases. It is a positive cure for syphilitic poisoning, ulcers, eruptions and pimples. It purifies the whole system and thoroughly builds up the constitution.

How Can Parents
allow their children to cough and strain and cough and calmly say, "Oh it's only a cold," and keep giving them cheap and dangerous medicines until they are down with lung fever or consumption, when they can be so easily relieved by BEGG'S CHERRY COUGH SYRUP? It has no superior, and few equals. Geo. L. Blackman, druggist.

Caution to Mothers.
Every mother is cautioned against giving her child laudanum or paragon; it creates an unnatural craving for stimulants which kills the mind or the child. Acker's Baby Syrup is specially prepared to benefit children and cure their pains. It is harmless and contains no opium or morphine. Sold by Foshay & Mason.

Opp of the Bud.
It is not better to nip Consumption the greatest scourge of humanity in the bud, than to try to stay its progress on the brink of the grave. A few doses of California's most useful production, will relieve, and a thorough treatment will cure. Nasal Catarrh, too often the forerunner of consumption, can be cured by California Cat-R-Cure. These remedies are sold and fully warranted by Foshay & Mason.

SPECIAL NOTICE.
DR. W. C. NEGUS,
Graduate of the Royal College of London, England, also of the Bellevue Medical College.

The Dr. has spent a lifetime of study and practice and makes a specialty of chronic diseases, removes cancers, scrofula enlargements, tumors and wens, without pain or the knife. He also makes a specialty of treatment with electricity. Has practiced in the German French and English hospitals. Calls promptly attended day or night. His motto is "GOOD WILL TO ALL."
Office and residence Ferry street, between Third and Fourth.

WANTED.
THOSE WISHING A FIRST-class piano, sewing machine, the latest music or artists' materials, will find a bargain by calling at Mrs. E. Hyman's. The pianos are fully guaranteed for five years. The best pianos made to stand the climate of the Pacific coast. The New American Sewing Machine will please most fastidious. Painting and music lessons given there. Stamping, Embroidery and Dressmaking done to order. No. 115 1st St., Albany, Or.

9,999.00
IN GOLD

GENERAL NEWS.

Our Usual Budget of News from the National Capital.

TO CRUISE IN NORTHERN WATERS

The U. S. Steamship Thetis Ordered North to Look after Our Interests.—The Merrimac Story.

The Herald's Special Dispatches.]
WASHINGTON, March 22.—Hon. Wm. E. Chandler has sent the flag of the sixty-fifth Infantry and Fifth Cavalry of Pennsylvania, captured during the war by the rebels, to Senator Quay, requesting him to return them to the survivors of those regiments. This has been done.

A NORTHERN CRUISE.
The U. S. Steamship Thetis Ordered to Proceed to Northern Waters.

WASHINGTON, March 22.—Sailing orders have been sent to the United States steamship Thetis at the Mare Island navy yard to proceed to Sitka, touching at such places as the commanding officer may deem necessary. When she arrives at Sitka and communicates with the civil authorities she will, if the situation is quiet and her presence there is not required, continue on northward and devote her attention particularly to the whaling fleet and other commercial interests of the United States in the waters about the Behring straits and the Arctic ocean. As the whaling vessels usually leave the Arctic sea in the latter part of September the presence of the Thetis until then will add security to those engaged in that important industry and the Thetis will remain until they have taken their departure southward, taking care not to be caught in the ice. She will then return to Sitka and await further instructions.

MUCH ABOUT NOTHING.
There Were No Skeletons on the Sunken Merrimac.

NORFOLK, Va., March 22.—The story that two chained skeletons were found in the hold of the sunken rebel ram Merrimac is denied, and it is asserted that they were in the hold of the United States ship Cumberland, which the Merrimac ran down.

A SON'S DISGRACE.
Robert Sigel Sentenced to Imprisonment for Six Years at Hard Labor.

