The modes of death's approach are various, and statistics show conclusively that more persons die from diseases of the throat and langs than any other. It is probable that everyone, without exception, receives past rumbers of Tubercle Germs into the system and where these germs fall upon suitable soil they start into life and develop, at first slowly and is shown by a slight tickling sensation in the throat slight tickling sensation in the throat and if allowed to continue their ravages they extend to the lungs producing consumption and to the head, causing catarrh. Now all this is dangerous and if allowed to proceed dangerous and if allowed to proceed will in time cause death. At the orset you must act with propertiess; allowing a cold to go without attention is dangerous and min lose you your life.
