A Fortunate Druggist.

Mr. Edwin W. Joy a prosperous druggist on the corner of Stockton and Market streets, in San Francisco, probably never dreamed of rivaling in wealth the medicine kings of the country.

It seems that about seven years ago an English physician, a great student of Botany, located in this city. His practice was not extensive, and yet the few cases that came to him attracted no little attention.

His great success seemed to be in the treatment of liver and kidney disorders and vitiated blood. He seemed almost infallible, and his well-kept secret was as much a mystery as himself.

After his departure Mr. Joy determined to fathom the secret, and copying all the prescriptions he had filled for the erratic doctor, he began a systematic analysis.

He discovered through the prescriptions running all through the prescriptions for liver and kidney troubles, vitiated blood and stomach disorders a couple of vegetable extracts indigenous to California so simple and so well known under home-say every day name to every school boy as to entirely dissipate the suspicion that they were the active principles involved.

So certain, however, was Mr. Joy that he had discovered the secret that he embodied the new elements in a preparation of Sarsaparilla to disguise the taste, and put it before his customers under the modest name of Joy's Vegetable Sarsaparilla.

Immediately the same stories came back of its astonishing effects, and the mystery was solved, and the talk it has created has already caused it to step into prominence, and orders pour in daily from all over the coast.

And thus another California industry leaps into existence.—S. F. Examiner.