New York, March 21.—Robert Sigel, son of General Franz Sigel, who pleaded guilty to the forgery of pension checks, was sentenced in the United States court today to six years' imprisonment at hard labor. The prisoner exhibited great nervousness as Judge Benedict told him he had wronged many persons, and that it was difficult to find any circumstance to warrant a mitigation of punishment.

Sigel's young wife wept bitterly in the rear of the court room when she heard the sentence pronounced. When the prisoner was being taken back to jail his brother fainting in the hallway outside of the court room, and was unconscious for an hour.

The commissioner of pensions writes, notifying the persons swindled through Sigel to communicate with the pension office at Washington.

THE WHEAT CROP.
March Statistical Report of the Agricultural Department.

WASHINGTON, March 21.—The March statistical report of the department of agriculture gives the average weight of wheat by states: General average 56.5 pounds, the lowest of six years. In the spring wheat region the range is from 63.5 in Dakota to 55 in Nebraska. It makes the crop equivalent to 391,000,000 bushels, sixty pounds each; less by nearly 25,000,000 bushels than the quantity in measured bushels.

A Good Word for Oregon.
The New York Sun in a recent issue says: "What a glorious country we have! What abundant resources we enjoy. Here are the dispatches from Oregon about the opening of new timber ranges in the Cascade mountains. We are told that the Cascades, which have been opened up by a new railroad, are covered with magnificent forests of majestic growth, forests of cedar, larch, fir, myrtle, laurel, oak, ash, sugar pine, cabinet maple, and other valuable trees that are ready for all uses known to the arts, and that constitute a variety of lumber surpassing that found in any other part of the United States, even Michigan, Maine or Georgia. We are also told that mineral belts and coal mines have been discovered in the same region, and that the fertile farming lands but await the hand of industry to give abundant crops of cereals. We are disposed to believe these wonderful reports from Oregon. All that the state needs for the development of its resources is population. It can

CAPTURED BY CAPT.

Justice Gray of the Supreme Court to be Married.

WASHINGTON, March 19.—Justice Gray, of Massachusetts, the veteran bachelor of the supreme court of the United States, is to join the army of benedicts. He has confided to an associate justice of the court his engagement to Miss Jeanette, daughter of Associate Justice Stanley Matthews, of Ohio. Miss Matthews is nearing 30 years of age, while Justice Gray, who is a very tall, finely formed and well preserved man, is probably 62 years of age. The justice did not impart to his associates the date of his intended marriage.

Deep-Sea Evolution:
The Catholic Magazine.

Despite the fanciful pictures which some writers have drawn of the ocean bed, its desolation, at least in its deepest parts, must be extreme. Beyond the first mile it is a vast desert of slime and ooze, upon which is constantly dripping a rain of dead carcasses from the surface, which carcasses supply the nourishment for the scanty fauna inhabiting the abyssal region—in some places more than five miles from the sunshine—and the microscope reveals that the slimy matter covering this deepest ocean bed is very similar in composition to the ancient chalk of the Cretaceous period, while mixed with it here and there are minute metallic and magnetic bodies which have been proved to be dust from meteorites. At long distances a phosphorescent light gleams from the head of some passing fish which has strayed thither from a higher and happier zone. But it is not until we have mounted a good deal nearer the surface that the scene changes for the better. We now meet with forests of brilliantly colored sponges, while the phosphorescent animals swimming about are much more numerous, and the nearer we get to the littoral zone more and more phosphorescent lights appear, till at length the scene becomes truly animated.

