EDITORIAL NOTES.

The law's delay begets impatience while a rapacious trust puts sugar up to a point fitly described as extortion—a trust that is really a conspiracy against the rights of all buyers.

Good roads, hard and smooth, contribute very largely to farm profits, besides being a means of grace in lessened provocation to swearing over broken harness or vehicle.

PERHAPS it would be good for farmers to restrict labor through one season to about eight hours a day by way of regulating prices somewhat in proportion to cost of production.

THE CZAR of Russia leads a life of continual dread of some one dropping a dynamite bomb into his carriage. If it were not just for the name of it an average American would rather drive a swill cart, than be Czar of all the Russias.

THE free use of pistols and the exhibition of violence in Oklahoma is not a credit to American civilization. Frontier ruffianism is past, and the settlement of that region at the muzzle of a pistol in the hands of every settler will make it a place to be shunned for years to come.

GOLD coin is at a premium of 64 per cent in the Argentine Republic. An over-issue of paper has broken down the finances of the country. In this country the finances are in good enough a condition to be let alone. A gold dollar, a silver dollar, or a greenback dollar are each a full and equal equivalent, a condition of things which needs no further tinkering.

ADVICES from every part of the territory of Oklahoma indicate that every available quarter section of land is already taken along the line of the Atchison railroad and on the stage trails which run from Guthrie to Kingfisher and from Oklahoma to Fort Reno. The occupants of the soil have taken possession of their claims by pitching tents, and in many cases erecting rude log cabins or frame structures.

THE hunt for Tascott, the murderer of old Millionaire Snell of Chicago, has not been more fruitless than the search for William R. Foster Jr., who stole \$192,000 of the gratuity fund of the New York Produce Exchange. Five thousand dollars reward was offered for the capture of this fellow, but not a trace of him has been discovered. His father, like the father of Defaulter Eno, made good about one-third of his son's stealings.

THIS is a year when politics and politicians will take a rest, and the energies of the people will be expended in the development and advancement of the interests of the country instead of stump speeches and political demonstrations. A marked business activity will be the result. Especially will this be realized in Albany and vicinity, where railroad construction, the erection of new manufacturing, and other public enterprises will give employment to many men and place in circulation many thousands of dollars.

THE non-arrival of the Monongahela at Samoa has caused considerable uneasiness in naval circles. The ship has now been out over sixty days and no word of her arrival has been received. The Monongahela left San Francisco February 18th loaded with stores, and in addition carried a large deck load of coal for the use of the fleet, now unfortunately destroyed. The distance from San Francisco to Apia is 4300 miles, and with favorable winds, such as prevail at this season, she ought to make the voyage in at least forty days.

ONE year ago the town of Oskaloosa, in Kansas, made itself the laughing stock of the state by electing a lady mayor and a council of ladies. The first thing that the

new officials did was to enforce the Sunday law. They allowed hotels, livery stables, barber shops, and drug stores to keep open, but stopped the sale of cigars, tobacco, bread and ice-cream. Next, the bad boys were looked after. A proclamation was issued ordering all boys under the age of eighteen to keep off the streets after 8 o'clock at night. It occurred to the ladies that while they had the power the tobacco evil ought to be dealt with, but the city attorney told them that squirting tobacco juice over the sidewalk came under the head of personal liberty and could not be interfered with. They then tried moral suasion, and appointed a committee to visit every tobacco chewer in town. This course was completely successful, and there was no further trouble about the sidewalks. For many years very little attention had been paid to the streets, and the property owners were unwilling to be taxed for new pavements. The lady mayor and her council decided that they would have good streets and sidewalks. They passed ordinances, made contracts, superintended the work in person, and successfully fought the injunctions and other suits brought against them by the property owners in the courts. Now that they have survived a year of petticoat rule the citizens of Oskaloosa are not inclined to make fun of it. They say that their town has prospered, and has made an enviable reputation for good morals, law, and order. In this particular instance the female suffrage experiment in Kansas has turned out very satisfactorily. But one swallow does not make a summer, and it will take more than one Oskaloosa to revolutionize the world.
