EDITORIAL NOTES.

HON. SOL. HIRSCH, United States Minister to Turkey, will be tendered a farewell banquet at his home in Portland before leaving for his new field of labor.

A New York syndicate have purchased a Lake Superior iron ore mine which it is said will practically give them the control of the non-Bessemer semite-iron business of the country.

LIEUTENANT WOOD of the United States Navy, who has been much in the east, declares that the efforts of missionaries to convert Chinese to christianity have been perfectly fruitless. His statement will probably be taken with a great deal of allowance.

The vigilantes in Virginia recently perpetrated a lynching that differed from the usual method. They hung two men up by the heels and then shot them to death. The men were suspected of having outraged and murdered a widow lady and her two daughters.

The people of Truckee, California, have adopted an efficacious way to rid themselves of the bad element in their town. A woman beater who would not desist from this barbarous work was given a heavy coat of tar and feathers and placed on the cars for Sacramento.

ANOTHER one of Chief Justice Fuller's daughters has eloped from the family home in Chicago with an insurance agent. Judge Fuller's girls seem not to harbor any great respect for the paternal authority. There are said to be six more to follow the example of the two have already eloped.

The settlement of the Behring's sea seizure matter calls for the exercise of wisdom as well as firmness, and a close adhesion to the American view of the rights to control those waters. These qualities are eminently possessed by those having charge of the department of state and will be satisfactory arranged for our people despite the threats, enjoining, and bluster of the London Times, which attempts as usual to bully the matter to its own suiting.

The shooting of Judge Terry by Deputy Marshal Nagle in protection of Justice Field, is generally commented on as being a justifiable act, and one that the violence and unfairness of the deceased merited. It brings into prominent remembrance the old times when the brave Broderick fell by the hand of Terry, and those who remember that terrible affair will not fail to feel a little thrill of satisfaction over the violent ending of Broderick's slayer's life.

The conference of the American republics to be held in Washington in October will be largely attended. The state department is advised that delegates to the conference of the United States, the republics of Mexico, Central, South America, Hayti, San Domingo and the empire of Brazil have been appointed by the Argentine republic. Bolivia, Brazil, Columbia, Guatemala, Peru, Chile, Costa Rica, Ecuador, Hayti, Honduras, Mexico, Nicaragua, Salvador, San Domingo, Uruguay and Venezuela have accepted invitations to take part, but have not yet sent the names of delegates.

It is often asserted that the colored people of the South are multiplying faster than the white element, but the census of Texas taken by the statistician of that state tells a different story. In 1880 the white population of Texas was 1,197,237; colored, 394,512. In 1887 the figures were: White, 1,519,459; colored, 395,575 showing a vast increase of the whites, with a trifling increase of the blacks, in seven years. The white birth-rate in 1887 was 3.19, the 2.87. The white death-rate was 1.05; colored 1.11. It is thought that some thousands of negroes have emigrated to Kansas and California. But allowing for this, there is still a rate of increase far below the popular expectation.

The Chronicle thinks on our jury system there is a chance for improvement and suggest that we might learn something from the English practice. It says that those who have attentively followed the news item about the Maybrick trial, have learned that Eng-

lish jurors instead of being debarred from the privilege of reading newspapers during the course of a trial, actually have them furnished to them by the officers of the court. Evidently the idea so prevalent in this country, that a man who is able to read is not qualified to sit on a jury, does not obtain on the other side of the water. The attempt in this country to make up juries composed of men who cannot read—or what amounts to the same thing, who, having read, have not sense enough to draw a conclusion—has not helped the cause of justice in America. The verdict of a man who will frankly admit that he has formed an opinion which will require evidence to remove, is ten times more apt to be fair than that of the clod who never heard of the case, because he has not energy or education enough to read a newspaper. The latter class, however, is, by many lawyers, considered the best to draw from, probably because they fancy that they can more successfully mislead ignorance than intelligence.