When only 1,200 feet separate us from the sunshine we come upon the first seaweed and kelp (1,300 feet is the deepest limit of plant life in water), but we must rise still another 1,000 feet and more, and get as near the top as 130 feet before we find any reef-building corals. As plants do not live in deep sea, the deep-sea animals either prey on one another or get their food from dead organisms and plants which sink down to the bottom. Thus Maury says: "The sea, like the snow cloud with its flakes in a calm, is always letting fall upon its bed showers of microscopic shells." An experiment proves that a tiny shell would take about a week to fall from the surface to the deepest depths. Since sunlight does not penetrate much farther than the littoral zone there would be beyond this perpetual darkness but for phosphorescence. Many of the animals inhabiting the continental and abyssal zones have merely rudimentary eyes; but these blind creatures have very long feelers, which help them to group their way along the bottom. Other deep sea animals, on the contrary, have enormous eyes, and these very likely congregate around such of their number as are phosphorescent, and may perhaps follow the moving lamposts about wherever they may go. And so bright is this light on many of the fish brought up by the dredge that during the brief space the animals survive it is not difficult to read by it. The reason why fishes and mollusks living more than three miles under water are able to bear a pressure of several tons is that they have exceedingly loose tissues, which allow the water to flow through every interstice and thus to equalize the weight. When the pressure is removed they perish. In the Challenger expedition sent out by the British Government all the sharks brought up from a depth of a little less than three-quarters of a mile were dead when they got to the surface of the sea.

A Pleasant Neighborhood.
"Is that family that has moved in next door neighborly?" asked one Sioux Falls woman of another.

"Yes, they appear to be. They've borrowed four of my twice tea-sauce and sugar three times. Then they have got our coffee mill and one tub and the hatchet and two lengths of stovepipe and the baby carriage, and the woman empties all her slops over the fence in our yard and I see her coming across now to hang her clothes on our line."

"I shouldn't think you would like to let them borrow things so much and be quite so free."
"Oh, I don't worry much about it. We've got their map and about half their dishes and their railing pin and washing machine, and the other day I borrowed ten sticks of wood from them and each afternoon our hired girl puts on better clothes than the woman has to her back and walks up and down on the sidewalk, and to-night I'm going to put out poison for their d-g.

Oh, we're getting along very nicely

and think they are going to be very pleasant neighbors. This always was a splendid neighborhood."

Household Hints.
Tissue or printing paper is the best thing for polishing glass or tinware.

The best of tea makes but an indifferent concoction unless the water is fresh.

Egg-shells crushed and shaken in a glass bottle half filled with water will clean it quickly.

Kerosene is unexcelled in starch to give polish; also to polish glass; it will make your windows shine like silver.

A clean ornaments of alabaster dissolve borax in boiling water and apply with a cloth or soft brush; rinse carefully, and dry in the sun.

Pneumonia, says Dr. Seibert, is a house disease, originating with diphtheria and inflammatory rheumatism, in damp, dirty, or unventilated rooms and cellars.

The remedy against sore throat of wearing a few threads of Berlin wool around the throat is said to act by keeping up a belt of skin action, and so acting as a counter-irritant.

What Others Say.
The Eugene Register says of the Albany Woolen Mill proposition:

Our sister city, of Albany, is rejoicing at the prospect of having the woolen mills located at Brownville removed to Albany, and enlarged to the capacity of manufacturing 350,000 pounds of wool per annum. At a public meeting of the citizens the proposition made by the owners of the plant was accepted, and one half the amount required as a bonus was raised, and there is no doubt but the remainder can be easily raised. The business men of Albany are wise in offering financial encouragement to every industry that increases the capital and productive power of the town. The most unfortunate situation a town can be placed in, is to be put under the shadow of a boom that has nothing to sustain it but the visionary prophecies of those who are interested in booming real estate in all directions. Legitimate buyers are deterred from investing; manufacturers go elsewhere, and the boomers are ultimately left with nothing but collapsed schemes on their hands.

One Enough for Him.
"Thank heaven!" exclaimed a father as he paced the floor at midnight with his howling heir; "thank heaven you are not twins!"

Teachers' Institute.
The regular annual County Teachers' Institute will be held in this city on April 3d, 4th and 5th. State Supt. McElroy will be present. Let all teachers who can be present.
L. M. COOK,
County School Supt.
